The authors make a unique contribution to the existing scholarship on critical consciousness and culturally responsive teaching by comparing the roles of different schooling models in fostering various dimensions of critical consciousness and identifying specific programming and practices that contributed to this work. Through their research with more than 300 hundred students of color, Seider and Graves aim to help educators strengthen their capacity to support young people in learning to analyze, navigate, and challenge racial injustice. *Schooling for Critical Consciousness* provides school leaders and educators with specific programming and practices they can incorporate into their own school contexts to support the critical consciousness development of the youth they serve.

civics seal of excellence answers: *Good Strategy Bad Strategy* Richard Rumelt, 2011-07-19 Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In Good Strategy/Bad Strategy, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007–08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, Good Strategy/Bad Strategy stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.

civics seal of excellence answers: *The Managerial Imperative and the Practice of Leadership in Schools* Larry Cuban, 1988-01-15 With this significant new work, Larry Cuban provides a unique and insightful perspective on the bridging of the long-standing and well-known gap between teachers and administrators. Drawing on the literature of the field as well as personal experience, Cuban recognizes the enduring structural relationship within school organizations inherited by teachers, principals, and superintendents, and calls for a renewal of their sense of common purpose regarding the role of schooling in a democratic society. Cuban analyzes the dominant images (moral and technical), roles (instructional, managerial, and political), and contexts (classroom, school, and district) within which teachers, principals, and superintendents have worked over the last century. He concludes that when these powerful images and roles are wedded to the structural conditions in which schooling occurs, managerial behavior results, thus narrowing the potential for more thoughtful, effective, and appropriate leadership. Cuban then turns to consider this situation with respect to the contemporary movement for school reform, identifying significant concerns both for policymakers and practitioners. This honest, thought-provoking book by a leading scholar, writer, and practitioner in the field represents an invaluable resource—an insightful introduction for those just entering the field and a fresh, new perspective for those long-familiar with its complexities. Cuban's ethnographic approach to the development of his own career and viewpoint, as well as his highly readable style, make this a work of lasting value.

Tracing the history of capitalism from the great transformation of the industrial revolution onwards, he shows that there has been nothing 'natural' about the market state. Instead of reducing human relations and our environment to mere commodities, the economy must always be embedded in civil society. civics seal of excellence answers: Transforming Teacher Education Valerie Hill-Jackson, Chance Wayne Lewis, 2023 Extracts from the text: Why are fifteen million children and youth in poverty not achieving when we know that low-income students excel in the classrooms of star teachers (who comprise approximately 8 percent of the teaching force)? Whose needs or interests are being met in education reform today? In my own institution, there has not been a systematic assessment of the effectiveness of the basic teacher education program since the institution was

founded over a century ago as a teachers college. Imagine, not one ever! Teachers who empathize with students and the life challenges they face soon realize that the dysfunctional bureaucracies will not permit them to meet the needs of their students. Half of the starry-eyed beginners are gone in five years or less. Why does teacher education focus on the managerial, instrumental or delivery system aspects of the profession? The expert advice dispensed by schools of education regarding what future teachers should do is not connected to any theory of learning, or to any reality of life in school classrooms. Why has the recruitment process resulted in a cohort of teachers who are unable to connect with their students? Does a qualified teacher equate to a quality teacher? The best hope of getting more effective teachers from university teacher preparation programs is to base their budgets on the number of their graduates who serve in challenging schools and their effectiveness with children and youth. At the district level, the salaries of hiring officials should be based on how well these officials identify and retain quality teachers. In this book, 12 distinguished scholars provide a hard-hitting, thoroughly researched, historical and theoretical critique of our schools of education, and offer clear recommendations on what must be done to ensure all children can achieve their potential, and contribute to a vibrant, democratic society.

Department of Defense, National Defense University Press, 2020-02-10 The Noncommissioned Officer and Petty Officer BACKBONE of the Armed Forces. Introduction The Backbone of the Armed Forces To be a member of the United States Armed Forces--to wear the uniform of the Nation and the stripes, chevrons, or anchors of the military Services--is to continue a legacy of service, honor, and patriotism that transcends generations. Answering the call to serve is to join the long line of selfless patriots who make up the Profession of Arms. This profession does not belong solely to the United States. It stretches across borders and time to encompass a culture of service, expertise, and, in most cases, patriotism. Today, the Nation's young men and women voluntarily take an oath to support and defend the Constitution of the United States and fall into formation with other proud and determined individuals who have answered the call to defend freedom. This splendid legacy, forged in crisis and enriched during times of peace, is deeply rooted in a time-tested warrior ethos. It is inspired by the notion of contributing to something larger, deeper, and more profound than one's own self.
