Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

cool math games black and white: The 12 Bad Habits That Hold Good People Back

James Waldroop, Ph.D., Timothy Butler, Ph.D., 2002-02-05 Have you ever wondered why some people seem to rise effortlessly to the top, while others are stuck in the same job year after year? Have you ever felt you are falling short of your career potential? Have you wondered if some of the things you do—or don't do—at work might be hamstringing your ambitions? In *The 12 Bad Habits That Hold Good People Back*, James Waldroop and Timothy Butler identify the twelve habits that—whether you are a retail clerk or a law firm partner, work in technology or in a factory—are almost guaranteed to hold you back. The fact is, most people learn their greatest lessons not from their successes but from their mistakes. *The 12 Bad Habits That Hold Good People Back* offers the flip side to Stephen Covey's approach in *The 7 Habits of Highly Effective People*, zeroing in on the most common behavior that can impede a career. Based on over twenty years of research as business psychologists, the authors claim that the reasons people fail in their jobs are the same everywhere. Only after these detrimental behaviors have been identified can the patterns that limit career advancement be broken. Using real-life accounts of clients they have worked with at Harvard and as executive coaches at such companies as GTE, Sony, GE, and McKinsey & Co., Waldroop and Butler offer invaluable—and in some cases, job-saving—step-by-step advice on how readers can change their behavior to get back on track. For anyone seeking to achieve his or her career ambitions, *The 12 Bad Habits That Hold Good People Back* is a powerful tool for unleashing true potential.

cool math games black and white: *Dream Town* Laura Meckler, 2023-08-22 Ohioana Book Award Finalist Can a group of well-intentioned people fulfill the promise of racial integration in America? In this searing and intimate examination of the ideals and realities of racial integration, award-winning Washington Post journalist Laura Meckler tells the story of a decades-long pursuit in Shaker Heights, Ohio, and uncovers the roadblocks that have threatened progress time and again—in housing, in education, and in the promise of shared community. In the late 1950s, Shaker Heights began groundbreaking work that would make it a national model for housing integration. And beginning in the seventies, it was known as a crown jewel in the national move to racially integrate schools. The school district built a reputation for academic excellence and diversity, serving as a model for how white and Black Americans can thrive together. Meckler—herself a product of Shaker Heights—takes a deeper look into the place that shaped her, investigating its complicated history and its ongoing challenges in order to untangle myth from truth. She confronts an enduring, and troubling, question—if Shaker Heights has worked so hard at racial equity, why does a racial academic achievement gap persist? In telling the stories of the Shakerites who have built and lived in this community, Meckler asks: What will it take to fulfill the promise of racial integration in America? What compromises are people of all races willing to make? What does success look like, and has Shaker achieved it? The result is a complex and masterfully reported portrait of a place that, while never perfect, has achieved more than most and a road map for communities that seek to do the same. Includes black-and-white images.

cool math games black and white: *Black Man Emerging* Joseph L. White, James H. Cones III, 2013-10-18 In the face of centuries of institutional and interpersonal racism, in light of the signals they receive from society, and given the choices they must make about what they want from life and how to go about getting it--how can Black men in America realize their full potential? In *Black Man Emerging*, psychologists Joseph L. White and James H. Cones III fashion a moving psychological and social portrait that reflects their personal views on the struggle of Black men against oppression and for self-determination. Using numerous case histories and biographical sketches of Black men who have failed and those who have prevailed, the authors describe strategies for responding to racism and entrenched power--underscoring the healing capacity of religion, family, Black consciousness movements, mentorships, educational programs, paid employment, and other positive forces. They also explore the concept of identity as it applies to being Black and male and the influence of Black men on American culture. *Black Man Emerging* is a poignant and personal discussion of the issues facing and felt by Black men in this country and an important commentary on the conflicts born of human diversity.

cool math games black and white: *A Most Beautiful Thing* Arshay Cooper, 2020-06-30 REGIONAL BESTSELLER Now a documentary narrated by Common, produced by Grant Hill, Dwyane Wade, and 9th Wonder, from filmmaker Mary Mazzio The moving true story of a group of young men growing up on Chicago's West side who form the first all-Black high school rowing team in the nation, and in doing so not only transform a sport, but their lives. Growing up on Chicago's Westside in the 90's, Arshay Cooper knows the harder side of life. The street corners are full of gangs, the hallways of his apartment complex are haunted by drug addicts he calls "zombies" with strung out arms, clutching at him as he passes by. His mother is a recovering addict, and his three siblings all sleep in a one room apartment, a small infantry against the war zone on the street below. Arshay keeps to himself, preferring to write poetry about the girl he has a crush on, and spends his school days in the home-ec kitchen dreaming of becoming a chef. And then one day as he's walking out of school he notices a boat in the school lunchroom, and a poster that reads "Join the Crew

Team". Having no idea what the sport of crew is, Arshay decides to take a chance. This decision to join is one that will forever change his life, and those of his fellow teammates. As Arshay and his teammates begin to come together to learn how to row--many never having been in water before--the sport takes them from the mean streets of Chicago, to the hallowed halls of the Ivy League. But Arshay and his teammates face adversity at every turn, from racism, gang violence, and a sport that has never seen anyone like them before. *A Most Beautiful Thing* is the inspiring true story about the most unlikely band of brothers that form a family, and forever change a sport and their lives for the better.

cool math games black and white: Assata Assata Shakur, 2016-02-15 'Deftly written...a spellbinding tale.' The New York Times In 2013 Assata Shakur, founding member of the Black Liberation Army, former Black Panther and godmother of Tupac Shakur, became the first ever woman to make the FBI's most wanted terrorist list. Assata Shakur's trial and conviction for the murder of a white state trooper in the spring of 1973 divided America. Her case quickly became emblematic of race relations and police brutality in the USA. While Assata's detractors continue to label her a ruthless killer, her defenders cite her as the victim of a systematic, racist campaign to criminalize and suppress black nationalist organizations. This intensely personal and political autobiography reveals a sensitive and gifted woman. With wit and candour Assata recounts the formative experiences that led her to embrace a life of activism. With pained awareness she portrays the strengths, weaknesses and eventual demise of black and white revolutionary groups at the hands of the state. A major contribution to the history of black liberation, destined to take its place alongside *The Autobiography of Malcolm X* and the works of Maya Angelou.

cool math games black and white: Raising the Race Riché J. Daniel Barnes, 2015-12-01 Winner of the 2017 Race, Gender, and Class Section Book Award from the American Sociological Association Popular discussions of professional women often dwell on the conflicts faced by the woman who attempts to "have it all," raising children while climbing up the corporate ladder. Yet for all the articles and books written on this subject, there has been little work that focuses on the experience of African American professional women or asks how their perspectives on work-family balance might be unique. *Raising the Race* is the first scholarly book to examine how black, married career women juggle their relationships with their extended and nuclear families, the expectations of the black community, and their desires to raise healthy, independent children. Drawing from extensive interviews with twenty-three Atlanta-based professional women who left or modified careers as attorneys, physicians, executives, and administrators, anthropologist Riché J. Daniel Barnes found that their decisions were deeply rooted in an awareness of black women's historical struggles. Departing from the possessive individualistic discourse of "having it all," the women profiled here think beyond their own situation—considering ways their decisions might help the entire black community. Giving a voice to women whose perspectives have been underrepresented in debates about work-family balance, Barnes's profiles enable us to perceive these women as fully fledged individuals, each with her own concerns and priorities. Yet Barnes is also able to locate many common themes from these black women's experiences, and uses them to propose policy initiatives that would improve the work and family lives of all Americans.

cool math games black and white: *Memories of Mount Qilai* Yang Mu, 2015-01-20 Hualien, on the Pacific coast of eastern Taiwan, and its mountains, especially Mount Qilai, were deeply inspirational for the young poet Yang Mu. A place of immense natural beauty and cultural heterogeneity, the city was also a site of extensive social, political, and cultural change in the twentieth century, from the Japanese occupation and the American bombings of World War II to the Chinese civil war, the White Terror, and the Cold War. Taken as a whole, these evocative and allusive autobiographical essays provide a personal response to history as Taiwan transitioned from a Japanese colony to the Republic of China. Yang Mu recounts his childhood experiences under the Japanese, life in the mountains in proximity to indigenous people as his family took refuge from the American bombings, his initial encounters and cultural conflicts with Nationalist soldiers recently arrived from mainland China, the subsequent activities of the Nationalist government to consolidate power, and the island's burgeoning new manufacturing society. Nevertheless, throughout those early years, Yang Mu remained anchored by a sense of place on Taiwan's eastern coast and amid its coastal mountains, over which stands Mount Qilai like a guardian spirit. This was the formative milieu of the young poet. Yang Mu seized on verse to develop a distinct persona and draw meaning from the currents of change reshuffling his world. These eloquent essays create an exciting, subjective realm meant to transcend the personal and historical limitations of the individual and the end of culture, plundered and polluted by politics and industry long ago.
