islander cool math games: The Shame Machine Cathy O'Neil, 2022-03-22 A TIMES BOOK OF THE YEAR Shame is being weaponized by governments and corporations to attack the most vulnerable. It's time to fight back Shame is a powerful and sometimes useful tool. When we publicly shame corrupt politicians, abusive celebrities, or predatory corporations, we reinforce values of fairness and justice. But as best-selling author Cathy O'Neil argues in this revelatory book, shaming has taken a new and dangerous turn. It is increasingly being weaponized -- used as a way to shift responsibility for social problems from institutions to individuals. Shaming children for not being able to afford school lunches or adults for not being able to find work lets us off the hook as a society. After all, why pay higher taxes to fund programmes for people who are fundamentally unworthy? O'Neil explores the machinery behind all this shame, showing how governments, corporations and the healthcare system capitalize on it. There are damning stories of rehab clinics, reentry programs, drug and diet companies, and social media platforms -- all of which profit from 'punching down' on the vulnerable. Woven throughout The Shame Machine is the story of O'Neil's own struggle with body image and her recent weight-loss surgery, which awakened her to the systematic shaming of fat people seeking medical care. With clarity and nuance, O'Neil dissects the relationship between shame and power. Whom does the system serve? How do current incentive structures perpetuate the shaming cycle? And, most important, how can we all fight back?

If the millions of fans who flocked to the blockbuster films Borat and Talladega Nights tuned in to Sacha Baron Cohen's interviews on late night TV hoping to see the man behind the characters, they were sure to be disappointed. Who exactly is this Sacha Baron Cohen, who has everyone from TV personalities to the government of Kazakhstan all riled up? Did he fool all the politicians and luminaries who made such idiots of themselves on Da Ali G Show or did it just look like it? Was it the RV-driving Southern good ole frat boys in Borat—Cultural Learnings of America for Make Benefit Glorious Nation of Kazakhstan who got taken for a ride or were their on-camera remarks fair game? And how did he get a fiancée as foxy as Isla Fisher, the babe from Wedding Crashers? Tracing his roots as the soft-spoken son of an English clothier, biographer Tracy follows Cohen's path to Cambridge, where he ditched the idea of pursuing a Ph.D. for an infinitely trickier comedy career. As we wait to see just what Cohen will come up with next, Tracy gets to the man behind the characters—and details the outrageous moves Cohen has made in character as the boorish English hip-hop journalist Ali G, the tender and tactless Kazakh journalist Borat Sagdiyev, and more

islander cool math games: Collapse Jared Diamond, 2013-03-21 From the author of Guns, Germs and Steel, Jared Diamond's *Collapse: How Societies Choose to Fail or Survive* is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's *Collapse* uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's *Collapse* also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

islander cool math games: *Talking to Strangers* Malcolm Gladwell, 2019-09-10 Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? *Talking to Strangers* is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

islander cool math games: *The Cactus League* Emily Nemens, 2020-02-04 Named a Best Book of 2020 by NPR and Lit Hub. A Los Angeles Times Bestseller. A New York Times Book Review Editors' Choice In *The Cactus League* [Emily Nemens] provides her readers with what amounts to a miniature, self-enclosed world that is funny and poignant and lovingly observed. --Charles McGrath, The New York Times Book Review An explosive, character-driven odyssey through the world of baseball Jason Goodyear is the star outfielder for the Los Angeles Lions, stationed with the rest of his team in the punishingly hot Arizona desert for their annual spring training. Handsome, famous, and talented, Goodyear is nonetheless coming apart at the seams. And the coaches, writers, wives, girlfriends, petty criminals, and diehard fans following his every move are eager to find out why—as they hide secrets of their own. Humming with the energy of a ballpark before the first pitch, Emily Nemens's *The Cactus League* unravels the tightly connected web of people behind a seemingly linear game. Narrated by a sportscaster, Goodyear's story is interspersed with tales of Michael Taylor, a batting coach trying to stay relevant; Tamara Rowland, a resourceful spring-training paramour, looking for one last catch; Herb Allison, a legendary sports agent grappling with his decline; and a plethora of other richly drawn characters, all striving to be seen as the season approaches. It's a journey that, like the Arizona desert, brims with both possibility and destruction. Anchored by an expert knowledge of baseball's inner workings, Emily Nemens's *The Cactus League* is a propulsive and deeply human debut that captures a strange desert world that is both exciting and unforgiving, where the most crucial games are the ones played off the field.

islander cool math games: *The Tree and the Canoe* Joël Bonnemaïson, 1994-01-01 This personal observation of Tanna, an island in the southern part of the Vanuatu archipelago, presents an extraordinary case study of cultural resistance. Based on interviews, myths and stories collected in the field, and archival research, *The Tree and the Canoe* analyzes the resilience of the people of Tanna, who, when faced with an intense form of cultural contact that threatened to engulf them, liberated themselves by re-creating, and sometimes reinventing, their own kastom. Following a lengthy history of Tanna from European contact, the author discusses in detail original creation myths and how Tanna people revived them in response to changes brought by missionaries and foreign governments. The final chapters of the book deal with the violent opposition of part of the island population to the newly established National Unity government.

islander cool math games: Flat Water Tuesday Ron Irwin, 2013-06-04 The son of a working-class cabinet maker, Rob Carrey arrives on the prestigious Fenton School's campus with a scholarship to row...and a chip on his shoulder. Generations of austere Fenton men have led the four-man rowing team, commonly known as the God Four, to countless victories—but none more important or renowned than the annual Tuesday afternoon race in April against their rival boarding school, Warwick. Before boats can be launched, Rob must complete months of grueling preparation driven by their captain Connor Payne's vicious competitive nature. Payne is a young man so plagued by family pressure and unwillingness to lose that the lines between dedication and obsession are increasingly blurred. As the Warwick race nears, the stakes steadfastly rise, and tempers and lusts culminate until, finally, no one can prevent the horrible tragedy that ensues. Now, fifteen years later, Rob is an accomplished documentary filmmaker. Returning home from a recent shoot in Africa, he arrives in New York City to clear out his shared apartment and end his heartbreaking relationship with his film editor and girlfriend, Carolyn. But when a phone call from one of the God Four compels him to attend the fifteen-year reunion at Fenton, Rob sees the invitation as an opportunity to confront the past and perhaps even steer his own life in a new direction. Ron Irwin's *Flat Water Tuesday* shares in the grand tradition of sagas about athletic young men on the brink of greatness, who either embrace their talent or are devastatingly consumed by it. As much about the art of rowing as it is a novel of finding oneself, this is a memorable and deeply moving testament to what it means to train and fight for both love and victory, in sport and in life.

After a disastrous summer spent at her family's home on Cape Cod when she is seventeen, Ann Gordon is very happy to never visit Wellfleet again. If only she'd stayed in Wisconsin, she might never have met Anthony Shaw, and she would have held onto the future she'd so carefully planned for herself. Instead, Ann ends up harboring a devastating secret that strains her relationship with her parents, sends her sister Poppy to every corner of the world chasing waves (and her next fling), and leaves her adopted brother Michael estranged from the family. islander cool math games: Legacy Nora Roberts, 2022-05-03 #1 New York Times bestselling author Nora Roberts presents *Legacy*, a new novel of a mother and a daughter, of ambition and romance, and of a traumatic past reawakened by a terrifying threat... Adrian Rizzo was seven when she met her father for the first time. That was the day he nearly killed her—before her mother, Lina, stepped in. Soon after, Adrian was dropped off at her grandparents' house in Maryland, where she spent a long summer drinking lemonade, playing with dogs, making a new best friend—and developing the stirrings of a crush on her friend's ten-year-old brother. Lina, meanwhile, traveled the country promoting her fitness brand and turning it into a billion-dollar business. There was no point in dwelling on the past. A decade later, Adrian has created her own line of yoga and workout videos, following in Lina's footsteps but intent on maintaining creative control. And she's just as cool-headed and ambitious as her mother. They aren't close, but they're cordial—as long as neither crosses the other. But while Lina dismisses the death threats that Adrian starts getting as a routine part of her daughter's growing celebrity, Adrian can't help but find the vicious rhymes unsettling. Year after year, they keep arriving—the postmarks changing, but the menacing tone the same. They continue after she returns to Maryland and becomes reacquainted with Raylan, her childhood crush, all grown up and as gorgeously green-eyed as ever. Sometimes it even seems like the terrifying messages are indeed routine, like nothing will come of them. Until the murders start, and the escalation begins...

islander cool math games: Numeracy in Authentic Contexts Maura Sellars, 2017-10-25 This book is based on the notion that there are many ways in which mathematics learning can be achieved for students and that not all of them are focused on the mathematics classroom. It explores the foundational numeracy principles of the non-mathematical subject areas and aligns these to the Australian numeracy-learning continuum. It demonstrates, in detail, the extent to which numeracy competencies underpin successful learning in all the subject areas of the curricula. It validates a focus of developing numeracy competencies through learning in the arts, science and other discipline areas with which school students to engage with in order develop holistically, but which are not subjected to national assessment practices. It is developed around the notion of 'praxis', putting theory into practice in order to respond to the urgent need for students to be supported in their efforts to increase their numeracy capabilities in a world where extensive amounts of new information are often presented in graphical or data based formats. Additionally, it offers perspectives on developing all students' capacities to become numerate in school contexts and

presents inclusive, differentiated lesson examples as an alternative way of exploring numeracy in the context of teaching and learning in real-world classroom contexts.
