chris appleton dating history: Narrative Visions and Visual Narratives in Indian Buddhism Naomi Appleton, 2022 This volume explores the interaction between text and image in Indian Buddhist contexts, including not only the complex relationship between verbal stories and visual representations at Indian sites, but also the ways in which visual imagery is used within textual narratives. The chapters are authored by a mixture of textual scholars and art historians, bringing together different disciplinary perspectives in order to seek a richer understanding of how text and art relate, and of the role of narrative imagery in different media and contexts. The book opens with an introduction that explores what narratives and visual narratives are, and why we might want to study narrative images alongside imagery-rich literary narratives. The volume is then divided into three parts. The chapters in Part I: Visual Narratives (Zaghet, Reddy, Zin) explore visual depictions of stories in their own right; those in Part II: Narrative Networks (Mace, Appleton & Clark, Strong) seek to understand the relationship between specific visual and verbal narratives; and those in Part III: Narrative Visions (Gummer, Fiordalis, Walters) primarily investigate how visual imagery and visualisation work in textual narratives. The volume seeks to bridge the divide that traditionally exists between textual scholars and art historians, and to challenge the contributors to think beyond the usual boundaries of our work.

Barto, 2018-11-13 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. young women in early South Asia, marriage was probably the most important event in their lives, as it largely determined their socioeconomic and religious future. Yet there has been little in the way of systematic examinations of the evidence on marriage customs among Buddhists of this time, and our understanding of the lives of early Buddhist women is still quite limited. This study uses ten stories from the *Avadānaśataka*, the collection of Buddhist narratives compiled from the second to fifth centuries CE, to examine the social landscape of early India. The author analyzes marital customs and the development of nuns' hagiographies, while revealing regional variations of Buddhism in South Asia during this period.

chris appleton dating history: Lines of Authority Steven N. Zwicker, 2018-05-31 Focusing on the turbulent years between the execution of Charles I and the triumph of William III, Steven N. Zwicker reads English literature as a series of brilliant and deeply engaged polemical contests. Zwicker juxtaposes overtly polemical writings—pamphlets, broadsides, and ballads—with canonical works, including epic, historical verse, tragedy, and satire, in order to demonstrate how literature not only reflected on political action but also formed an important site of political exchange. Zwicker maintains that the sources of Restoration culture lay within the civil war years of the 1640s and that the memory of those years shaped writing and politics for the remainder of the century. In sensitive readings of such classic texts as Walton's *Compleat Angler*, Marvell's *First Anniversary* and *Last Instructions*, Milton's *Paradise Lost*, Dryden's *Annus Mirabilis* and *Absalom and Achitophel*, and Locke's *Two Treatises of Government*, he shows how these texts both engaged with pamphlet, squib, and broadside and challenged one another over the possession of cultural authority. Zwicker's analysis provides a new understanding of the connections between politics and aesthetics in the

later seventeenth century and an appreciation for the texture of this culture. Successfully integrating literary history and political analysis, *Lines of Authority* will be valuable reading for a broad audience in the fields of Restoration and Protectorate literature, literary history, cultural and intellectual history, and the history of political thought.

chris appleton dating history: *Needlework and Women's Identity in Colonial Australia* Lorinda Cramer, 2019-09-05 In gold-rush Australia, social identity was in flux: gold promised access to fashionable new clothes, a grand home, and the goods to furnish it, but could not buy gentility. *Needlework and Women's Identity in Colonial Australia* explores how the wives, mothers, sisters, and daughters who migrated to the newly formed colony of Victoria used their needle skills as a powerful claim to social standing. Focusing on one of women's most common daily tasks, the book examines how needlework's practice and products were vital in the contest for social position in the turmoil of the first two decades of the Victorian rush from 1851. Placing women firmly at the center of colonial history, it explores how the needle became a tool for stitching together identity. From decorative needlework to household making and mending, women's sewing was a vehicle for establishing, asserting, and maintaining social status. Interdisciplinary in scope, *Needlework and Women's Identity in Colonial Australia* draws on material culture, written primary sources, and pictorial evidence, to create a rich portrait of the objects and manners that defined genteel goldfields living. Giving voice to women's experiences and positioning them as key players in the fabric of gold-rush society, this volume offers a fresh critical perspective on gender and textile history.

chris appleton dating history: *The History of the Standard Oil Company* Ida Minerva Tarbell, 2020-09-28 One of the busiest corners of the globe at the opening of the year 1872 was a strip of Northwestern Pennsylvania, not over fifty miles long, known the world over as the Oil Regions. Twelve years before this strip of land had been but little better than a wilderness; its chief inhabitants the lumbermen, who every season cut great swaths of primeval pine and hemlock from its hills, and in the spring floated them down the Allegheny River to Pittsburg. The great tides of Western emigration had shunned the spot for years as too rugged and unfriendly for settlement, and yet in twelve years this region avoided by men had been transformed into a bustling trade centre, where towns elbowed each other for place, into which three great trunk railroads had built branches, and every foot of whose soil was fought for by capitalists. It was the discovery and development of a new raw product, petroleum, which had made this change from wilderness to market-place. This product in twelve years had not only peopled a waste place of the earth, it had revolutionised the world's methods of illumination and added millions upon millions of dollars to the wealth of the United States. Petroleum as a curiosity, and indeed in a small way as an article of commerce, was no new thing when its discovery in quantities called the attention of the world to this corner of Northwestern Pennsylvania. The journals of many an early explorer of the valleys of the Allegheny and its tributaries tell of springs and streams the surfaces of which were found covered with a thick oily substance which burned fiercely when ignited and which the Indians believed to have curative properties. As the country was opened, more and more was heard of these oil springs. Certain streams came to be named from the quantities of the substance found on the surface of the water, as "Oil Creek" in Northwestern Pennsylvania, "Old Greasy" or Kanawha in West Virginia. The belief in the substance as a cure-all increased as time went on and in various parts of the country it was regularly skimmed from the surface of the water as cream from a pan, or soaked up by woollen blankets, bottled, and peddled as a medicine for man and beast. Up to the beginning of the 19th century no oil seems to have been obtained except from the surfaces of springs and streams. That it was to be found far below the surface of the earth was discovered independently at various points in Kentucky, West Virginia, Ohio and Pennsylvania by persons drilling for salt-water to be used in

manufacturing salt. Not infrequently the water they found was mixed with a dark-green, evil-smelling substance which was recognised as identical with the well-known "rock-oil." It was necessary to rid the water of this before it could be used for salt, and in many places cisterns were devised in which the brine was allowed to stand until the oil had risen to the surface. It was then run into the streams or on the ground. This practice was soon discovered to be dangerous, so easily did the oil ignite. In several places, particularly in Kentucky, so much oil was obtained with the salt-water that the wells had to be abandoned. Certain of these deserted salt wells were opened years after, when it was found that the troublesome substance which had made them useless was far more valuable than the brine the original drillers sought.
