**maury county courthouse film history:** Polk Walter R. Borneman, 2009-04-14 In Polk, Walter R. Borneman gives us the first complete and authoritative biography of a president often overshadowed in image but seldom outdone in accomplishment. James K. Polk occupied the White House for only four years, from 1845 to 1849, but he plotted and attained a formidable agenda: He fought for and won tariff reductions, reestablished an independent Treasury, and, most notably, brought Texas into the Union, bluffed Great Britain out of the lion's share of Oregon, and wrested California and much of the Southwest from Mexico. On reflection, these successes seem even more impressive, given the contentious political environment of the time. In this unprecedented, long-overdue warts-and-all look at Polk's life and career, we have a portrait of an expansionist president and decisive statesman who redefined the country he led, and we are reminded anew of the true meaning of presidential accomplishment and resolve.

**maury county courthouse film history:** Death, Disability, and the Superhero José Alaniz, 2014-10-15 The Thing. Daredevil. Captain Marvel. The Human Fly. Drawing on DC and Marvel comics from the 1950s to the 1990s and marshaling insights from three burgeoning fields of inquiry in the humanities—disability studies, death and dying studies, and comics studies—José Alaniz seeks to redefine the contemporary understanding of the superhero. Beginning in the Silver Age, the genre increasingly challenged and complicated its hypermasculine, quasi-eugenicist biases through such disabled figures as Ben Grimm/The Thing, Matt Murdock/Daredevil, and the Doom Patrol. Alaniz traces how the superhero became increasingly vulnerable, ill, and mortal in this era. He then proceeds to a reinterpretation of characters and series—some familiar (Superman), some obscure

(She-Thing). These genre changes reflected a wider awareness of related body issues in the postwar U.S. as represented by hospice, death with dignity, and disability rights movements. The persistent highlighting of the body's "imperfection" comes to forge a predominant aspect of the superheroic self. Such moves, originally part of the Silver Age strategy to stimulate sympathy, enhance psychological depth, and raise the dramatic stakes, developed further in such later series as *The Human Fly*, *Strikeforce: Morituri*, and the landmark graphic novel *The Death of Captain Marvel*, all examined in this volume. Death and disability, presumed routinely absent or denied in the superhero genre, emerge to form a core theme and defining function of the Silver Age and beyond.

Brophy, 2019-02-01 Slavery and the University is the first edited collection of scholarly essays devoted solely to the histories and legacies of this subject on North American campuses and in their Atlantic contexts. Gathering together contributions from scholars, activists, and administrators, the volume combines two broad bodies of work: (1) historically based interdisciplinary research on the presence of slavery at higher education institutions in terms of the development of proslavery and antislavery thought and the use of slave labor; and (2) analysis on the ways in which the legacies of slavery in institutions of higher education continued in the post-Civil War era to the present day. The collection features broadly themed essays on issues of religion, economy, and the regional slave trade of the Caribbean. It also includes case studies of slavery's influence on specific institutions, such as Princeton University, Harvard University, Oberlin College, Emory University, and the University of Alabama. Though the roots of Slavery and the University stem from a 2011 conference at Emory University, the collection extends outward to incorporate recent findings. As such, it offers a roadmap to one of the most exciting developments in the field of U.S. slavery studies and to ways of thinking about racial diversity in the history and current practices of higher education.

Coal was king in Schuylkill County during the nineteenth century, but the demise of the coal industry had already begun by 1900. Bitter strikes between coal operators and miners, especially the great strike of 1902, caused consumers to find other fuels and forced Pottsville to re-create its economy and identity. However, residents adapted swiftly, and it was not long before Pottsville had seven volunteer fire companies, the second-finest
