antiterrorism level 1 answers pretest: *Making Public Places Safer* Brandon C. Welsh, David P. Farrington, 2009-11-04 The United Kingdom has more than 4.2 million public closed-circuit television (CCTV) cameras-one for every fourteen citizens. Across the United States, hundreds of video surveillance systems are being installed in town centers, public transportation facilities, and schools at a cost exceeding \$100 million annually. And now other Western countries have begun to experiment with CCTV to prevent crime in public places. In light of this expansion and the associated public expenditure, as well as pressing concerns about privacy rights, there is an acute need for an evidence-based approach to inform policy and practice. Drawing on the highest-quality research, criminologists Brandon C. Welsh and David P. Farrington assess the effectiveness and social costs of not only CCTV, but also of other important surveillance methods to prevent crime in

public space, such as improved street lighting, security guards, place managers, and defensible space. Importantly, the book goes beyond the question of Does it work? and examines the specific conditions and contexts under which these surveillance methods may have an effect on crime as well as the mechanisms that bring about a reduction in crime. At a time when cities need cost-effective methods to fight crime and the public gradually awakens to the burdens of sacrificing their privacy and civil rights for security, Welsh and Farrington provide this timely and reliable guide to the most effective and non-invasive uses of surveillance to make public places safer from crime.

antiterrorism level 1 answers pretest: Northern Nigeria's Boko Haram Jacob Zenn, 2012 This report addresses the regional ramifications of the rise of Boko Haram and evaluates the jihadist terrorist organization as something more than a domestic Nigerian movement. The report discusses Boko Haram's regional connections and the possibility of it expanding throughout West Africa. The architecture for Boko Haram to become an al Qaeda wing in West Africa or part of a regional terrorist movement may already be in place. The Movement for Oneness and Jihad in West Africa (MOJWA) shares the same goal as Boko Haram and is also dominated by Hausa speaking members. Armed with weapons from Libya's caches and possessing operational ties to an Algerian-based al Qaeda faction, MOJWA may be the link between Boko Haram in Nigeria and a broader Boko Haram regional movement. The expansion of these terrorists in West Africa, and the possibility of Boko Haram franchising, could present a future threat to Western business interests in the area and undermine the region's fledgling democracies.

Federal Emergency Management Agency, 2010 Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in

thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain.
