**clifton powell menace to society: Black on Black** Celeste A. Fisher, 2006-05-03 Images of

violent black masculinity are not new in American culture, but in the late 1980s and early '90s, the social and economic climate in the country contributed to an unprecedented number of films about ghetto life. And while Hollywood reaped financial gains from these depictions, the rest of the country saw an ever widening opportunity gap between marginalized groups and mainstream society, as well as an increase in juvenile violence. These events added to the existing discomfort of the viewing public with representations of young black males living in urban ghettos. *Black on Black: Urban Youth Films and the Multicultural Audience* tackles the under-examined subject of black, male-focused, coming-of-age films in American society. Of central concern is an analysis of responses made by culturally diverse young adults to selected Hood films of the early 1990s. Grounded in Reader-Response Theory and utilizing qualitative research design and analysis, author Celeste Fisher examines student interpretations of three representative films of the period: *Boyz n the Hood*, *Juice* and *Menace II Society*. This book provides insight into how meaning is made by a multicultural audience in response to a particularly controversial representation of Blackness in American society. Developed to make sense of the violence that accompanied the screenings of some Hood films, this research provides a greater understanding of how such films are interpreted. *Black on Black* is suitable for scholars and students interested in the subject, as well as for anyone interested in film, race, multiculturalism, and identity politics.

**clifton powell menace to society: *Historical Dictionary of African American Cinema*** S. Torriano Berry, Venise T. Berry, 2015-05-07 As early as 1909, African Americans were utilizing the new medium of cinema to catalogue the world around them, using the film camera as a device to capture their lives and their history. The daunting subject of race and ethnicity permeated life in America at the turn of the twentieth century and due to the effect of certain early films, specific television images, and an often-biased news media, it still plagues us today. As new technologies bring the power of the moving image to the masses, African Americans will shoot and edit on laptop computers and share their stories with a global audience via the World Wide Web. These independently produced visions will add to the diverse cache of African American images being displayed on an ever-expanding silver screen. This wide range of stories, topics, views, and genres will finally give the world a glimpse of African American life that has long been ignored and has yet to be seen. This second edition of *Historical Dictionary of African American Cinema* covers its history through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 1400 cross-referenced entries on actors, actresses, movies, producers, organizations, awards, and terminology, this book provides a better understanding of the role African Americans played in film history. **clifton powell menace to society: *Black Directors in Hollywood*** Melvin Donalson, 2003-12-01 Hollywood film directors are some of the world's most powerful storytellers, shaping the fantasies and aspirations of people around the globe. Since the 1960s, African Americans have increasingly joined their ranks, bringing fresh insights to movie characterizations, plots, and themes and depicting areas of African American culture that were previously absent from mainstream films.

Today, black directors are making films in all popular genres, while inventing new ones to speak directly from and to the black experience. This book offers a first comprehensive look at the work of black directors in Hollywood, from pioneers such as Gordon Parks, Melvin Van Peebles, and Ossie Davis to current talents including Spike Lee, John Singleton, Kasi Lemmons, and Carl Franklin. Discussing 67 individuals and over 135 films, Melvin Donalson thoroughly explores how black directors' storytelling skills and film techniques have widened both the thematic focus and visual style of American cinema. Assessing the meanings and messages in their films, he convincingly demonstrates that black directors are balancing Hollywood's demand for box office success with artistic achievement and responsibility to ethnic, cultural, and gender issues.

**clifton powell menace to society: The A to Z of African American Cinema** S. Torriano Berry, Venise T. Berry, 2009-09-02 On 4 July, 1910, in 100-degree heat at an outdoor boxing ring near Reno, Nevada, film cameras recorded-and thousands of fans witnessed-former heavyweight champion Jim Jeffries' reluctant return from retirement to fight Jack Johnson, a black man. After 14 grueling rounds, Johnson knocked out Jeffries and for the first time in history, there was a black heavyweight champion of the world. At least 10 people lost their lives because of Johnson's victory and hundreds more were injured due to white retaliation and wild celebrations in the streets. Public screenings received instantaneous protests and hundreds of cities barred the film from being shown. Congress even passed a law making it a federal offense to transport moving pictures of prizefights across state lines, and thus the most powerful portrayal of a black man ever recorded on film was made virtually invisible. This is but one of the hundreds of films covered in *The A to Z of African American Cinema*, which includes everything from *The Birth of a Nation* to *Crash*. In addition to the films, brief biographies of African American actors and actresses such as Sidney Poitier, James Earl Jones, Halle Berry, Eddie Murphy, Whoopi Goldberg, Denzel Washington, and Jamie Foxx can be found in this reference. Through a chronology, a list of acronyms and abbreviations, an introductory essay, a bibliography, appendixes, black-&-white photos, and hundreds of cross-referenced dictionary entries on actors, actresses, movies, producers, organizations, awards, film credits, and terminology, this book provides a better understanding of the role African Americans played in film history.

They may not even be born and bred on *DAWN OF THE DEAD*. In fact, anyone with a bit of technical savvy (quickly becoming second nature for the born-clicking generation) may be viewing *MYSTICS IN BALI* and *S.S. Lewis, so-called "godfather of gore," carries the same stripes as Alfred Hitchcock, "master of suspense." *SPINEGRINDER* is one man's ambitious, exhaustive and utterly obsessive attempt to make sense of over a century of exploitation and cult cinema, of a sort that most critics won't care to write about. One opinion; 8,000 reviews (or thereabouts).

**clifton powell menace to society: Los Angeles and the Future of Urban Cultures** Raúl Homero Villa, George J. Sánchez, 2005-02-21 This special issue of American Quarterly focuses on Los Angeles as an emblematic site through which the scholarship of American studies can be examined. As a city shaped by eighteenth-century European colonization, nineteenth-century U.S. territorial expansion, and twentieth-century migration, Los Angeles has come to embody both the hopes and fears of Americans looking to the future. It is a city in which the local is deployed in complex practices of identity and community formation within the broader networks of globalization that continue to define and redefine what constitutes America. The articles in this volume address the complexities of the city's social geography across time, particularly since World War II. The collection reflects an exciting variety of cultural studies perspectives and reveals the synergistic possibilities of current Los Angeles studies and American studies in general. American Quarterly includes interdisciplinary scholarship that engages key issues in American studies. Publishing essays that examine American societies and cultures in global and local contexts, the journal contributes to the understanding of the United States, its diversity, and its impact on world politics and culture.

**clifton powell menace to society: Mapping Society** Laura Vaughan, 2018-09-24 From a rare map of yellow fever in eighteenth-century New York, to Charles Booth's famous maps of poverty in nineteenth-century London, an Italian racial zoning map of early twentieth-century Asmara, to a map of wealth disparities in the banlieues of twenty-first-century Paris, Mapping Society traces the evolution of social cartography over the past two centuries. In this richly illustrated book, Laura Vaughan examines maps of ethnic or religious difference, poverty, and health inequalities, demonstrating how they not only serve as historical records of social enquiry, but also constitute inscriptions of social patterns that have been etched deeply on the surface of cities. The book covers themes such as the use of visual rhetoric to change public opinion, the evolution of sociology as an academic practice, changing attitudes to physical disorder, and the complexity of segregation as an urban phenomenon. While the focus is on historical maps, the narrative carries the discussion of the spatial dimensions of social cartography forward to the present day, showing how disciplines such as public health, crime science, and urban planning, chart spatial data in their current practice. Containing examples of space syntax analysis alongside full colour maps and photographs, this volume will appeal to all those interested in the long-term forces that shape how people live in cities.

**clifton powell menace to society:** The Stuff of Science Fiction Gary Westfahl, 2022-09-23 While students and general readers typically cannot relate to esoteric definitions of science fiction, they readily understand the genre as a literature that characteristically deals with subjects such as new inventions, space, robot and aliens. This book looks at science fiction in precisely this manner, with twenty-one chapters that each deal with a subject that is repeatedly addressed in science fiction of recent centuries. Based on a packet of original essays that the author assembled for his classes, the book could serve as a supplemental textbook in science fiction classes, but also contains material of interest to science fiction scholars and others devoted to the genre. In some cases, chapters offer thorough surveys of numerous works involving certain subjects, such as imagined vehicles, journeys beneath the Earth and undersea adventures, discovering intriguing patterns in the ways that various writers developed their ideas. When comprehensive coverage of ubiquitous topics such as robots, aliens and the planet Mars is impossible, chapters focus on major themes referencing selected texts. A conclusion discusses other science fiction subjects that were omitted for various reasons, and a bibliography lists additional resources for the study of science fiction in general and the topics of each chapter.

**clifton powell menace to society:** Race and Labor in Western Copper Philip J. Mellinger, 1995-04 This is the story of immigrant copper workers and their attempts to organize at the turn of the century in Arizona, New Mexico, Nevada, Utah, and El Paso, Texas. These Mexican and European laborers of widely varying backgrounds and languages had little social, economic, or political power. Yet they achieved some surprising successes in their struggles - all in the face of a racist society and the unbridled power of the mine owners. Mellinger discusses towns, mines, camps, companies, and labor unions, but this book is largely about people. In order to reconstruct the lives of those in mining communities, Mellinger has used little-known union and company records, personal interviews with old-time workers and their families, and a variety of regional sources that together have enabled him to reveal a complex and significant pattern of social, economic, and political change in the American West.

**clifton powell menace to society: Nutritionism** Gyorgy Scrinis, 2020-07-16 'Gyorgy Scrinis exposes the folly of the reductionist approach and proposes an alternative food quality paradigm, based on respecting traditional dietary patterns and reducing technological processing. It may offend nutritionists and will upset the food industry, but it could also herald a delicious revolution in our ability to eat well.' - Dr Rosemary Stanton OAM, Nutritionist From the fear of 'bad nutrients' such as fat and cholesterol, to the celebration of supposedly health-enhancing vitamins and omega-3 fats, our understanding of food and health has been dominated by a reductive scientific focus on nutrients. It is on this basis that butter and eggs have been vilified, yet highly processed foods such as margarine have been promoted as being healthier than whole foods. Gyorgy Scrinis argues that this ideology of nutritionism has narrowed and distorted our appreciation of food quality, while promoting nutrition confusion and nutritional anxieties. The food industry exploits these anxieties by nutritionally modifying their food products, and marketing them with nutritional and health claims. Through a fascinating investigation into such issues as the butter versus margarine debate, the battle between low-fat, low-carb, low-calorie and low-GI weight-loss diets, the limitations of dietary guidelines, and the search for the optimal dietary pattern - from Mediterranean and vegetarian to paleo diets - Scrinis builds a revealing history of the scientific, social, and economic factors driving our modern fascination with nutrition, and explores alternative ways of understanding food quality.
