dr does quiz ending: *In Our Own Words* Various Authors, 2017-08-24 When Georgia Southern College in the small town of Statesboro opened its doors to its first six colored students in 1965, it did so without much of the very public outcry faced at other schools and colleges as part of desegregation. These six pioneers share their personal memories of integrating the college, which opened doors for those who would follow. In 2014, more than 5,400 African American students enrolled at the school, now known as Georgia Southern University (GSU). The essays of those initial

pioneers—as well as those by fifteen other alums through the Class of 1985—demonstrate the perseverance of the human spirit and illustrate how social change can be achieved by boldly confronting difficult and frightening situations to bring about lasting reform. Their stories of integration at the southern school tell of emotional ordeals, some of which led to lasting scars and times of defeat. Life wasn't easy if you were black on a predominantly white college campus. But in the midst of despair comes triumph. In *Our Own Words* also shares the determination and dedication of those early students, most of whom went on to successful careers and personal accomplishments. This powerful collection of essays that needed to be written showcases a group of students who never dreamed they would one-day help shape the college's history and leave a legacy that would allow others to follow in their footsteps.

dr does quiz ending: Dr. George George T. Mitchell, 1994 After the war, Dr. Mitchell established his medical practice in Marshall, where, he observes, he was among sixteen physicians in a rural county with a population of less than twenty thousand people. Within twenty-five years, the number of doctors had dropped to only four. In this memoir, Dr. Mitchell conveys his unwillingness to just sit by and watch the health needs of his community increase while medical and other services decline. He, instead, became a community activist, representing rural concerns to the state medical society, organizing the first emergency medical technician teams in the county, masterminding the planning of a regional medical center, campaigning successfully for improved highway safety, and spurring the extension of reliable telephone service throughout his area. As Dr. Mitchell recounts the house calls, farm accidents, emergency surgeries, and family counseling that comprised the life of this country doctor, he offers the keen insights of a clinician trained to look beyond what others only see. Still a practicing physician, Dr. Mitchell ably comprehends the values of the people he has treated and marks the transition from post-World War I medicine to high-tech healing.--BOOK JACKET.

dr does quiz ending: INDIA, DEFEAT CORONA Lakshminarayana K, 2020-07-31 My e-book under the title 'India, Defeat Corona', is a fictional novel. It is aimed at kindling hope and confidence among my readers. We have to draw inspiration from the popular adage that 'every crisis is an opportunity.' We all have to learn to live with the virus. Simple methods like 'social distancing, frequent washing of hands using soap and wearing of masks' can help us in keeping the virus at bay, to a large extent. Our scientists all over the world are burning their midnight oil in finding a suitable vaccine to contain this pandemic, which seems a possibility by the end of this year. We can't halt the progress of our economy, just for the fear of one tiny virus. It's a question of 'lives Vs livelihood'. Stoppage of economic activities can be more disastrous than the pandemic itself! Thanks to our 'corona warriors,' who are working hard to contain the pandemic. Let's salute our farmers, workers, technocrats, bankmen, businessmen and others, who are daring to go ahead, ignoring the threats of the disease. In fact, what can help us in defeating Covid-19, is our 'Positive Mental Attitude.' I am sure that we will win this war of 'pandemic Vs people.'

dr does quiz ending: Religion and Doctor Who Andrew Crome, James F. McGrath, 2013-11-14 Doctor Who has always contained a rich current of religious themes and ideas. In its very first episode it asked how humans rationalize the seemingly supernatural, as two snooping schoolteachers refused to accept that the TARDIS was real. More recently it has toyed with the mystery of Doctor's real name, perhaps an echo of ancient religions and rituals in which knowledge of the secret name of a god, angel or demon was thought to grant a mortal power over the entity. But why does Doctor Who intersect with religion so often, and what do such instances tell us about

the society that produces the show and the viewers who engage with it? The writers of *Religion and Doctor Who: Time and Relative Dimensions in Faith* attempt to answer these questions through an in-depth analysis of the various treatments of religion throughout every era of the show's history. While the majority of chapters focus on the television show *Doctor Who*, the authors also look at audios, novels, and the response of fandom. Their analyses--all written in an accessible but academically thorough style--reveal that examining religion in a long-running series such as *Doctor Who* can contribute to a number of key debates within faith communities and religious history. Most importantly, it provides another way of looking at why *Doctor Who* continues to inspire, to engage, and to excite generations of passionate fans, whatever their position on faith. The contributors are drawn from the UK, the USA, and Australia, and their approaches are similarly diverse. Chapters have been written by film scholars and sociologists; theologians and historians; rhetoricians, philosophers and anthropologists. Some write from the perspective of a particular faith or belief; others write from the perspective of no religious belief. All, however, demonstrate a solid knowledge of and affection for the brilliance of *Doctor Who*.

dr does quiz ending: Go Big Red Michael Babcock, 2015-08-11 *Go Big Red* covers Nebraska football in a way no other publication has, with personality profiles, anecdotes, and original research, as well as questions of fact and trivia, some of which will test even the most devoted and knowledgeable Cornhusker fans. Nebraska has enjoyed thirty-six consecutive winning seasons, made twenty-nine consecutive bowl appearances, and won five national championships. During that time, the Cornhuskers have had just two head coaches, Bob Devaney and Tom Osborne. Without question, this is the golden era of Cornhusker football, and *Go Big Red* is a celebration of that indisputable fact. It is much more than a trivia book—it goes beyond the hefty and comprehensive media guides published each season by the Nebraska Sports Information Office. There is a section devoted to the best of Broderick Thomas, the loquacious outside linebacker. And there are also some things you won't remember, or things you might not have known. Can you name all of the assistant coaches on Osborne's first staff in 1973? Can you list Nebraska's starters for the 1941 Rose Bowl game? Do you know how the Blackshirt tradition began? Devaney was a master storyteller, and the book includes a humorous story or two of his. The program became a haven for walk-ons under Osborne, and the book includes an all-walk-on team. Cornhusker football was king long ago. And this book offers insight into that past glory, achieved by the likes of Jumbo Stiehm, Ed Weir, and Guy Chamberlin. All-American Trev Albert, the Butkus Award winner in 1993, has expressed the meaning of Cornhusker football in the introduction, which is an integral part of the book's experience. Reading *Go Big Red* isn't the same as sitting in Memorial Stadium, awash in red on game day. But it's the next best thing.

dr does quiz ending: On the Air John Dunning, 1998-05-07 Now long out of print, John Dunning's *Tune in Yesterday* was the definitive one-volume reference on old-time radio broadcasting. Now, in *On the Air*, Dunning has completely rethought this classic work, reorganizing the material and doubling its coverage, to provide a richer and more informative account of radio's golden age. Here are some 1,500 radio shows presented in alphabetical order. The great programs of the '30s, '40s, and '50s are all here--Amos 'n' Andy, Fibber McGee and Molly, The Lone Ranger, Major Bowes' Original Amateur Hour, and The March of Time, to name only a few. For each, Dunning provides a complete broadcast history, with the timeslot, the network, and the name of the show's advertisers. He also lists major cast members, announcers, producers, directors, writers, and sound effects people--even the show's theme song. There are also umbrella entries, such as News Broadcasts, which features an engaging essay on radio news, with capsule biographies of major broadcasters, such as Lowell Thomas and Edward R. Murrow. Equally important, Dunning provides a fascinating account of each program, taking us behind the scenes to capture the feel of the performance, such as the ghastly sounds of *Lights Out* (a horror drama where heads rolled and bones crunched), and providing engrossing biographies of the main people involved in the show. A wonderful read for everyone who loves old-time radio, *On the Air* is a must purchase for all radio hobbyists and anyone interested in 20th-century American history. It is an essential reference work for libraries and radio stations.

dr does quiz ending: Extravagant Expectations Paul Hollander, 2011-05-16 The proliferation

of dating websites, printed personals and self-help relationship books reflect the new ways Americans seek close, personal relationships. Exposed to changing and often conflicting values, trends, and fashions—disseminated by popular culture, advertising and assorted experts—Americans face uncertainties about the best ways to meet important emotional and social needs. How do we establish lasting and intimate personal relationships including marriage? In *Extravagant Expectations* Paul Hollander investigates how Americans today pursue romantic relationships, with special reference to the advantages and drawbacks of Internet dating compared to connections made in school, college, and the workplace. By analyzing printed personals, dating websites, and advice offered by pop psychology books, he examines the qualities that people seek in a partner and also assesses the influence of the remaining conventional ideas of romantic love. Hollander suggests that notions of romantic love have changed due to conflicting values and expectations and the impact of pragmatic considerations. Individualism, high expectations, social and geographic mobility, changing sex roles, and the American national character all play a part in this fascinating and finally sobering exploration of men and women to find love and meaning in life.
