**citadel exam schedule: Citadel to City-State** Carol G. Thomas, Craig Conant, 2009-08-25  
Citadel to City-State serves as an excellent summarization of our present knowledge of the not-so-dark Dark Age as well as an admirable prologue to the understanding of the subsequent

Archaic and Classical periods. -- David Rupp, Phoenix The Dark Age of Greece is one of the least understood periods of Greek history. A terra incognita between the Mycenaean civilization of Late Bronze Age Greece and the flowering of Classical Greece, the Dark Age was, until the last few decades, largely neglected. Now new archaeological methods and the discovery of new evidence have made it possible to develop a more comprehensive view of the entire period. Citadel to City-State explores each century from 1200 to 700 B.C.E. through an individual site -- Mycenae, Nichoria, Athens, Lefkandi, Corinth, and Ascrea -- that illustrates the major features of each period. This is a remarkable account of the historical detective work that is beginning to shed light on Dark Age Greece.

**citadel exam schedule: The Inner Citadel** Pierre Hadot, 1998 The Meditations of Marcus Aurelius are treasured today--as they have been over the centuries--as an inexhaustible source of wisdom. And as one of the three most important expressions of Stoicism, this is an essential text for everyone interested in ancient religion and philosophy. Yet the clarity and ease of the work's style are deceptive. Pierre Hadot, eminent historian of ancient thought, uncovers new levels of meaning and expands our understanding of its underlying philosophy. Written by the Roman emperor for his own private guidance and self-admonition, the Meditations set forth principles for living a good and just life. Hadot probes Marcus Aurelius's guidelines and convictions and discerns the hitherto unperceived conceptual system that grounds them. Abundantly quoting the Meditations to illustrate his analysis, the author allows Marcus Aurelius to speak directly to the reader. And Hadot unfolds for us the philosophical context of the Meditations, commenting on the philosophers Marcus Aurelius read and giving special attention to the teachings of Epictetus, whose disciple he was. The soul, the guiding principle within us, is in Marcus Aurelius's Stoic philosophy an inviolable stronghold of freedom, the inner citadel. This spirited and engaging study of his thought offers a fresh picture of the fascinating philosopher-emperor, a fuller understanding of the tradition and doctrines of Stoicism, and rich insight on the culture of the Roman empire in the second century. Pierre Hadot has been working on Marcus Aurelius for more than twenty years; in this book he distills his analysis and conclusions with extraordinary lucidity for the general reader.

Renowned media scholars and authors Robert Hilliard and Michael Keith examine the blue side of the airways in *Dirty Discourse: Sex and Indecency in Broadcasting*. This first-ever analysis of the history and nature of off-color program content explores the treatment of once-forbidden topics in the electronic media, investigating the beliefs, attitudes and actions of those who present such material, those who condemn it, and those who defend it. Written from a social and cultural perspective, *Dirty Discourse* concentrates on the means of greatest distribution - radio, with its phenomenal growth of 'shock jocks' and rap music lyrics, and provides coverage of television and the Internet. The book shows how and why broadcasting has evolved from the ribald antics of the Roaring 20's to today's streaming cybersex, contrasting the standards and actions of the FCC v. the First Amendment amidst the over-the-air and in-the-court battles of over-the-top radio. It examines political pressures and legal considerations, including Supreme Court decisions, and efforts to protect children from media smut.

**citadel exam schedule: Charleston in Black and White** Steve Estes, 2015-07-10 Once one of the wealthiest cities in America, Charleston, South Carolina, established a society built on the racial hierarchies of slavery and segregation. By the 1970s, the legal structures behind these racial divisions had broken down and the wealth built upon them faded. Like many southern cities, Charleston had to construct a new public image. In this important book, Steve Estes chronicles the rise and fall of black political empowerment and examines the ways Charleston responded to the civil rights movement, embracing some changes and resisting others. Based on detailed archival research and more than fifty oral history interviews, *Charleston in Black and White* addresses the complex roles played not only by race but also by politics, labor relations, criminal justice, education, religion, tourism, economics, and the military in shaping a modern southern city. Despite the advances and opportunities that have come to the city since the 1960s, Charleston (like much of the South) has not fully reckoned with its troubled racial past, which still influences the present and will continue to shape the future.

**citadel exam schedule: The Left Case Against the EU** Costas Lapavitsas, 2018-12-05 Many on the Left see the European Union as a fundamentally benign project with the potential to underpin ever greater cooperation and progress. If it has drifted rightward, the answer is to fight for reform from within. In this iconoclastic polemic, economist Costas Lapavitsas demolishes this view. He contends that the EU's response to the Eurozone crisis represents the ultimate transformation of the union into a neoliberal citadel that institutionally embeds austerity, privatization, and wage cuts. Concurrently, the rise of German hegemony has divided the EU into an unstable core and dependent peripheries. These related developments make the EU impervious to meaningful reform. The solution is therefore a direct challenge to the EU project that stresses popular and national sovereignty as preconditions for true internationalist socialism. Lapavitsas's powerful manifesto for a left opposition to the EU upends the wishful thinking that often characterizes the debate and will be a challenging read for all on the Left interested in the future of Europe.

However, Saiid encounters unexpected and dangerous challenges while visiting his Iranian family. Government authorities in Iran decide to detain him with endless roadblocks of hearings and demands of huge sums of money for his release. As weeks lengthen into months, despair and fear threaten-and yet, the powerful hand of God is at work. An incredible chain of events unfolds, leading to a midnight escape over the Turkish mountains on horseback. As you read this astonishing and interesting book you cant help but pause and think about thousands of other men and women who have been held there against their will while the Islamic Republic of Iran uses them to humiliate America at the expense of those innocent people. I was one of the fortunate ones who managed to escape, but many continue to be held and suffer against their will. This is my story . . .

**citadel exam schedule:** Handbook of Research on Character and Leadership Development in Military Schools Ryan, Mark Patrick, Weekes, Timothy L., 2021-01-22 Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders, and athletes who adhere to a code of honor and ethical principles as they take the knowledge, skills, and dispositions gained at those academies into higher education, the business world, military service, civic endeavors, and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school/college education and how those components successfully produce leaders of character for our military, civic, academic, and business worlds both in the United States and abroad. The Handbook of Research on Character and Leadership Development in Military Schools synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics, and other dimensions of both global and national, and both private and public, military academies. This book is ideal for current leaders, staffs, governing board members, and alumni of military academies both in the United States and internationally along with policymakers, government officials, practitioners, researchers, academicians, and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools.
