**from the beyond emma bugg: *The Toaster Project*** Thomas Thwaites, 2012-03-20 Hello, my name is Thomas Thwaites, and I have made a toaster. So begins *The Toaster Project*, the author's nine-month-long journey from his local appliance store to remote mines in the UK to his mother's backyard, where he creates a crude foundry. Along the way, he learns that an ordinary toaster is made up of 404 separate parts, that the best way to smelt metal at home is by using a method found in a fifteenth-century treatise, and that plastic is almost impossible to make from scratch. In the end, Thwaites's homemade toaster—a haunting and strangely beautiful object—cost 250 times more than the toaster he bought at the store and involved close to two thousand miles of travel to some of Britain's remotest locations. *The Toaster Project* may seem foolish, even insane. Yet, Thwaites's quixotic tale, told with self-deprecating wit, helps us reflect on the costs and perils of our cheap consumer culture, and in so doing reveals much about the organization of the modern world.

**from the beyond emma bugg: *Midnight Tides*** Steven Erikson, 2007-08-28 After decades of internecine warfare, the tribes of the Tiste Edur have at last united under the Warlock King of the Hiroth. There is peace—but it has been exacted at a terrible price: a pact made with a hidden power whose motives are at best suspect, at worst, deadly. To the south, the expansionist kingdom of Lether, eager to fulfill its long-prophesized renaissance as an Empire reborn, has enslaved all its less-civilized neighbors with rapacious hunger. All, that is, save one—the Tiste Edur. And it must be only a matter of time before they too fall—either beneath the suffocating weight of gold, or by slaughter at the edge of a sword. Or so destiny has decreed. Yet as the two sides gather for a pivotal treaty neither truly wants, ancient forces are awakening. For the impending struggle between these two peoples is but a pale reflection of a far more profound, primal battle—a confrontation with the still-raw wound of an old betrayal and the craving for revenge at its seething heart. ANNA SMITH SPARK, author of *The Court of Broken Knives* The thrilling opening chapter in an epic new fantasy from the author of *The Malazan Book of the Fallen*... Many years have passed since three Teblor warriors brought carnage and chaos to Silver Lake. Now the tribes of the north no longer venture into the southlands. The town has recovered and yet the legacy remains. Indeed, one of the three, Karsa Orlong, is now revered as a god, albeit an indifferent one. In truth, many new religions have emerged and been embraced across the Malazan world. There are those who worship Coltaine, the Black-Winged Lord, and the cult of Iskar Jarak, Guardian of the Dead, is popular among the Empire's soldiery. Responding to reports of a growing unease among the tribes beyond the border, a legion of Malazan marines marches towards Silver Lake. They aren't quite sure what they're going to be facing, but, while the Malazan military has evolved and these are not the marines of old, one thing hasn't changed: they'll handle whatever comes at them. Or die trying. And in those high mountains, a new warleader has risen amongst the Teblor. Scarred by the deeds of Karsa Orlong, he intends to

confront his god even if he has to cut a bloody swathe through the Malazan Empire to do so. But further north, a new threat has emerged and now it seems it is the Teblor who are running out of time. Another long-feared migration is about to begin and this time it won't just be three warriors. No, this time tens of thousands are poised to pour into the lands to the south. And in their way, a single company of Malazan marines . . . It seems the past is about to revisit Silver Lake, and that is never a good thing . . .

**from the beyond emma bugg:** *Wuthering Heights* Emily Bronte, 2020-09-28 *Wuthering Heights* is the name of Mr. Heathcliff's dwelling. 'Wuthering' being a significant provincial adjective, descriptive of the atmospheric tumult to which its station is exposed in stormy weather. Pure, bracing ventilation they must have up there at all times, indeed: one may guess the power of the north wind blowing over the edge, by the excessive slant of a few stunted firs at the end of the house; and by a range of gaunt thorns all stretching their limbs one way, as if craving alms of the sun. Happily, the architect had foresight to build it strong: the narrow windows are deeply set in the wall, and the corners defended with large jutting stones. Before passing the threshold, I paused to admire a quantity of grotesque carving lavished over the front, and especially about the principal door; above which, among a wilderness of crumbling griffins and shameless little boys, I detected the date '1500,' and the name 'Hareton Earnshaw.' I would have made a few comments, and requested a short history of the place from the surly owner; but his attitude at the door appeared to demand my speedy entrance, or complete departure, and I had no desire to aggravate his impatience previous to inspecting the penetralium. One stop brought us into the family sitting-room, without any introductory lobby or passage: they call it here 'the house' pre-eminently. It includes kitchen and parlour, generally; but I believe at *Wuthering Heights* the kitchen is forced to retreat altogether into another quarter: at least I distinguished a chatter of tongues, and a clatter of culinary utensils, deep within; and I observed no signs of roasting, boiling, or baking, about the huge fireplace; nor any glitter of copper saucepans and tin cullenders on the walls. One end, indeed, reflected splendidly both light and heat from ranks of immense pewter dishes, interspersed with silver jugs and tankards, towering row after row, on a vast oak dresser, to the very roof. The latter had never been under-drawn: its entire anatomy lay bare to an inquiring eye, except where a frame of wood laden with oatcakes and clusters of legs of beef, mutton, and ham, concealed it. Above the chimney were sundry villainous old guns, and a couple of horse-pistols: and, by way of ornament, three gaudily-painted canisters disposed along its ledge. The floor was of smooth, white stone; the chairs, high-backed, primitive structures, painted green: one or two heavy black ones lurking in the shade. In an arch under the dresser reposed a huge, liver-coloured bitch pointer, surrounded by a swarm of squealing puppies; and other dogs haunted other recesses.

long-anticipated biography of Robert Redford. Among the most widely admired Hollywood stars of his generation, Redford has appeared onstage and on-screen, in front of and behind the camera, earning Academy, Golden Globe, and a multitude of other awards and nominations for acting, directing, and producing, and for his contributions to the arts. His Sundance Film Festival transformed the world of filmmaking; his films defined a generation. America has come to know him as the Sundance Kid, Bob Woodward, Johnny Hooker, Jay Gatsby, and Roy Hobbs. But only now, with this revelatory biography, do we see the surprising and complex man beneath the Hollywood façade. From Redford's personal papers—journals, script notes, correspondence—and hundreds of hours of taped interviews, Michael Feeney Callan brings the legendary star into focus. Here is his scattered family background and restless childhood, his rocky start in acting, the death of his son, his star-making relationship with director Sydney Pollack, the creation of Sundance, his political activism, his artistic successes and failures, his friendships and romances. This is a candid, surprising portrait of a man whose iconic roles on-screen (Butch Cassidy and the Sundance Kid, All the President's Men, The Natural) and directorial brilliance (Ordinary People, Quiz Show) have both defined and obscured one of the most celebrated, and, until now, least understood, public figures of our time.

The artist Mark Hearld finds his inspiration in the flora and fauna of the British countryside: a blue-eyed jay perched on an oak branch; two hares enjoying the spoils of an allotment; a mute swan standing at the frozen water's edge; and a sleek red fox prowling the fields. Hearld admires such twentieth-century artists as Edward Bawden, John Piper, Eric Ravilious and Enid Marx, and, like them, he chooses to work in a range of media - paint, print, collage, textiles and ceramics. The works are grouped into nature-related themes introduced by Hearld, who narrates the story behind some of his creations and discusses his influences. He explains his particular love of collage, which he favours for its graphic quality and potential for strong composition. Art historian Simon Martin contributes an essay on Hearld's place in the English popular-art tradition, and also meets Hearld in his museum-like home to explore the artist's passion for collecting objects, his working methods and his startling ability to view the wonders of the natural world as if through a child's eyes.

The editors explore clinical governance issues, common causes of as well as ways to avoid litigation. The UK is experiencing a dramatic increase in medico-legal claims. The 4 main reasons for litigation are: accountability, the need for an explanation, concern with standards of care and compensation.

However the decision to take legal action is determined not only by the original injury, but failure to provide information, an explanation and an apology. Insensitive handling of an injury and poor communication after the original incident increases the risk of litigation and erodes the patient-doctor relationship. Doctors almost never deliberately cause harm to patients, however increasingly claims are being defended successfully. This book is invaluable to clinicians and lawyers alike and raises awareness of how to avoid facing clinical negligence claims in our day to day practice.

**from the beyond emma bugg:** *British Romanticism and Peace* John Bugg, 2022 This is the first book to bring perspectives from the interdisciplinary field of Peace Studies to bear on the writing of the Romantic period. Particularly significant is that field's attention not only to the work of anti-war protest, but more purposefully to considerations of how peace can actively be fostered, established, and sustained. Bravely resisting discourses of military propaganda, writers such as Amelia Opie,

Helen Maria Williams, William Wordsworth, William Cobbett, John Keats, and Jane Austen embarked on the challenging and urgent rhetorical work of imagining--and inspiring others to imagine--the possibility of peace. The writers formulate a peace imaginary in various registers. Sometimes this means identifying and eschewing traditional militaristic tropes in order to craft alternative images for a patriotism compatible with peace. Other times it means turning away from xenophobic discourse to write about relations with other nations in terms other than those of conflict. If historically informed literary criticism has illustrated the importance of writing about war during the Romantic period, this volume invites readers to redirect critical attention to move beyond discourses of war, and to recognize the era's complex and vibrant writing about and for peace.

It's a conflicted time in Kurald Galain, the realm of Darkness, where Mother Dark reigns. But this ancient land was once home to many a power... and even death is not quite eternal. The commoners' great hero, Vatha Urusander, is being promoted by his followers to take Mother Dark's hand in marriage, but her Consort, Lord Draconus, stands in the way of such ambitions. The impending clash sends fissures throughout the realm, and as the rumors of civil war burn through the masses, an ancient power emerges from the long dead seas. Caught in the middle of it all are the First Sons of Darkness, Anomander, Andarist, and Silchas Ruin of the Purake Hold... Steven Erikson entered the pantheon of great fantasy writers with his debut *Gardens of the Moon*. **from the beyond emma bugg:** *Crack'd Pot Trail* Steven Erikson, 2011-09-13 It is an undeniable truth: give evil a name and everyone's happy. Give it two names and...why, they're even happier. Intrepid necromancers Bauchelain and Korbal Broach, scourges of civilization, raisers of the dead, reapers of the souls of the living, devourers of hope, betrayers of faith, slayers of the innocent, and modest personifications of evil, have a lot to answer for and answer they will. Known as the Nehemoth, they are pursued by countless self-professed defenders of decency, sanity, and civilization. After all, since when does evil thrive unchallenged? Well, often—but not this time. Hot on their heels are the Nehemothanai, avowed hunters of Bauchelain and Korbal Broach. In the company of a gaggle of artists and pilgrims, stalwart Mortal Sword Tulgord Vise, pious Well Knight Arpo Relent, stern Huntsman Steck Marynd, and three of the redoubtable Chanter brothers (and their lone sister) find themselves faced with the cruelest of choices. The legendary Crack'd Pot Trail, a stretch of harsh wasteland between the Gates of Nowhere and the Shrine of the Indifferent God, has become a tortured path of deprivation. Will honor, moral probity, and virtue prove champions in the face of brutal necessity? No, of course not. Don't be silly. **from the beyond emma bugg:** *The pollination services of forests* Krishnan, S., Wiederkehr Guerra, G., Bertrand, D., Wertz-Kanounnikoff, S. and Kettle, C.J., 2020-06-01 Most flowering plants, including wild species and many food crops, are pollinated by animals and are vital, therefore, for biological production and the maintenance of biodiversity. Pollinators benefit from diverse natural habitats for forage and nesting, especially when these are limited in plant production systems. Landscape and forest management practices can help ensure the continued availability of pollinators and thereby increase resilience and the productivity of forestry and agriculture. The extent of forests and other natural habitats in a landscape plays a role in determining the species composition of pollinators. Agricultural landscapes adjoining fragmented forests and natural areas benefit from pollinator services, and animal-pollinated crops therefore achieve higher fruit set. Forest management practices can have significant effects on pollinator abundance and diversity. They affect forest variables such as structure, species composition, soil dynamics, hydrology and light availability, all of which can affect pollinator species composition and diversity and plant-pollinator networks. Indigenous and local knowledge can contribute to the conservation of pollinators through traditional management practices. This working paper, which is aimed at forest practitioners, landscape planners and land-use decision-makers, reviews published literature on the impacts of forest and landscape management practices on pollinators. It also addresses the implications of climate change, collates 36 case studies, and makes recommendation on measures for maintaining pollinator diversity and abundance in forests and landscapes

Now it is a crumbling apartment block, stranded on a traffic island and peopled with eccentrics. Alice Orme never stirs from her bed, her husband lives in his old armchair, and Francis, their son, practises his own art of stillness as a human statue in the centre of the decaying city. He lives by his Law of White Gloves, never touching anything without their protection, and collects items for his secret exhibition - items stolen, not because of any monetary worth, but because they are treasured by the owners. This careful routine is shaken by the arrival of a new resident, Anna Tap, half blind and vulnerable, but with a strange gift for inspiring trust. As the other residents gradually open their hearts to her, Francis realises he must act before she forces him to confront his own past, and before she finds out about the mysterious final object in his exhibition. But as the currents of memory and desire swirl within Observatory Mansions' crumbling walls, it seems the sinister Porter has plans of his own... Edward

Carey's debut is a novel of immense originality - a strangely haunting landscape occupied by compelling and unforgettable characters.

**from the beyond emma bugg:** Understanding How We Learn Yana Weinstein, Megan Sumeracki, Oliver Caviglioli, 2018-08-22 Educational practice does not, for the most part, rely on research findings. Instead, there's a preference for relying on our intuitions about what's best for learning. But relying on intuition may be a bad idea for teachers and learners alike. This accessible guide helps teachers to integrate effective, research-backed strategies for learning into their classroom practice. The book explores exactly what constitutes good evidence for effective learning and teaching strategies, how to make evidence-based judgments instead of relying on intuition, and how to apply findings from cognitive psychology directly to the classroom. Including real-life examples and case studies, FAQs, and a wealth of engaging illustrations to explain complex concepts and emphasize key points, the book is divided into four parts: Evidence-based education and the science of learning Basics of human cognitive processes Strategies for effective learning Tips for students, teachers, and parents. Written by The Learning Scientists and fully illustrated by Oliver Caviglioli, *Understanding How We Learn* is a rejuvenating and fresh examination of cognitive psychology's application to education. This is an essential read for all teachers and educational practitioners, designed to convey the concepts of research to the reality of a teacher's classroom.

**from the beyond emma bugg:** *The End of Physiotherapy* David A. Nicholls, 2017-07-31 Physiotherapy is arriving at a critical point in its history. Since World War I, physiotherapy has been one of the largest allied health professions and the established provider of orthodox physical rehabilitation. But ageing populations of increasingly chronically ill people, a growing scepticism towards biomedicine and the changing economy of healthcare threaten physiotherapy's long-held status. Paradoxically, physiotherapy's affinity for treating the 'body-as-machine' has resulted in an almost complete inability to identify the roots of the profession's present problems, or define possible ways forward. Physiotherapists need to engage in critically informed theoretical discussion about the profession's past, present and future - to explore their practice from economic, philosophical, political and sociological perspectives. *The End of Physiotherapy* aims to explain how physiotherapy has arrived at this critical point in its history, and to point to a new future for the profession. The book draws on critical analyses of the historical and social conditions that have made present-day physiotherapy possible. Nicholls examines some of the key discourses that have had a positive impact on the profession in the past, but now threaten to derail it. This book makes it possible for physiotherapists to think otherwise about their profession and their day-to-day practice. It will be essential reading for scholars and students of physiotherapy, interprofessional and community rehabilitation, as well as appealing to those working in medical sociology, the medical humanities, medical history and health care policy.

**from the beyond emma bugg:** *Jane Austen and the Victorian Heroine* Cheryl A. Wilson, 2017-09-05 This book uses the figure of the Victorian heroine as a lens through which to examine Jane Austen's presence in Victorian critical and popular writings. Aimed at Victorianist readers and scholars, the book focuses on the ways in which Austen was constructed in fiction, criticism, and biography over the course of the nineteenth century. For the Victorians, Austen became a kind of cultural shorthand, representing a distant, yet not too-distant, historical past that the Victorians both drew on and defined themselves against with regard to such topics as gender, literature, and national identity. Austen influenced the development of the Victorian literary heroine, and when cast as a heroine herself, was deployed in debates about the responsibilities of the novelist and the ability of fiction to shape social and cultural norms. Thus, the study is as much, if not more, about the Victorians than it is about Jane Austen.

\*\*\*\* It was once a land ravaged by war, minor city states, baronies and principates fighting for supremacy. But when the rival cities of Tali and Quon formed an alliance, Quon Tali came into being. However that was generations ago, that dynasty has collapsed and the regional powers are now clawing at each others throats once more. But at the heart of Quon Tali lies the powerful city state of Li Heng which has for centuries enjoyed relative stability under the guidance of the powerful sorceress known as the Protectress. She is not someone likely to tolerate the arrival of two particular young men into her domain: one is determined to prove he is the most skilled assassin of his age; the other is his quarry - a Dal Hon mage who is proving annoyingly difficult to kill. And now, under a new and ambitious king, the forces of Itko Kan are marching on Li Heng from the south. His own assassins, the Nightblades, have been sent ahead into the city, and rumours abound that he has inhuman, nightmarish forces at his command. So as shadows and mistrust swirl and monstrous beasts run rampage through Li Heng's streets, it seems chaos is come - but in chaos, as a certain young Dal Hon mage would say, there is opportunity . . .
