julio gonzales organic chemistry tutor: Minds Wide Shut Gary Saul Morson, 2023-01-31 A timely exploration of intellectual dogmatism in politics, economics, religion, and literature—and what can be done to fight it Polarization may be pushing democracy to the breaking point. But few have explored the larger, interconnected forces that have set the stage for this crisis: namely, a rise in styles of thought, across a range of fields, that literary scholar Gary Saul Morson and economist Morton Schapiro call “fundamentalist.” In *Minds Wide Shut*, Morson and Schapiro examine how rigid adherence to ideological thinking has altered politics, economics, religion, and literature in ways that are mutually reinforcing and antithetical to the open-mindedness and readiness to compromise that animate democracy. In response, they propose alternatives that would again make serious dialogue possible. Fundamentalist thinking, Morson and Schapiro argue, is not limited to any one camp. It flourishes across the political spectrum, giving rise to dueling monologues of shouting and abuse between those who are certain that they can't be wrong, that truth and justice are all on their side, and that there is nothing to learn from their opponents, who must be evil or deluded. But things don't have to be this way. Drawing on thinkers and writers from across the humanities and social sciences, Morson and Schapiro show how we might begin to return to meaningful dialogue through case-based reasoning, objective analyses, lessons drawn from literature, and more. The result is a powerful invitation to leave behind simplification, rigidity, and extremism—and to move toward a future of greater open-mindedness, moderation, and, perhaps, even wisdom.

julio gonzales organic chemistry tutor: Imagining Development Paul Gootenberg, 1993 Gootenberg has mined a large number of periodicals, pamphlets, and nineteenth-century monographs to unearth currents of thought that were more perceptive and developmentalist than conventional wisdom would have expected. He shows their organic connection to their times. The prose is clear, sharp, jocular, and the organization masterful. He interweaves political background with economic doctrine in precisely the right way. This is a model for the history of economic ideas.--Steven Topik, Associate Professor, University of California, Irvine Gootenberg writes gracefully; he turns phrases with style and wit. I can't think of any other historian who has gained such a firm understanding of nineteenth-century Peru. This book will stir up interest not just for Peruvianists but for anybody seriously interested in Latin America's policy options today.--Shane Hunt, Boston University

julio gonzales organic chemistry tutor: Managing for Mission Jack Peterson, 2011-12-28 Managing for Mission lays out the fundamentals of leading a faith-based school to mission excellence. 2018-01-23 A New York Times Bestseller! An extraordinary look at what it means to grow old and a heartening guide to well-being, *Happiness Is a Choice You Make* weaves together the stories and wisdom of six New Yorkers who number among the “oldest old”— those eighty-five and up. In 2015, when the award-winning journalist John Leland set out on behalf of The New York Times to meet members of America’s fastest-growing age group, he anticipated learning of challenges, of loneliness, and of the deterioration of body, mind, and quality of life. But the elders he met took him in an entirely different direction. Despite disparate backgrounds and circumstances, they each lived with a surprising lightness and contentment. The reality Leland encountered upended contemporary notions of aging, revealing the late stages of life as unexpectedly rich and the elderly as incomparably wise. *Happiness Is a Choice You Make* is an enduring collection of lessons that emphasizes, above all, the extraordinary influence we wield over the quality of our lives. With humility, heart, and wit, Leland has crafted a sophisticated and necessary reflection on how to “live better”—informed by those who have mastered the art.

julio gonzales organic chemistry tutor: *Confronting the Shadow Education System* Mark Bray, International Institute for Educational Planning, 2009 This book focuses on the so-called shadow education system of private supplementary tutoring. In parts of East Asia it has long existed on a large scale and it is now becoming increasingly evident in other parts of Asia and in Africa, Europe and North America. Pupils commonly receive fee-free education in public schools and then at the end of the day and/or during week-ends and vacations supplementary tutoring in the same subjects on a fee-paying basis. Supplementary private tutoring can have positive dimensions. It helps students to cover the curriculum, provides a structured occupation for pupils outside school hours, and provides incomes for the tutors. However, tutoring may also have negative dimensions. If left to market forces, tutoring is likely to maintain and increase social inequalities, and it can create excessive pressure for young people who have inadequate time for non-academic activities. Especially problematic are situations in which school teachers provide extra tutoring in exchange for fees from their regular pupils. This book begins by surveying the scale, nature and implications of the shadow education system in a range of settings. It then identifies possible government responses to

the phenomenon and encourages a proactive approach to designing appropriate policies.
