preguntas y respuestas de osha 10: Discourses of Brigham Young Brigham Young, 2020-09-28 BRIGHAM YOUNG, second President of the Church of Jesus Christ of Latter-day Saints, and first Governor of Utah, was the founder and chief builder of the Great Intermountain West of the United States of America. He is recognized as one of the foremost colonizers and empire builders of all time. His unsurpassed methods of conquering for human use the Great American Desert, have been adopted to some degree by all who, since his day, have been engaged in the reclamation and settlement of unoccupied lands, especially under a low rainfall. Statesmen, scholars and business men have acclaimed the leadership, organizing power and sound philosophy which brought social and economic happiness to the people who were led into the wilderness by Brigham Young. He not only brought contentment to the people, gathered from many lands, but he guided the Church over which he presided, until, at his death, it was larger in numbers and more firmly established than ever before. The tremendous world significance of the labors of Brigham Young, and the universal applicability of his methods, under modern conditions, make it certain that the work he accomplished was not due, primarily, to the gigantic personality of the man. Rather, the success achieved must have been due to the possession of a life philosophy of sufficient depth and extent to meet varying human needs. Another man, of less dominant personality, armed with the same principles, would have won success. As he, himself, would say, it was the possession of the Gospel of Life and Salvation that enabled him and his associates to do the work so well. In fact, Brigham Young was first a spiritual teacher and secondly a material leader. The religion that he professed made him the man that he became; its principles were used in guiding the people in all their affairs. Books enough to fill a library have been written about the history, character and accomplishments of Brigham Young. Few of these books attempt to analyze the system of doctrine and practice that brought unbounded success to the Latter-day Saints. Many display such extreme religious partisanship that even the sympathetic reader can place no reliance upon their statements. Something harsher might be said about the large number of books written about Brigham Young and his times that manifestly aim to secure popularity by appealing to the sensational and the lurid, at the expense of truth. Even recently, when the years have given perspective, some writers have set up hypotheses concerning Brigham Young, and have proceeded to argue the case—as if that were history! It is amazing that intelligent people, knowing the high order of accomplishments of the Latter-day Saints, give credence to the weird and crude stories, appealing to the baser emotions of mankind, which fill the pages of anti-Mormon literature. In this book Brigham Young is allowed to speak for himself. Excerpts have been made from his many discourses, and these have been arranged to show the coherent system of faith which he continuously taught his people and by which he was enabled to win success for his followers. The philosophy thus set forth is clear and unmistakable in its purpose. It reveals Brigham Young as a man who applied the simple principles of the Gospel of Jesus Christ to the everyday affairs of men; and who proved the efficacy, in common life, among common men, of the Gospel of the Son of God. This book was made possible because Brigham Young secured stenographic reports of his addresses. As he traveled among the people,

reporters accompanied him. All that he said was recorded. Practically all of these discourses (from December 16, 1851 to August 19, 1877) were published in the Journal of Discourses, which was widely distributed. The public utterances of few great historical figures have been so faithfully and fully preserved. Clearly, this mass of material, covering nearly thirty years of incessant public speaking could not be presented with any hope of serving the general reader, save in the form of selections of essential doctrines. The discourses, from which this volume has been culled, were spoken extemporaneously. The state papers of Governor Brigham Young, and the epistles signed by him and his counselors in the Presidency of the Church, have not been used in this collection. The excerpts here presented came from his lips under the inspiration, at the moment, of the Power that guided his life. The corrections for the printer, as shown by existing manuscripts, were few and of minor consequence. The discourses are a remarkable self-revelation of the character and moving impulses of a man who accomplished huge tasks for his generation. It is marvelous that the enemies of Brigham Young, with this wealth of material before them, have found so little to use to his disadvantage. But, a dishonest or insincere man would not have had his public utterances reported and published all over the world. The consistency of the views presented, from the first to the last discourse, would be astounding, were it not for the fact that he clung constantly for interpretation to the Gospel of Jesus Christ as he had been taught it by the Prophet Joseph Smith. His devotion to his teacher and predecessor, the Prophet, is tenderly beautiful. The school education of Brigham Young was very limited, but his discourses show a wide knowledge of men and affairs and an excellent power to use the English language clearly and forcefully. Often, his simple eloquence rises to great heights. Those who heard him speak have declared that they were held in tense attention, however long the address might be. His vivid imagination, dramatic power and unquestioned sincerity made him a natural orator. He seldom confined himself to one subject in his discourses. The needs of the day were the themes about which he wound his teachings.
