math playground tiny fishing: Hunting Fish Jay Greenspan, 2007-04-01 If you want to prove you're a good poker player, you don't have to battle against the best. Nobody really cares if you ever bluffed Phil Ivey or got Daniel Negreanu to make a bad call. You're at the table for the money, not stories of conquest. A disciplined player, one who's playing for the right reasons, would rather sit with the worst, those he's sure to outplay. He's looking for donkeys and donors. He's hunting fish. In Hunting Fish author Jay Greenspan sets out on a cross-country drive---from Connecticut to Los Angeles---looking for players he can outclass. In casinos, underground clubs, and home games throughout the country, Jay shared tables with the most inept gamblers America has to offer. In South Carolina he wiped out some racial-epithet-spewing good ole boys; in Houston he fleeced the country club set; and in Vegas he happily pounded drunken tourists. Hunting Fish is, however, not merely the story of a hustler's travels. In addition to fleecing suckers, Jay was convinced he could beat the very best and make it as a full-time pro. This trip gave him the opportunity to build his bankroll to the point where he could test his mettle in high-stakes games when he reached Los Angeles. Although to play in the high-limit rooms at Commerce Casino he needed a steady nerve---and a fatter bankroll. In his three months on the road, he needed to pad his roll with an additional twenty thousand dollars. That's a lot of fish to hunt.

math playground tiny fishing: The Shell Game Kim Adrian, 2018-04-01 Within the recent explosion of creative nonfiction, a new type of form is quietly emerging, what Brenda Miller calls hermit crab essays. The Shell Game is an anthology of these intriguing essays that borrow their structures from ordinary, everyday sources: a recipe, a crossword puzzle, a Craig's List ad. Like their zoological namesake, these essays do not simply wear their borrowed shells but inhabit them so perfectly that the borrowed structures are wholly integral rather than contrived, both shaping the work and illuminating and exemplifying its subject. The Shell Game contains a carefully chosen selection of beautifully written, thought-provoking hybrid essays tackling a broad range of subjects, including the secrets of the human genome, the intractable pain of growing up black in America, and

the gorgeous glow residing at the edges of the autism spectrum. Surprising, delightful, and lyric, these essays are destined to become classics of this new and increasingly popular hybrid form.

"A dizzyingly fun parody" (Publishers Weekly). In *Drink, Play, F@#k*, Bob Sullivan, a jilted husband, sets off to explore the world, experience a meaningful connection with the divine, and rediscover his passion. His travels lead him from his home in New York City to a drinking bender across Ireland, through the glitz and glamour that is Las Vegas, and to the hedonistic pleasure palaces of Thailand. After a lifetime of playing it safe, Sullivan finally follows his heart and lives out everyone's deepest fantasies. For who among us hasn't dreamed of standing stark naked, head upturned, and mouth agape beneath a cascading torrent of Guinness Stout? What could be more exhilarating than losing every penny you have because Charlie Weis went for a meaningless last-second field goal? And what sensate creature could ever doubt that the greatest pleasure known to man can be found in a leaky bamboo shack filled with glassy-eyed, bruised Asian hookers? Bob Sullivan has a lot to teach us about life. Let's just pray we have the wisdom to put aside our preconceptions and listen. Because what Sullivan finds isn't at all what he expected. "Two years after invading every bookshelf across the world, something positive has come out of Elizabeth Gilbert's mind-numbingly self-absorbed memoir: Andrew Gottlieb's fictional response." —Monica Weymouth, *Metro*

math playground tiny fishing: Games C. Thi Nguyen, 2020 Games are a unique art form. They do not just tell stories, nor are they simply conceptual art. They are the art form that works in the medium of agency. Game designers tell us who to be in games and what to care about; they designate the player's in-game abilities and motivations. In other words, designers create alternate agencies, and players submerge themselves in those agencies. Games let us explore alternate forms of agency. The fact that we play games demonstrates something remarkable about the nature of our own agency: we are capable of incredible fluidity with our own motivations and rationality. This volume presents a new theory of games which insists on games' unique value in human life. C. Thi Nguyen argues that games are an integral part of how we become mature, free people. Bridging aesthetics and practical reasoning, he gives an account of the special motivational structure involved in playing games. We can pursue goals, not for their own value, but for the sake of the struggle. Playing games involves a motivational inversion from normal life, and the fact that we can engage in this motivational inversion lets us use games to experience forms of agency we might never have developed on our own. Games, then, are a special medium for communication. They are the technology that allows us to write down and transmit forms of agency. Thus, the body of games forms a library of agency which we can use to help develop our freedom and autonomy. Nguyen also

presents a new theory of the aesthetics of games. Games sculpt our practical activities, allowing us to experience the beauty of our own actions and reasoning. They are unlike traditional artworks in that they are designed to sculpt activities - and to promote their players' aesthetic appreciation of their own activity.

But now the Vietnam War has reached her home. H&a and her family are forced to flee as Saigon falls, and they board a ship headed toward hope. In America, H&a discovers the foreign world of Alabama: the coldness of its strangers, the dullness of its food, the strange shape of its landscape, and the strength of her very own family. This is the moving story of one girl's year of change, dreams, grief, and healing as she journeys from one country to another, one life to the next.
