ike skelton training site: **Right Wing Resurgence** Daryl Johnson, 2012 In 2008 there were

149 militia groups in the United States. In 2009, that number more than tripled to 512, and now there are nearly 600. In *Right-Wing Resurgence*, author Daryl Johnson offers a detailed account of the growth of right-wing extremism and militias in the United States and the ever-increasing threat they pose. The author is an acknowledged expert in this area and has been an intelligence analyst working for several federal agencies for nearly 20 years. The book is also a first-hand, insider's account of the DHS Right-Wing Extremism report from the person who wrote it. It is a truthful depiction of the facts, circumstances, and events leading up to the leak of this official intelligence assessment. The leak and its aftermath have had an adverse effect on homeland security. Because of its alleged mishandling of the situation, the Department's reputation has declined in the intelligence and law enforcement communities and the analytical integrity of the Office of Intelligence and Analysis was undermined. Most importantly, the nation's security has been compromised during a critical time when a significant domestic terrorist threat is growing. This book is replete with case studies and interviews with leaders which reveal their agendas, how they recruit, and how they operate around the country. It presents a comprehensive account of an ever-growing security concern at a time when this threat is only beginning to be realized, and is still largely ignored in many circles.

Internationally, there are the added challenges of cleanup of battlegrounds and minefields. Experts estimate that the United States alone could spend between \$50-250 billion to clean up these sites, many of which are in areas of high population density, where the demand for land for development is high. This book is unique in providing detailed guidance for cleaning up military ordnance sites - listing explosives, chemical warfare materials and breakdown products which can contaminate soil and groundwater and the tests needed to detect them, as well as cleanup techniques. Also included are remote sensing techniques, geophysical techniques, safety issues, the particular challenges of chemical weapons, etc. The author illustrates these techniques with case studies, including former battlegrounds in Europe and Asia, storage and waste disposal sites in Russia and former Soviet territories, and an extended study of the remediation of the large and complex Spring Valley site in the District of Columbia,. The second edition has been fully revised and updated, and also includes new and expanded sections on: - geophysical techniques for discovering buried ordnance - underwater sites and remediation techniques - use of robotics, including remotely operated vehicles - compliance and regulatory issues - guidance documents from US Department of

ike skelton training site: Lessons Unlearned Pat Proctor, 2020-03-09 Colonel Pat Proctor's long overdue critique of the Army's preparation and outlook in the all-volunteer era focuses on a national security issue that continues to vex in the twenty-first century: Has the Army lost its ability to win strategically by focusing on fighting conventional battles against peer enemies? Or can it adapt to deal with the greater complexity of counterinsurgent and information-age warfare? In this blunt critique of the senior leadership of the U.S. Army, Proctor contends that after the fall of the Soviet Union, the U.S. Army stubbornly refused to reshape itself in response to the new strategic reality, a decision that saw it struggle through one low-intensity conflict after another—some inconclusive, some tragic—in the 1980s and 1990s, and leaving it largely unprepared when it found itself engaged—seemingly forever—in wars in Afghanistan and Iraq. The first book-length study to connect the failures of these wars to America's disastrous performance in the war on terror, Proctor's work serves as an attempt to convince Army leaders to avoid repeating the same mistakes.
