current event in climate studies crossword: China and the Environment Sam Geall, 2013-04-11 Sixteen of the world's 20 most polluted cities are in China. A serious water pollution incident occurs once every two-to-three days. China's breakneck growth causes great concern about its global environmental impacts, as others look to China as a source for possible future solutions to climate change. But how are Chinese people really coming to grips with environmental problems? This book provides access to otherwise unknown stories of environmental activism and forms the first real-life account of China and its environmental tensions. 'China and the Environment' provides a unique report on the experiences of participatory politics that have emerged in response to environmental problems, rather than focusing only on macro-level ecological issues and their elite responses. Featuring previously untranslated short interviews, extracts from reports and other translated primary documents, the authors argue that going green in China isn't just about carbon targets and energy policy; China's grassroots green defenders are helping to change the country for

the better.

current event in climate studies crossword: Our Warming Planet: Topics In Climate Dynamics Cynthia Rosenzweig, David Rind, Andrew Lacis, Danielle Peters, 2018-01-18 The processes and consequences of climate change are extremely heterogeneous, encompassing many different fields of study. Dr David Rind in his career at the NASA Goddard Institute for Space Studies and as a professor at Columbia University has had the opportunity to explore many of these subjects with colleagues from these diverse disciplines. It was therefore natural for the Lectures in Climate Change series to begin with his colleagues contributing lectures on their specific areas of expertise. This first volume, entitled Our Warming Planet: Topics in Climate Dynamics, encompasses topics such as natural and anthropogenic climate forcing, climate modeling, radiation, clouds, atmospheric dynamics/storms, hydrology, clouds, the cryosphere, paleoclimate, sea level rise, agriculture, atmospheric chemistry, and climate change education. Included with this publication are downloadable PowerPoint slides of each lecture for students and teachers around the world to be better able to understand various aspects of climate change. The lectures on climate change processes and consequences provide snapshots of the cutting-edge work being done to understand what may well be the greatest challenge of our time, in a form suitable for classroom presentation.

current event in climate studies crossword: The End of Karma: Hope and Fury Among India's Young Somini Sengupta, 2016-03-07 "[A] sharply observed study . . . richly detailed portraits."—Economist Somini Sengupta emigrated from Calcutta to California as a young child in 1975. Returning thirty years later as the bureau chief for The New York Times, she found a vastly different country: one defined as much by aspiration and possibility—at least by the illusion of possibility—as it is by the structures of sex and caste. The End of Karma is an exploration of this new India through the lens of young people from different worlds: a woman who becomes a Maoist rebel; a brother charged for the murder of his sister, who had married the "wrong" man; a woman who opposes her family and hopes to become a police officer. Driven by aspiration—and thwarted at every step by state and society—they are making new demands on India's democracy for equality of opportunity, dignity for girls, and civil liberties. Sengupta spotlights these stories of ordinary men and women, weaving together a groundbreaking portrait of a country in turmoil.

current event in climate studies crossword: Science in an Age of Unreason John Staddon, 2022-06-07 Science is undergoing an identity crisis! A renown psychologist and biologist diagnoses our age of wishful, magical thinking and blasts out a clarion call for a return to reason and the search for objective knowledge and truth. Fans of Matt Ridley and Nicholas Wade will adore this trenchant meditation and call to action. Science is in trouble. Real questions in desperate need of answers—especially those surrounding ethnicity, gender, climate change, and almost anything related to 'health and safety'—are swiftly buckling to the fiery societal demands of what ought to be rather than what is. These foregone conclusions may be comforting, but each capitulation to modernity's whims threatens the integrity of scientific inquiry. Can true, fact-based discovery be redeemed? In Science in an Age of Unreason, legendary professor of psychology and biology, John Staddon, unveils the identity crisis afflicting today's scientific community, and provides an actionable path to recovery. With intellectual depth and literary flair, Staddon answers pressing questions, including: Is science, especially the science of evolution, a religion? Can ethics be derived from science at all? How sound is social science, particularly surrounding today's most controversial topics? How can passions be separated from facts? Informed by decades of expertise, Science in an Age of Unreason is a clarion call to rebirth academia as a beacon of reason and truth in a society demanding its unconditional submission.

current event in climate studies crossword: *The Torture Letters* Laurence Ralph, 2020-01-15 Torture is an open secret in Chicago. Nobody in power wants to acknowledge this grim reality, but everyone knows it happens—and that the torturers are the police. Three to five new claims are submitted to the Torture Inquiry and Relief Commission of Illinois each week. Four hundred cases are currently pending investigation. Between 1972 and 1991, at least 125 black suspects were tortured by Chicago police officers working under former Police Commander Jon Burge. As the more

recent revelations from the Homan Square "black site" show, that brutal period is far from a historical anomaly. For more than fifty years, police officers who took an oath to protect and serve have instead beaten, electrocuted, suffocated, and raped hundreds—perhaps thousands—of Chicago residents. In The Torture Letters, Laurence Ralph chronicles the history of torture in Chicago, the burgeoning activist movement against police violence, and the American public's complicity in perpetuating torture at home and abroad. Engaging with a long tradition of epistolary meditations on racism in the United States, from James Baldwin's The Fire Next Time to Ta-Nehisi Coates's Between the World and Me, Ralph offers in this book a collection of open letters written to protesters, victims, students, and others. Through these moving, questing, enraged letters, Ralph bears witness to police violence that began in Burge's Area Two and follows the city's networks of torture to the global War on Terror. From Vietnam to Geneva to Guantanamo Bay—Ralph's story extends as far as the legacy of American imperialism. Combining insights from fourteen years of research on torture with testimonies of victims of police violence, retired officers, lawyers, and protesters, this is a powerful indictment of police violence and a fierce challenge to all Americans to demand an end to the systems that support it. With compassion and careful skill, Ralph uncovers the tangled connections among law enforcement, the political machine, and the courts in Chicago, amplifying the voices of torture victims who are still with us—and lending a voice to those long deceased.

current event in climate studies crossword: Collapse Jared Diamond, 2013-03-21 From the author of Guns, Germs and Steel, Jared Diamond's Collapse: How Societies Choose to Fail or Survive is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's Collapse uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's Collapse also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economis 'This book shines like all Diamond's work' - Sunday Times

current event in climate studies crossword: Resources in Education , 1985 current event in climate studies crossword: A Raisin in the Sun Lorraine Hansberry, 2011-11-02 Never before, in the entire history of the American theater, has so much of the truth of Black people's lives been seen on the stage, observed James Baldwin shortly before A Raisin in the Sun opened on Broadway in 1959. This edition presents the fully restored, uncut version of Hansberry's landmark work with an introduction by Robert Nemiroff. Lorraine Hansberry's award-winning drama about the hopes and aspirations of a struggling, working-class family living on the South Side of Chicago connected profoundly with the psyche of Black America—and changed American theater forever. The play's title comes from a line in Langston Hughes's poem Harlem, which warns that a dream deferred might dry up/like a raisin in the sun. The events of every passing year add resonance to A Raisin in the Sun, said The New York Times. It is as if history is conspiring to make the play a classic.

current event in climate studies crossword: Silent Spring Rachel Carson, 2020-03-26 Now recognized as one of the most influential books of the twentieth century, Silent Spring exposed the destruction of wildlife through the widespread use of pesticides Rachel Carson's Silent Spring alerted a large audience to the environmental and human dangers of pesticides, spurring

revolutionary changes in the laws affecting our air, land, and water. Despite condemnation in the press and heavy-handed attempts by the chemical industry to ban the book, Carson succeeded in creating a new public awareness of the environment which led to changes in government and inspired the ecological movement. It is thanks to this book, and the help of many environmentalists, that harmful pesticides such as DDT were banned from use in the US and countries around the world. This Penguin Modern Classics edition includes an introduction by Lord Shackleton, a preface by World Wildlife Fund founder Julian Huxley, and an afterword by Carson's biographer Linda Lear.

current event in climate studies crossword: An Ecotopian Lexicon Matthew Schneider-Mayerson, Brent Ryan Bellamy, 2019-10-22 Presents thirty novel terms that do not yet exist in English to envision ways of responding to the environmental challenges of our generation As the scale and gravity of climate change becomes undeniable, a cultural revolution must ultimately match progress in the realms of policy, infrastructure, and technology. Proceeding from the notion that dominant Western cultures lack the terms and concepts to describe or respond to our environmental crisis. An Ecotopian Lexicon is a collaborative volume of short, engaging essays that offer ecologically productive terms—drawn from other languages, science fiction, and subcultures of resistance—to envision and inspire responses and alternatives to fossil-fueled neoliberal capitalism. Each of the thirty suggested "loanwords" helps us imagine how to adapt and even flourish in the face of the socioecological adversity that characterizes the present moment and the future that awaits. From "Apocalypso" to "Qi," " ~*~ " to "Total Liberation," thirty authors from a range of disciplines and backgrounds assemble a grounded yet dizzying lexicon, expanding the limited European and North American conceptual lexicon that many activists, educators, scholars, students, and citizens have inherited. Fourteen artists from eleven countries respond to these chapters with original artwork that illustrates the contours of the possible better worlds and worldviews. Scientists around the world are currently monitoring the sixth, predicted to be the most devastating extinction event since the asteroid impact that wiped out the dinosaurs. Elizabeth Kolbert combines brilliant field reporting, the history of ideas and the work of geologists, botanists and marine biologists to tell the gripping stories of a dozen species including the Panamanian golden frog and the Sumatran rhino - some already gone, others at the point of vanishing. The sixth extinction is likely to be mankind's most lasting legacy and Elizabeth Kolbert's book urgently compels us to rethink the fundamental question of what it means to be human.

current event in climate studies crossword: iGen Jean M. Twenge, 2017-08-22 As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the

age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

"The perfect novel ... Freshly mysterious." —The Washington Post Vincent is a bartender at the Hotel Caiette, a five-star lodging on the northernmost tip of Vancouver Island. On the night she meets Jonathan Alkaitis, a hooded figure scrawls a message on the lobby's glass wall: Why don't you swallow broken glass. High above Manhattan, a greater crime is committed: Alkaitis's billion-dollar business is really nothing more than a game of smoke and mirrors. When his scheme collapses, it obliterates countless fortunes and devastates lives. Vincent, who had been posing as Jonathan's wife, walks away into the night. Years later, a victim of the fraud is hired to investigate a strange occurrence: a woman has seemingly vanished from the deck of a container ship between ports of call. In this captivating story of crisis and survival, Emily St. John Mandel takes readers through often hidden landscapes: campgrounds for the near-homeless, underground electronica clubs, service in luxury hotels, and life in a federal prison. Rife with unexpected beauty, The Glass Hotel is a captivating portrait of greed and guilt, love and delusion, ghosts and unintended consequences, and the infinite ways we search for meaning in our lives. Look for Emily St. John Mandel's bestselling new novel, Sea of Tranquility!

current event in climate studies crossword: Review of the Draft Fourth National Climate Assessment National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Division on Earth and Life Studies, Board on Environmental Change and Society, Board on Atmospheric Sciences and Climate, Committee to Review the Draft Fourth National Climate Assessment, 2018-06-18 Climate change poses many challenges that affect society and the natural world. With these challenges, however, come opportunities to respond. By taking steps to adapt to and mitigate climate change, the risks to society and the impacts of continued climate change can be lessened. The National Climate Assessment, coordinated by the U.S. Global Change Research Program, is a mandated report intended to inform response decisions. Required to be developed every four years, these reports provide the most comprehensive and up-to-date evaluation of climate change impacts available for the United States, making them a unique and important climate change document. The draft Fourth National Climate Assessment (NCA4) report reviewed here addresses a wide range of topics of high importance to the United States and society more broadly, extending from human health and community well-being, to the built environment, to businesses and economies, to ecosystems and natural resources. This report evaluates the draft NCA4 to determine if it meets the requirements of the federal mandate, whether it provides accurate information grounded in the scientific literature, and whether it effectively communicates climate science, impacts, and responses for general audiences including the public, decision makers, and other stakeholders.

current event in climate studies crossword: Pain Management and the Opioid Epidemic National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on Pain Management and Regulatory Strategies to Address Prescription Opioid Abuse, 2017-09-28 Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

current event in climate studies crossword: Against Democracy Jason Brennan, 2017-09-26 A bracingly provocative challenge to one of our most cherished ideas and institutions Most people believe democracy is a uniquely just form of government. They believe people have the right to an equal share of political power. And they believe that political participation is good for us—it empowers us, helps us get what we want, and tends to make us smarter, more virtuous, and more caring for one another. These are some of our most cherished ideas about democracy. But Jason Brennan says they are all wrong. In this trenchant book, Brennan argues that democracy should be judged by its results—and the results are not good enough. Just as defendants have a right to a fair trial, citizens have a right to competent government. But democracy is the rule of the ignorant and the irrational, and it all too often falls short. Furthermore, no one has a fundamental right to any share of political power, and exercising political power does most of us little good. On the contrary, a wide range of social science research shows that political participation and democratic deliberation actually tend to make people worse—more irrational, biased, and mean. Given this grim picture, Brennan argues that a new system of government—epistocracy, the rule of the knowledgeable—may be better than democracy, and that it's time to experiment and find out. A challenging critique of democracy and the first sustained defense of the rule of the knowledgeable, Against Democracy is essential reading for scholars and students of politics across the disciplines. Featuring a new preface that situates the book within the current political climate and discusses other alternatives beyond epistocracy, Against Democracy is a challenging critique of democracy and the first sustained defense of the rule of the knowledgeable.

current event in climate studies crossword: Go Set a Watchman Harper Lee, 2015-11-12 Dua puluh tahun lalu, Jean Louise menyaksikan Atticus, sang Ayah, membela Negro di pengadilan Maycomb County. Kini, Jean Louise menyadari bahwa Maycomb dan sang Ayah, ternyata tak seperti yang dia kira selama ini dan dia pun bukan Scout yang polos lagi. Go Set a Watchman adalah naskah pertama yang diajukan Harper Lee kepada penerbit sebelum To Kill a Mockingbird, yang memenangi Pulitzer. Setelah 60 tahun dianggap hilang, naskah berharga ini ditemukan pada akhir 2014. Terbitnya Go Set a Watchman disambut animo luar biasa. Buku ini terjual lebih dari 1,1 juta kopi di minggu pertama, memuncaki daftar bestseller di Amerika selama 5 minggu berturut-turut dalam 1,5 bulan, dan mengalahkan penjualan Harry Potter serta 50 Shades of Grey. Go Set a Watchman, warisan berharga Harper Lee, penulis Amerika paling berpengaruh pada abad ke-20. Go

Set a Watchman mempertanyakan beberapa hal penting yang justru disamarkan dalam To Kill a Mockingbird. Menghibur, lucu, tapi lugas dan jujur.-Ursula K. Le Guin, penulis The Earthsea Cycle Aset terbesar Go Set a Watchman ialah perannya dalam memicu diskusi jujur tentang sejarah gelap Amerika mengenai persamaan ras.-San Francisco Chronicle Luar biasa, sebuah novel yang ditulis lebih dari 50 tahun lalu ternyata masih kontekstual dengan masalah yang kita hadapi sekarang, tentang ras dan ketidakadilan.-Chicago Tribune Go Set a Watchman lebih kompleks daripada To Kill a Mockingbird, karya klasik Harper Lee. Sebuah novel yang lengkap ... sebuah karya sastra baru yang memuaskan dan autentik. -The Guardian Go Set a Watchman memberikan pencerahan tentang kompleksitas dan kecerdasan salah satu penulis Amerika yang paling penting.-USA Today Seperti yang dikemukakan Faulkner, kisah yang bagus adalah kisah manusia yang berkonflik dengan nuraninya. Dan itu adalah ringkasan yang tepat tentang Go Set a Watchman.-Daily Beast Kompleksitas karakter Atticus membuat Go Set a Watchman pantas dibaca. Dengan Mockingbird, Harper Lee membuat kita mempertanyakan siapa sebenarnya diri kita dan apa yang sebenarnya kita tahu. Go Set a Watchman meneruskan tradisi mulia ini. -New York Post [Mizan, Mizan Publishing, Novel, Terjemahan, Legendaris, Indonesia]
