**important speeches of the 21st century: The Infinite Game** Simon Sinek, 2019-10-15 From the New York Times bestselling author of Start With Why and Leaders Eat Last, a bold framework for leadership in today's ever-changing world. How do we win a game that has no end? Finite games, like football or chess, have known players, fixed rules and a clear endpoint. The winners and losers are easily identified. Infinite games, games with no finish line, like business or politics, or life itself, have players who come and go. The rules of an infinite game are changeable while infinite games have no defined endpoint. There are no winners or losers—only ahead and behind. The question is, how do we play to succeed in the game we're in? In this revelatory new book, Simon Sinek offers a

framework for leading with an infinite mindset. On one hand, none of us can resist the fleeting thrills of a promotion earned or a tournament won, yet these rewards fade quickly. In pursuit of a Just Cause, we will commit to a vision of a future world so appealing that we will build it week after week, month after month, year after year. Although we do not know the exact form this world will take, working toward it gives our work and our life meaning. Leaders who embrace an infinite mindset build stronger, more innovative, more inspiring organizations. Ultimately, they are the ones who lead us into the future.

**important speeches of the 21st century:** *Between Hope and History* Bill Clinton, 1996 *Between Hope and History* is President Clinton's credo, a concise statement of the fundamental principles that have guided his administration and its policies since its inception nearly four years ago. It continues, he writes, the conversation I have had with the American people about our destiny as a nation. In the three main sections of the book - Opportunity, Responsibility, Community - the President explores the most important challenges we face today: making the American Dream available to every citizen willing to work for it; ensuring that individuals, families, businesses, and government shoulder their fair share of responsibility for themselves and one another; and seeking strength through diversity in a community of citizens united in a democracy whose achievements and glory are unrivaled. America, the President observes, stands at a pivotal moment in its history. At the edge of a new century, we must decide between two visions of America. One vision foresees an every man for himself society that seems calculated to divide our people rather than unite us, to weaken rather than strengthen the bonds of community, to pay lip service to the importance of families without assuring the tools by which families can succeed. It is, the President declares, a vision that is bereft of the simple understanding that in America we must go forward together, and we don't have a single person to waste.--BOOK JACKET. **important speeches of the 21st century: What We Owe Each Other** Minouche Shafik, 2022-08-23 From one of the leading policy experts of our time, an urgent rethinking of how we can better support each other to thrive Whether we realize it or not, all of us participate in the social contract every day through mutual obligations among our family, community, place of work, and fellow citizens. Caring for others, paying taxes, and benefiting from public services define the social contract that supports and binds us together as a society. Today, however, our social contract has been broken by changing gender roles, technology, new models of work, aging, and the perils of climate change. Minouche Shafik takes us through stages of life we all experience—raising children, getting educated, falling ill, working, growing old—and shows how a reordering of our societies is possible. Drawing on evidence and examples from around the world, she shows how every country can provide citizens with the basics to have a decent life and be able to contribute to society. But we owe each other more than this. A more generous and inclusive society would also share more risks collectively and ask everyone to contribute for as long as they can so that everyone can fulfill their potential. What We Owe Each Other identifies the key elements of a better social contract that recognizes our interdependencies, supports and invests more in each other, and expects more of individuals in return. Powerful, hopeful, and thought-provoking, What We Owe Each Other provides practical solutions to current challenges and demonstrates how we can build a better society—together.

**important speeches of the 21st century: Speaking of Duke** Richard H. Brodhead, 2017-03-02 Over the course of his thirteen years as president of Duke University, Richard H. Brodhead spoke at numerous university ceremonies, community forums, and faculty meetings, and even appeared on The Colbert Report. Speaking of Duke collects dozens of these speeches, in which Brodhead speaks both to the special character and history of Duke University and to the general state of higher education. In these essays, Brodhead shows a university thinking its way forward through challenges all institutes of higher education have faced in the twenty-first century, including an expanding global horizon, an economic downturn that has left a diminished sense of opportunity and a shaken faith in the value of liberal arts education, and pressure to think more deeply about issues of equity and inclusion. His audiences range from newly arrived freshmen and new graduates—both facing uncertainty about how to build their future lives—to seasoned faculty members. On other occasions, he makes the case to the general public for the enduring importance of the humanities. What results is a portrait of Duke University in its modern chapter and the social and political climate that it shapes and is shaped by. While these speeches were given on official occasions, they are not impersonal official pronouncements; they are often quite personal and written with grace, humor, and an unwavering belief in the power of education to shape a changing world for the better. Brodhead notes that it is an underappreciated fact that a great deal of the exercise of power by a university leader is done through speaking: by articulating the aspirations of the school and the reasons for its choices, and by voicing the shared sense of mission that gives a learning community its reality. Speaking of Duke accomplishes each of those and demonstrates Brodhead's conviction that higher education is more valuable now than ever.

**important speeches of the 21st century: Self-Renewal** John W. Gardner, 2018-02-27 "The only stability possible is stability in motion."—John William Gardner In his classic treatise Self-Renewal, John W. Gardner examines why great societies thrive and die. He argues that it is dynamism, not decay, that is dramatically altering the landscape of American society. The twentieth century has brought about change more rapidly than any previous era, and with that came advancements, challenges, and often destruction. Gardner cautions that "a society must court the kinds of change that will enrich and strengthen it, rather than the kind of change that will fragment

and destroy it." A society's ability to renew itself hinges upon its individuals. Gardner reasons that it is the waning of the heart and spirit—not a lack of material might—that threatens American society. Young countries, businesses, and humans have several key commonalities: they are flexible, eager, open, curious, unafraid, and willing to take risks. These conditions lead to success. However, as time passes, so too comes complacency, apathy, and rigidity, causing motivation to plummet. It is at this junction that great civilizations fall, businesses go bankrupt, and life stagnates. Gardner asserts that the individual's role in social renewal requires each person to face and look beyond imminent threats. Ultimately, we need a vision that there is something worth saving. Through this vision, Gardner argues, society will begin to renew itself, not permanently, but past its average lifespan, and it will at once become enriched and rejuvenated.

**important speeches of the 21st century: The Next 100 Years** George Friedman, 2009-01-27 "Conventional analysis suffers from a profound failure of imagination. It imagines passing clouds to be permanent and is blind to powerful, long-term shifts taking place in full view of the world." —George Friedman In his long-awaited and provocative new book, George Friedman turns his eye on the future—offering a lucid, highly readable forecast of the changes we can expect around the world during the twenty-first century. He explains where and why future wars will erupt (and how they will be fought), which nations will gain and lose economic and political power, and how new technologies and cultural trends will alter the way we live in the new century. The Next 100 Years draws on a fascinating exploration of history and geopolitical patterns dating back hundreds of years. Friedman shows that we are now, for the first time in half a millennium, at the dawn of a new era—with changes in store, including: • The U.S.-Jihadist war will conclude—replaced by a second full-blown cold war with Russia. • China will undergo a major extended internal crisis, and Mexico will emerge as an important world power. • A new global war will unfold toward the middle of the century between the United States and an unexpected coalition from Eastern Europe, Eurasia, and the Far East; but armies will be much smaller and wars will be less deadly. • Technology will focus on space—both for major military uses and for a dramatic new energy resource that will have radical environmental implications. • The United States will experience a Golden Age in the second half of the century. Written with the keen insight and thoughtful analysis that has made George Friedman a renowned expert in geopolitics and forecasting, The Next 100 Years presents a fascinating picture of what lies ahead. **important speeches of the 21st century: World Protests** Isabel Ortiz, Sara Burke, Mohamed Berrada, Hernán Saenz Cortés, 2021-11-03 This is an open access book. The start of the 21st century has seen the world shaken by protests, from the Arab Spring to the Yellow Vests, from the Occupy movement to the social uprisings in Latin America. There are periods in history when large numbers of people have rebelled against the way things are, demanding change, such as in 1848, 1917, and 1968. Today we are living in another time of outrage and discontent, a time that has already produced some of the largest protests in world history. This book analyzes almost three thousand protests that occurred between 2006 and 2020 in 101 countries covering over 93 per cent of the world population. The study focuses on the major demands driving world protests, such as those for real democracy, jobs, public services, social protection, civil rights, global justice, and those against austerity and corruption. It also analyzes who was demonstrating in each protest; what protest methods they used; who the protestors opposed; what was achieved; whether protests were repressed; and trends such as inequality and the rise of women's and radical right protests. The book concludes that the demands of protestors in most of the protests surveyed are in full accordance with human rights and internationally agreed-upon UN development goals. The book calls for policy-makers to listen and act on these demands.

**important speeches of the 21st century: The Queen's Speech** Ingrid Seward, 2015-08-27 During her 70 years on the throne, few got to know the Queen well, but there is one body of work that sheds new light on her thoughts, personality and the issues that really concerned her: the Queen's own speeches.
