the pearl sparknotes: *Mistreated* Robert Pearl, 2017-05-02 The biggest problem in American health care is us Do you know how to tell good health care from bad health care? Guess again. As patients, we wrongly assume the best care is dependent mainly on the newest medications, the most complex treatments, and the smartest doctors. But Americans look for health-care solutions in the wrong places. For example, hundreds of thousands of lives could be saved each year if doctors reduced common errors and maximized preventive medicine. For Dr. Robert Pearl, these kinds of mistakes are a matter of professional importance, but also personal significance: he lost his own father due in part to poor communication and treatment planning by doctors. And consumers make costly mistakes too: we demand modern information technology from our banks, airlines, and retailers, but we passively accept last century's technology in our health care. Solving the challenges of health care starts with understanding these problems. *Mistreated* explains why subconscious misperceptions are so common in medicine, and shows how modifying the structure, technology, financing, and leadership of American health care could radically improve quality outcomes. This important book proves we can overcome our fears and faulty assumptions, and provides a roadmap

for a better, healthier future.

the pearl sparknotes: Terror to the Wicked Tobey Pearl, 2021-03-16 A little-known moment in colonial history that changed the course of America's future. A riveting account of a brutal killing, an all-out manhunt, and the first murder trial in America, set against the backdrop of the Pequot War (between the Pequot tribe and the colonists of Massachusetts Bay) that ended this two-year war and brought about a peace that allowed the colonies to become a nation. The year: 1638. The setting: Providence, near Plymouth Colony. A young Nipmuc tribesman returning home from trading beaver pelts is fatally stabbed in a robbery in the woods near Plymouth Colony by a vicious white runaway indentured servant. The tribesman, fighting for his life, is able with his final breaths to reveal the details of the attack to Providence's governor, Roger Williams. A frantic manhunt by the fledgling government ensues to capture the killer and his gang, now the most hunted men in the New World. With their capture, the two-year-old Plymouth Colony faces overnight its first trial—a murder trial—with Plymouth's governor presiding as judge and prosecutor, interviewing witnesses and defendants alike, and Myles Standish, Plymouth Colony authority, as overseer of the courtroom, his

sidearm at the ready. The jury—Plymouth colonists, New England farmers (“a rude and ignorant sorte,” as described by former governor William Bradford)—white, male, picked from a total population of five hundred and fifty, knows from past persecutions the horrors of a society without a jury system. Would they be tempted to protect their own—including a cold-blooded murderer who was also a Pequot War veteran—over the life of a tribesman who had fought in a war allied against them? Tobey Pearl brings to vivid life those caught up in the drama: Roger Williams, founder of Plymouth Colony, a self-taught expert in indigenous cultures and the first investigator of the murder; Myles Standish; Edward Winslow, a former governor of Plymouth Colony and the master of the indentured servant and accused murderer; John Winthrop, governor of Massachusetts Bay Colony; the men on trial for the murder; and the lone tribesman, from the last of the Woodland American Indians, whose life was brutally taken from him. Pearl writes of the witnesses who testified before the court and of the twelve colonists on the jury who went about their duties with grave purpose, influenced by a complex mixture of Puritan religious dictates, lingering medieval mores, new ideals of humanism, and an England still influenced by the last gasp of the English Renaissance. And she shows how, in the end, the twelve came to render a groundbreaking judicial decision that forever set the standard for American justice. An extraordinary work of historical piecing-together; a moment that set the precedence of our basic, fundamental right to trial by jury, ensuring civil liberties and establishing it as a safeguard against injustice.

Then, before his eyes, the Arizona lifted up out of the water. That enormous battleship bounced up in the air like a rubber ball and split apart. Fire burst out of the ship. A geyser of water shot into the air and came crashing down. Adam was almost thrown out of the rowboat. He clung to the seat as it swung around. He saw blue skies and the glittering city. The boat swung back again, and he saw black clouds, and the Arizona, his father's ship, sinking beneath the water. -- from *A Boy at War* He kept looking up, afraid the planes would come back. The sky was obscured by black smoke....It was all unreal: the battleships half sunk, the bullet holes in the boat, Davi and Martin in the water. December 7, 1941: On a quiet Sunday morning, while Adam and his friends are fishing near Honolulu, a surprise attack by Japanese bombers destroys the fleet at Pearl Harbor. Even as Adam struggles to survive the sudden chaos all around him, and as his friends endure the brunt of the attack, a greater concern hangs over his head: Adam's father, a navy lieutenant, was stationed

on the USS Arizona when the bombs fell. During the subsequent days Adam -- not yet a man, but no longer a boy -- is caught up in the war as he desperately tries to make sense of what happened to his friends and to find news of his father. Harry Mazer, whose autobiographical novel, *The Last Mission*, brought the European side of World War II to vivid life, now turns to the Pacific theater and how the impact of war can alter young lives forever.

the pearl sparknotes: *Seeing What Others Don't* Gary Klein, 2013-06-25 Insights -- like Darwin's understanding of the way evolution actually works, and Watson and Crick's breakthrough discoveries about the structure of DNA -- can change the world. We also need insights into the everyday things that frustrate and confuse us so that we can more effectively solve problems and get things done. Yet we know very little about when, why, or how insights are formed -- or what blocks them. In *Seeing What Others Don't*, renowned cognitive psychologist Gary Klein unravels the mystery. Klein is a keen observer of people in their natural settings -- scientists, businesspeople, firefighters, police officers, soldiers, family members, friends, himself -- and uses a marvelous variety of stories to illuminate his research into what insights are and how they happen. What, for example, enabled Harry Markopolos to put the finger on Bernie Madoff? How did Dr. Michael Gottlieb make the connections between different patients that allowed him to publish the first announcement of the AIDS epidemic? What did Admiral Yamamoto see (and what did the Americans miss) in a 1940 British attack on the Italian fleet that enabled him to develop the strategy of attack at Pearl Harbor?

How did a smokejumper see that setting another fire would save his life, while those who ignored his insight perished? How did Martin Chalfie come up with a million-dollar idea (and a Nobel Prize) for a natural flashlight that enabled researchers to look inside living organisms to watch biological processes in action? Klein also dissects impediments to insight, such as when organizations claim to value employee creativity and to encourage breakthroughs but in reality block disruptive ideas and prioritize avoidance of mistakes. Or when information technology systems are dumb by design and block potential discoveries. Both scientifically sophisticated and fun to read, *Seeing What Others Don't* shows that insight is not just a eureka! moment but a whole new way of understanding.

In this unique historical study, veteran scholar Alan Kreider delivers the fruit of a lifetime of study as he tells the amazing story of the spread of Christianity in the Roman Empire. Challenging traditional understandings, Kreider contends the church grew because the virtue of patience was of central importance in the life and witness of the early Christians. They wrote about patience, not evangelism, and reflected on prayer, catechesis, and worship, yet the church grew--not by specific strategies but by patient ferment.

the pearl sparknotes: Pearls, Politics, and Power Madeleine Kunin, 2008-04-15 *Pearls, Politics, and Power* is a call to action for new political engagement and leadership from the women of America. Informed by conversations with elected women leaders from all levels, former three-term Vermont Governor and Ambassador to Switzerland Madeleine M. Kunin asks: What difference do women make? What is the worst part of politics, and what is the best part? What inspired these women to run, and how did they prepare themselves for public life? How did they raise money, protect their families' privacy, deal with criticism and attack ads, and work with the good old boys? Kunin's core message is that America needs an infusion of new leadership to better address the major problems of our time. To see how women can achieve that goal, she combines her personal experience in politics; the lessons of past women's movements; the stories of young women today who have new ideas about their role in society; and interviews with a wide range of women in positions of power, looking for clues to their leadership, as well as the effects of gender stereotyping. She interviews Senator Hillary Rodham Clinton, analyzes her campaign, and addresses the question: Is the country ready? Other interviewees include U.S. Representatives Loretta Sanchez, Linda Sanchez, Deborah Pryce, and Tammy Baldwin, and U.S. Senators Susan Collins, Amy Klobuchar, and Carol Moseley Braun, and Governors Kathleen Sibelius and Janet Napolitano. The next generation of women will be inspired to lead by seeing women like Nancy Pelosi wielding the gavel, and seeing themselves reflected in the portraits in statehouses, courthouses, corporate and university boardrooms, and the White House. *Pearls, Politics, and Power* will help ensure that this inspiration is not soured or deflected, but channeled into successful candidacies by America's leaders of tomorrow. What will it take for women to assume their rightful places in the political corridors of power?

He felt that he might have lost touch with the country, with its speech, the smell of its grass and trees, its color and quality of light, the pulse of its people. To reassure himself, he set out on a voyage of rediscovery of the American identity, accompanied by a distinguished French poodle named Charley; and riding in a three-quarter-ton pickup truck named Rocinante. His course took him through almost forty states: northward from Long Island to Maine; through the Midwest to Chicago; onward by way of

Minnesota, North Dakota, Montana (with which he fell in love), and Idaho to Seattle, south to San Francisco and his birthplace, Salinas; eastward through the Mojave, New Mexico, Arizona, to the vast hospitality of Texas, to New Orleans and a shocking drama of desegregation; finally, on the last leg, through Alabama, Virginia, Pennsylvania, and New Jersey to New York. *Travels with Charley in Search of America* is an intimate look at one of America's most beloved writers in the later years of his life—a self-portrait of a man who never wrote an explicit autobiography.
