leodis black history: Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders Guah, Matthew Waritay, 2021-02-05 For hundreds of years, different leadership theories have been explored to try to explain exactly how and why certain people become great leaders. Research spans a discussion of personality traits, the characteristics of the situation at hand, and qualifications of the leader to try to determine what causes people to become more likely than others to take charge. This can be in various settings: CEOs, presidents and

prime ministers, managing directors, governors, senators, head coaches, and more. Through the examination of first-time leadership, new theories and ideas on leadership are explored. The Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders is a comprehensive reference source that focuses on what qualities distinguish first-time leadership from traditional leaders, while furthering leadership theories that look at other variables such as situational factors, knowledge base, skill levels, etc. It reviews the various approaches used by first-time leadership and how each of them uniquely approaches effective leadership, key outcomes, and the strengths and weaknesses of each approach. Why, when she already had so much? Elisabeth Samson's immense wealth puzzled many early historians who concluded that it could only have been the result of an inheritance from a master with whom she had lived and by whom she had been set free. And why, then, was she so eager to marry a white man in a time when whites established their own rules and standards for all? The novel is set in eighteenth-century Dutch Guiana (Suriname) where it was not unusual for a white man to solicit black women. Instead, we remain intrigued with this mysterious, fascinating, and intelligent black woman's dream of marrying a white man, in defiance of all norms and conventions, to gain the acceptance she craves in Dutch colonial society.--BOOK JACKET.

leodis black history: Voices in the Snow Darcy Coates, 2020-01-07 Clare remembers the cold. She remembers abandoned cars and children's toys littered across the road. She remembers dark shapes in the snow and a terror she can't explain. And then... nothing. leodis black history: The Handbook of Adult and Continuing Education Tonette S. Rocco, M Cecil Smith, Robert C. Mizzi, Lisa R. Merriweather, Joshua D. Hawley, 2023-07-03 Co-published with Colleges and universities are increasingly becoming significant sites for adult education scholarship—in large part due to demographic shifts. With fewer U.S. high school graduates on the horizon, higher education institutions will need to attract “non-traditional” (i.e., older) adult learners to remain viable, both financially and politically. There is a need to develop a better corpus of scholarship on topics as diverse as, what learning theories are useful for understanding adult learning? How are higher education institutions changing in response to the surge of adult students? What academic programs are providing better learning and employment outcomes for adults in college? Adult education scholars can offer much to the policy debates taking place in higher education. A main premise of this handbook is that adult and continuing education should not simply respond to rapidly changing social, economic, technological, and political environments across the globe, but should lead the way in preparing adults to become informed, globally-connected, critical citizens who are knowledgeable, skilled, and open and adaptive to change and uncertainty. The Handbook of Adult and Continuing Education provides rich information on the contemporary issues and trends that are of concern to adult and continuing education, of the programs and resources available to adult learners, and of opportunities to challenge and critique the structures embedded in the field that perpetuate inequity and social injustice. Adult education is a discipline that foresees a better tomorrow, and The Handbook is designed to engage and inspire readers to assist the field to seek new paths in uncertain and complex times, ask questions, and to help the field flourish. The Handbook is divided into five sections. The first, Foundations situates the field by describing the developments, core debates, perspectives, and key principles that form the basis of the field. The second, Understanding Adult Learning, includes chapters on adult learning, adult development, motivation, access, participation, and support of adult learners, and mentoring. Teaching Practices and Administrative Leadership, the third section, offers chapters on organization and administration, program planning, assessment and evaluation, teaching perspectives, andragogy and pedagogy, public pedagogy, and digital technologies for teaching and learning. The fourth section is Formal and Informal Learning Contexts. Chapters cover adult basic, GED, and literacy education, English-as-a-Second Language Programs, family literacy, prison education, workforce development, military education, international development education, health professions education, continuing professional education, higher education, human resource development and workplace learning, union and labor education, religious and spiritual education, cultural institutions, environmental education, social and political movements, and peace and conflict education. The concluding Contemporary Issues section discusses decolonizing adult and continuing education, adult education and welfare, teaching social activism, lesbian, gay, bisexual, trans, queer and straight allies, gender and its multiple forms, disability, older adults and intergenerational identities, race and ethnicity, working class, whiteness and privilege, and migrants and migrant education. The editors culminate

with consideration of next steps for adult and continuing education and priorities for the future.

How did the love affair with the area start and how did it develop? Over the years, all the ingredients for the perfect holiday are there - the spas, the sea and sun bathing, board and lodgings, entertainment and just as importantly, the journeys there and back. *Beside the Seaside* takes a detailed but entertaining look back at the history of these resorts over the last four hundred years and asks, what does the future hold? Packed with information, this book is fully illustrated with photographs, old and new, together with paintings and etchings. Coupled with the thoughts and memories of tourists and travelers from the 17th century through to the present time, it gives a fascinating insight into how our ancestors would have spent their time at the coast. leodis black history: *Mapping Society* Laura Vaughan, 2018-09-24 From a rare map of yellow fever in eighteenth-century New York, to Charles Booth's famous maps of poverty in nineteenth-century London, an Italian racial zoning map of early twentieth-century Asmara, to a map of wealth disparities in the banlieues of twenty-first-century Paris, Mapping Society traces the evolution of social cartography over the past two centuries. In this richly illustrated book, Laura Vaughan examines maps of ethnic or religious difference, poverty, and health inequalities, demonstrating how they not only serve as historical records of social enquiry, but also constitute inscriptions of social patterns that have been etched deeply on the surface of cities. The book covers themes such as the use of visual rhetoric to change public opinion, the evolution of sociology as an academic practice, changing attitudes to physical disorder, and the complexity of segregation as an urban phenomenon. While the focus is on historical maps, the narrative carries the discussion of the spatial dimensions of social cartography forward to the present day, showing how disciplines such as public health, crime science, and urban planning, chart spatial data in their current practice. Containing examples of space syntax analysis alongside full colour maps and photographs, this volume will appeal to all those interested in the long-term forces that shape how people live in cities.

leodis black history: Leeds Then and Now Eric Musgrave, 2019-07-04 The centre of Leeds is the wide thoroughfare of Briggate and it has been since at least 1207 when the path northwards from the crossing over the River Aire - literally the bridge gate - was established. As with most settlements, Leeds started out as dwellings next to the water. The first mention of Leeds was made by the scholarly monk The Venerable Bede in his Ecclesiastical History of the English People of 731 AD when he referred to the region of Loidis, but he was scant on details. The modern Leeds is a product of the Industrial Revolution, a great Victorian northern industrial city shaped by the manufacturing boom that began in the late 18th century and employed thousands of people for almost 200 years in industries like textiles, clothing manufacturing, metalworking and engineering. Using historic images, some dating back to the 19th century, paired with their modern-day viewpoint, Eric Musgrave charts the evolution of the city from its industrial heyday through the disruptions of two world wars, to its position as one of the most prominent of the northern powerhouses. Sites include: City Square, Park Place, Leeds University, Leeds Town Hall, Odeon Cinema, Kirkgate Market, Briggate, Headrow, Boar Lane, Vicar Lane, Duncan Street, Quarry Hill Flats, Queens Arcade, Cross Arcade, Leeds Cathedral.

Organised in three sections, Context, Chronology and Contours, the book demonstrates how Jews have influenced the city and how the city has influenced the community. A small community was transformed by the late Victorian influx of poor migrants from the Russian Empire and within two generations had become successfully integrated into the city's social and economic structure. More than a dozen authors contribute to this definitive history and the editor provides both an introductory and concluding overview which brings the story up to the present day. The book will be of interest to both historians and general readers.

leodis black history: *Aspects of Leeds* Lynne Stevenson Tate, 1999 Following the great success of *Aspects of Leeds 1*, we are now delighted to announce the forthcoming publication of *Aspects of Leeds 2*. In this edition, we witness the arrival of the Black Prince in the City and revisit Leeds United during their breakthrough years of 1964 and 1965. The story of Those Jaw Bones reveals the links between the City and the whaling industry, while the story of the first Trade Union Strike on the Aire and Calder Canal in the 1890's, reveals attitudes of 19th century employers. There are glimpses of life at school, work and play in the City in the latter years of the 19th and early 20th century. All carefully researched and thoughtfully illustrated. The book contains twelve previously unpublished contributions from local authors and it cannot help but be of interest to researchers and general readers alike.
