On an Icelandic Island, an illegal experiment intended to create the perfect biological weapon has transformed a once-innocent creature into the biblical Leviathan that once terrorized the world. Able to shatter steel and granite as easily as it can melt the strongest containment shields, Leviathan escapes from its pen and is loose in a vast underground chamber harboring soldiers and scientists. The installation cannot allow Leviathan to reach the surface. For if Leviathan reaches the world, it could well be the end of the Earth. They must hold the line, here, and destroy it . . . even if they must detonate a last-chance nuclear failsafe built into the chamber itself. But, first, they must fight with every weapon at their disposal to discover if the beast can be killed at all. It is a battle many will not survive. As soldiers and scientists are vaporized by Leviathan's hellish flame, or ripped apart by the dragon's claws and fangs, a lone

coolmathgames awesome tanks 2: The Iron Man Robert E. Howard, 2021-11-09 The Iron Man

by Robert E. Howard is a collection of three short stories, each with elements related to the world of boxing. Excerpt: I took Brennon to my open-air ring where Spike Ganlon, a clever middleweight, was working out, and instructed them to step for a few fast rounds. Brennon was eager enough, and I was astonished to see him put up a very fair sort of boxing against the shifty Ganlon. True, he was far out-stepped and out-classed, but that was to be expected, as Ganlon was a rather prominent figure in the fistic world. But I did not like the way Mike sent in his punches. They lacked the old trip-hammer force, and he was slower than I had remembered him to be. However, when I had him slug the heavy bag he flashed his old form, nearly tearing the bag loose from its moorings, and I decided that he had been pulling his punches against Ganlon.

coolmathgames awesome tanks 2: Treasures of the Earth Saleem H. Ali, 2009-01-01 Would the world be a better place if human societies were somehow able to curb their desires for material goods? Saleem Ali's pioneering book links human wants and needs by providing a natural history of consumption and materialism with scientific detail and humanistic nuance. It argues that simply disavowing consumption of materials is not likely to help in planning for a resource-scarce future, given global inequality, development imperatives, and our goals for a democratic global society. Rather than suppress the creativity and desire to discover that is often embedded in the exploration and production of material goods--which he calls the treasure impulse--Ali proposes a new environmental paradigm, one that accepts our need to consume treasure for cultural and developmental reasons, but warns of our concomitant need to conserve. In evaluating the impact of treasure consumption on resource-rich countries, he argues that there is a way to consume responsibly and alleviate global poverty.
