Legal historian Mary Ziegler traces how the anti-abortion movement helped to forge and later upend this alliance. Beginning with the Supreme Court's landmark decision in *Buckley v. Valeo*, right-to-lifers fought to gain power in the GOP by changing how campaign spending--and the First Amendment--work. The anti-abortion movement helped to revolutionize the rules of money in U.S. politics and persuaded conservative voters to fixate on the federal courts. Ultimately, the campaign finance landscape that abortion foes created fueled the GOP's embrace of populism and the rise of Donald Trump. Ziegler offers a surprising new view of the slow drift to extremes in American politics--and explains how it had everything to do with the strange intersection of right-to-life politics and campaign spending.

focus on the family voting guide 2022: How Should Christians Vote? Tony Evans, 2012-05-01 Christians are a large and influential voting block today. But as each governmental election approaches, an increasing polarity occurs within those claiming the Christian faith. This comes as a result of party-voting rather than voting according to Biblical mandates and authority. To refocus correctly, Dr. Tony Evans goes back to the basics and teaches on how God established government as a divine institution whose tasks include promoting the well-being of those within its realm and protection from evil. Scripture trumps all political alliances making the voting decision a critical opportunity for Christians to promote God's Word and His values through whom they elect. In the face of increasing emotions the Christians representing God's kingdom values should communicate His truths in a manner reflective of the King - in a gracious and strategic way. Dr. Evans also looks at the necessary qualities in a good candidate which include intellect, education, competency, skill and spiritual beliefs - whether certain issues are non-negotiables, and how a responsible citizen is to research a candidates' position in order to evaluate it against God's Word.

focus on the family voting guide 2022: Ending Discrimination Against People with Mental and Substance Use Disorders National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Changing Behavioral Health Social Norms, 2016-09-03 Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized

health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. **Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma Change** explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health

in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

focus on the family voting guide 2022: Unseen Sara Hagerty, 2017-08-29 How do we find contentment in God when we feel so hidden? Sara Hagerty unfolds the truths found in the biblical story of Mary of Bethany to discover the scandalous love of God and explore the spiritual richness of being hidden in him. Every heart longs to be seen and understood. Yet most of our lives is unwitnessed. We spend our days working, driving, parenting. We sometimes spend whole seasons feeling unnoticed and unappreciated. In *Unseen*, Sara Hagerty suggests that this is exactly what God intended. He is the only One who truly knows us. He is the only One who understands the value of the unseen in our lives. When this truth seeps into our souls, we realize that only when we hide ourselves in God can we give ourselves to others in true freedom--and know the joy of a deeper relationship with the God who sees us. Our culture applauds what we can produce, what we can show, what we can upload to social media. Only when we give all of ourselves to God--unedited, abandoned, apparently wasteful in its lack of productivity--can we live out who God created us to be. As Hagerty writes, Maybe my seemingly unproductive, looking-up-at-Him life produces awe among the angels. Through an eloquent exploration of both personal and biblical story, Hagerty calls us to offer every unseen minute of our lives to God. God is in the secret places of our lives that no one else witnesses. But we've not been relegated to these places. We've been invited. We may be wasting ourselves in a hidden corner today: The cubicle on the fourth floor. The hospital bedside of an elderly parent. The laundry room. But these are the places God uses to meet us with a radical love. These are the places that produce the kind of unhinged love in us that gives everything at His feet, whether or not anyone else ever proclaims our name, whether or not anyone else ever sees. God's invitation is not just for a season or a day. It is the question of our lives: When no one else applauds

you, when it makes no sense, when you see no results--will you waste your love on Me?

This approach conceptualizes and integrates a range of symptom-level EFT tasks, including tasks aimed at facilitating regulation of emotional distress, as well as tasks that specifically target self-worrying, rumination, perfectionism, and other discrete symptoms. Strategies that target clusters of symptoms, such as two-chair dialogues and self-interruption, are illustrated through richly detailed session transcripts. focus on the family voting guide 2022: Global Health and International Relations Colin McInnes, Kelley Lee, 2013-05-02 The long separation of health and International Relations, as distinct academic fields and policy arenas, has now dramatically changed. Health, concerned with the body, mind and spirit, has traditionally focused on disease and infirmity, whilst International Relations has been dominated by concerns of war, peace and security. Since the 1990s, however, the two fields have increasingly overlapped. How can we explain this shift and what are the implications for the future development of both fields? Colin McInnes and Kelley Lee examine four key intersections between health and International Relations today - foreign policy and health diplomacy, health and the global political economy, global health governance and global health security. The explosion of interest in these subjects has, in large part, been due to real world concerns - disease outbreaks, antibiotic resistance, counterfeit drugs and other risks to human health amid the spread of globalisation. Yet the authors contend that it is also important to understand how global health has been socially constructed, shaped in theory and practice by particular interests and normative frameworks. This groundbreaking book encourages readers to step back from problem-solving to ask how global health is being problematized in the first place, why certain agendas and issue areas are prioritised, and what determines the potential solutions put forth to address them? The palpable struggle to better understand the health risks facing a globalized world, and to strengthen collective action to deal with them effectively, begins - they argue - with a more reflexive and critical approach to this rapidly emerging subject.

We live in an age of winners and losers, where the odds are stacked in favour of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the promise that you can make it if you try. And the consequence is a brew of anger and frustration that has fuelled populist protest, with the triumph of Brexit and election of Donald Trump. Michael J. Sandel argues that to overcome the polarized politics of our time, we must rethink the attitudes toward success and failure that have accompanied globalisation and rising inequality. Sandel highlights the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind. He offers an alternative way of thinking about success - more attentive to the role of luck in human affairs, more conducive to an ethic of humility, and more hospitable to a politics of the common good.

focus on the family voting guide 2022: Succession Planning for Small and Family Businesses William J. Rothwell, Robert K. Prescott, 2022-10-04 Who will lead your organization into the future? Have you created the systems to properly implement required succession transitions? Have you put the financial tools in place to fund the transition? Do you want a plan that connects with your personal and company core values? When do you include timely planning related to strategy and talent issues? What are the appropriate communication strategies for sharing your plan? What legal issues need consideration related to the strategy, financial, and people aspects of succession? So, what is preventing you from starting this effort tomorrow? Small and family businesses are the bedrock of all businesses. More people are employed by small and family-owned businesses than by all multinational companies combined. Yet the research on small and family businesses is bleak: fewer than one-third of small business owners in the United States can afford to retire. Only 40% of small businesses have a workable disaster plan in case of the sudden death or disability of the owner, and only 42% of small businesses in the United States have a succession plan. Fewer than 11% of family-owned businesses make it to the third generation beyond the founder. Lack of succession planning is the second most common reason for small business failure. Many organizations often wonder where to start and what to do. Succession Planning for Small and Family Businesses: Navigating Successful Transitions presents a comprehensive approach to guiding such efforts. Small and family-owned businesses rarely employ first-rate, well-qualified talent in human resources. More typically, business owners must be jacks-of-all-trades and serve as their own accountants, lawyers, business consultants, marketing experts, and HR wizards. Unfortunately, that does not always work well when business owners embark on planning for retirement or business exits. To help business owners avert problems, this book advises on some of the management, tax and financial, legal, and psychological issues that should be considered when planning retirement or other exits from the business. This comprehensive approach is unique when compared to the books, articles, and other literature that currently exist on the market. This book takes on a bold and integrated approach. Relevant research combined with the rich experiences of the authors connects this thorough, evidence-based approach to action-based approaches for the reader.

focus on the family voting guide 2022: Bowling Alone: Revised and Updated Robert D. Putnam, 2020-10-13 Updated to include a new chapter about the influence of social media and the Internet—the 20th anniversary edition of Bowling Alone remains a seminal work of social analysis, and its examination of what happened to our sense of community remains more relevant than ever in today's fractured America. Twenty years ago, Robert D. Putnam made a seemingly simple observation: once we bowled in leagues, usually after work; but no longer. This seemingly small phenomenon symbolized a significant social change that became the basis of the acclaimed bestseller, Bowling Alone, which The Washington Post called "a very important book" and Putnam, "the de Tocqueville of our generation." Bowling Alone surveyed in detail Americans' changing behavior over the decades, showing how we had become increasingly disconnected from family, friends, neighbors, and social structures, whether it's with the PTA, church, clubs, political parties, or bowling leagues. In the revised edition of his classic work, Putnam shows how our shrinking access to the "social capital" that is the reward of communal activity and community sharing still poses a serious threat to our civic and personal health, and how these consequences have a new resonance for our divided country today. He includes critical new material on the pervasive influence of social media and the internet, which has introduced previously unthinkable opportunities for social connection—as well as unprecedented levels of alienation and isolation. At the time of its publication, Putnam's then-groundbreaking work showed how social bonds are the most powerful predictor of life satisfaction, and how the loss of social capital is felt in critical ways, acting as a strong predictor of crime rates and other measures of neighborhood quality of life, and affecting our health in other ways. While the ways in which we connect, or become disconnected, have changed over the decades, his central argument remains as powerful and urgent as ever: mending our frayed social capital is key to preserving the very fabric of our society.

The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to examine the causes, domestic and global, of the current financial and economic crisis in the United States. It was established as part of the Fraud Enforcement and Recovery Act of 2009. focus on the family voting guide 2022: *Make Good the Promises* Kinshasha Holman Conwill, Paul Gardullo, 2021-09-14 The companion volume to the Smithsonian's National Museum of African American History and Culture exhibit, opening in September 2021 With a Foreword by Pulitzer Prize-winning author and historian Eric Foner and a preface by veteran museum director and historian Spencer Crew An incisive and illuminating analysis of the enduring legacy of the post-Civil War period known as Reconstruction—a comprehensive story of Black Americans' struggle for human rights and dignity and the failure of the nation to fulfill its promises of freedom, citizenship, and justice. In the aftermath of the Civil War, millions of free and newly freed African Americans were determined to define themselves as equal citizens in a country without slavery—to own land, build secure families, and educate themselves and their children. Seeking to secure safety and justice, they successfully campaigned for civil and political rights, including the right to vote. Across an expanding America, Black politicians were elected to all levels of government, from city halls to state capitals to Washington, DC. But those gains were short-lived. By the mid-1870s, the federal government stopped enforcing civil rights laws, allowing white supremacists to use suppression and violence to regain power in the Southern states. Black men, women, and children suffered racial terror, segregation, and discrimination that confined them to second-class citizenship, a system known as Jim Crow that endured for decades. More than a century has passed since the

revolutionary political, social, and economic movement known as Reconstruction, yet its profound consequences reverberate in our lives today. *Make Good the Promises* explores five distinct yet intertwined legacies of Reconstruction—Liberation, Violence, Repair, Place, and Belief—to reveal their lasting impact on modern society. It is the story of Frederick Douglass, Frances Ellen Watkins Harper, Hiram Revels, Ida B. Wells, and scores of other Black men and women who reshaped a nation—and of the persistence of white supremacy and the perpetuation of the injustices of slavery continued by other means and codified in state and federal laws. With contributions by leading scholars, and illustrated with 80 images from the exhibition, *Make Good the Promises* shows how Black Lives Matter, #SayHerName, antiracism, and other current movements for repair find inspiration from the lessons of Reconstruction. It touches on questions critical then and now: What is the meaning of freedom and equality? What does it mean to be an American? Powerful and eye-opening, it is a reminder that history is far from past; it lives within each of us and shapes our world and who we are.

focus on the family voting guide 2022: *Health Literacy* Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Health Literacy, 2004-06-29 To maintain their own health and the health of their families and communities, consumers rely heavily on the health information that is available to them. This information is at the core of the partnerships that patients and their families forge with today's complex modern health systems. This information may be provided in a variety of forms — ranging from a discussion between a patient and a health care provider to a health promotion advertisement, a consent form, or one of many other forms of health communication common in our society. Yet millions of Americans cannot understand or act upon this information. To address this problem, the field of health literacy brings together research and practice from diverse fields including education, health services, and social and cultural sciences, and the many organizations whose actions can improve or impede health literacy. *Health Literacy: Prescription to End Confusion* examines the body of knowledge that applies to the field of health literacy, and recommends actions to promote a health literate society. By examining the extent of limited health literacy and the ways to improve it, we can improve the health of individuals and populations.

Perry, 2020 Why do white Protestants in America embrace a president who seems to violate their basic standards of morality? The answer, Andrew Whitehead and Samuel Perry argue, is Christian nationalism, the belief that the United States is -- and should be -- a Christian nation. Knowing someone's stance on Christian nationalism, this book shows, tells us more about his or her political beliefs than race, religion, or political party. Drawing on national survey data and interviews with Americans across the political spectrum, *Taking America Back for God* illustrates the tremendous influence of Christian nationalism on debates about the most contentious issues dominating American public life.

focus on the family voting guide 2022: *The United Nations Convention on the Rights of the Child* Ton Liefwaard, Julia Sloth-Nielsen, 2016-11-01 In 2014 the world's most widely ratified human rights treaty, one specifically for children, reached the milestone of its twenty-fifth anniversary. The

UN Convention on the Rights of the Child was adopted after the fall of the Berlin Wall, and in the time since then it has entered a new century, reshaping laws, policies, institutions and practices across the globe, along with fundamental conceptions of who children are, their rights and entitlements, and society's duties and obligations to them. Yet despite its rapid entry into force worldwide, there are concerns that the Convention remains a high-level paper treaty without the traction on the ground needed to address ever-continuing violations of children's rights. This book, based on papers from the conference '25 Years CRC' held by the Department of Child Law at Leiden University, draws together a rich collection of research and insight by academics, practitioners, NGOs and other specialists to reflect on the lessons of the past 25 years, take stock of how international rights find their way into children's lives at the local level, and explore the frontiers of children's rights for the 25 years ahead.

Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

focus on the family voting guide 2022: The Temporary Assistance for Needy Families (TANF) Block Grant
Gene Falk, 2008 The Temporary Assistance for Needy Families (TANF) block grant provides federal grants to states for a wide range of benefits, services, and activities. It is best known for helping states pay for cash welfare for needy families with children, but it funds a wide array of additional activities. TANF was created in the 1996 welfare reform law (P.L. 104-193). TANF funding and program authority were extended through FY2010 by the Deficit Reduction Act of 2005 (DRA, P.L. 109-171). TANF provides a basic block grant of \$16.5 billion to the 50 states and District of Columbia, and \$0.1 billion to U.S. territories. Additionally, 17 states qualify for supplemental grants that total \$319 million. TANF also requires states to contribute from their own funds at least \$10.4 billion for benefits and services to needy families with children -- this is known as the maintenance-of-effort (MOE) requirement. States may use TANF and MOE funds in any manner reasonably calculated to achieve TANF's statutory purpose. This purpose is to increase state flexibility to achieve four goals: (1) provide assistance to needy families with children so that they can live in their own homes or the homes of relatives; (2) end dependence of needy parents on government benefits through work, job preparation, and marriage; (3) reduce out-of-wedlock pregnancies; and (4) promote the formation and maintenance of two-parent families. Though TANF is a block grant, there are some strings attached to states' use of funds, particularly for families receiving assistance (essentially cash welfare). States must meet TANF work participation standards

or be penalised by a reduction in their block grant. The law sets standards stipulating that at least 50% of all families and 90% of two-parent families must be participating, but these statutory standards are reduced for declines in the cash welfare caseload. (Some families are excluded from the participation rate calculation.) Activities creditable toward meeting these standards are focused on work or are intended to rapidly attach welfare recipients to the workforce; education and training is limited. Federal TANF funds may not be used for a family with an adult that has received assistance for 60 months. This is the five-year time limit on welfare receipt. However, up to 20% of the caseload may be extended beyond the five years for reason of hardship, with hardship defined by the states. Additionally, states may use funds that they must spend to meet the TANF MOE to aid families beyond five years. TANF work participation rules and time limits do not apply to families receiving benefits and services not considered assistance. Child care, transportation aid, state earned income tax credits for working families, activities to reduce out-of-wedlock pregnancies, activities to promote marriage and two-parent families, and activities to help families that have experienced or are at risk of child abuse and neglect are examples of such nonassistance.
