free truck dispatcher training: *Big Rig Business Startup* Roy Evans, 2018-06-29 Big Rig Business Startup How to Start, Run & Grow a Successful Trucking Company After losing my corporate job in 2008, I went through the toughest time of my life. At the time my wife pregnant with our third child, and my monthly unemployment check wasn't enough to cover our house and two car notes. In desperation, I decided to go to a local trucking school and get my CDL. I found my first driving job a week after I got out of school. I still remember my first paycheck was just \$55 shy of what I was making at my corporate desk job. I was hysteric, I was happy, I knew this was my new found life and freedom, and no one was going to take it away from me. Long story short, after two years of working for other companies, I decided to start my own trucking company, and I started out as an owner-operator. In 2013, I decided it was time for me to grow and time for me to get off the road and spend some time with my kids. This was when I entered the second phase of my business life. I started to buy one tractor every three months as I was hiring great drivers that are professional, family oriented and serious about making money. By 2016 I had 12 trucks on the road, and this is also the year when my net earning passed \$350,000 mark. To me, the 350K mark was always a benchmark, why? Because I knew that was the salary of the CEO of the company, I used to work for. Last year, I received a call from a business broker, who asked me for a 10-minute meeting. He had brought an offer from a big trucking company, to buy my company. But I didn't even remotely think about selling my company. Instead, I was talking to the bank and was in the process of finalizing a loan for four new tractors with trailers. Once again, long story short, after I refused their initial offer, they came back with an offer that no reasonable man can refuse, and I consider myself a very reasonable man. The income potential is truly amazing and yes, if you can hire the right people, you will not only see significant growth, high net income but the satisfaction that you don't get from many other jobs and businesses. What I shared in this book, are the steps I went through myself, I wrote from my own experience and shared a step by step process that is easy and simple to follow, and best of all you can get started with very little funding. Here is a Quick View of What I Discussed Inside This Book 5 Factors to Consider Before Starting Your New Trucking Business How to Get CDL, DOT and Carrier Authority Number How to Obtain a Unified Carrier Registration How to Get International Registration Plan tag & Fuel Tax Agreement Decal Filing a BOC-3 Form Obtaining a Carrier Alpha Code (SCAC) Business Plan for Your New Trucking Company Six Legal Business Structures to Choose From How to Get an EIN From IRS A Business Plan That is Specific to Your Trucking Business Finding & Buying the Right Tractors and Rigs How to Find Financing, Grants & Loans for Your Business What and How to Get Business Via the Load Boards Types of Freights You Should Consider Daily Administration and Operation of Your Trucking Business Maintenance of Your Tractors How to Hire and Retain Great Drivers What and How to Reap Benefits of Fuel Cards How to Market and Grow your new Trucking Business And so much More.

free truck dispatcher training: Lou Harrison Bill Alves, Brett Campbell, 2017-04-10 A biography on the legendary gay American composer of contemporary classical music. American composer Lou Harrison (1917–2003) is perhaps best known for challenging the traditional musical establishment along with his contemporaries and close colleagues: composers John Cage, Aaron Copland, Virgil Thomson, and Leonard Bernstein; Living Theater founder, Judith Malina; and choreographer, Merce Cunningham. Today, musicians from Bang on a Can to Björk are indebted to the cultural hybrids Harrison pioneered half a century ago. His explorations of new tonalities at a time when the rest of the avant-garde considered such interests heretical set the stage for minimalism and musical post-modernism. His propulsive rhythms and ground-breaking use of percussion have inspired choreographers from Merce Cunningham to Mark Morris, and he is considered the godfather of the so-called “world music” phenomenon that has invigorated Western music with global sounds over the past two decades. In this biography, authors Bill Alves and Brett Campbell trace Harrison’s life and career from the diverse streets of San Francisco, where he studied with music experimentalist Henry Cowell and Austrian composer Arnold Schoenberg, and where he discovered his love for all things non-traditional (Beat poetry, parties, and men); to the competitive performance industry in New York, where he subsequently launched his career as a composer, conducted Charles Ives’s Third Symphony at Carnegie Hall (winning the elder composer a Pulitzer Prize), and experienced a devastating mental breakdown; to the experimental arts institution of Black Mountain College where he was involved in the first “happenings” with Cage, Cunningham, and others; and finally, back to California, where he would become a strong voice in human rights and environmental campaigns and compose some of the most eclectic pieces of his career. “Lou Harrison’s avuncular personality and tuneful music coaxed affectionate regard from all who knew him, and that affection is evident on every page of Alves and Campbell’s new biography. Eminently readable, it puts Harrison at the center of American music: he knew everyone important and was in touch with everybody, from mentors like Henry Cowell and Arnold Schoenberg and Charles Ives and Harry Partch and Virgil Thomson to peers like John Cage to students like Janice Giteck and Paul Dresher. He was larger than life in person, and now he is larger than life in history as well.” —Kyle Gann, author of Charles Ives’s Concord: Essays After a Sonata

free truck dispatcher training: *Uncommon Carriers* John McPhee, 2006-05-16 What John McPhee's books all have in common is that they are about real people in real places. Here, at his adventurous best, he is out and about with people who work in freight transportation. Over the past eight years, John McPhee has spent considerable time in the company of people who work in freight transportation. *Uncommon Carriers* is his sketchbook of them and of his journeys with them. He rides from Atlanta to Tacoma alongside Don Ainsworth, owner and operator of a sixty-five-foot, eighteen-wheel chemical tanker carrying hazmats. McPhee attends ship-handling school on a pond in the foothills of the French Alps, where, for a tuition of \$15,000 a week, skippers of the largest ocean ships refine their capabilities in twenty-foot scale models. He goes up the tight-assed Illinois River on a towboat pushing a triple string of barges, the overall vessel being a good deal longer than the Titanic. And he travels by canoe up the canal-and-lock commercial waterways traveled by Henry David Thoreau and his brother, John, in a homemade skiff in 1839. *Uncommon Carriers* is classic work by McPhee, in prose distinguished, as always, by its author's warm humor, keen insight, and rich sense of human character.
