On an upper floor of a plush, high-security building on Central Park West, an elegant man sits in the office of Dr. Anne Kramer, confessing to the heinous murder that has horrified the modern world. Randolph Sontime is renowned for his personal charm, and Dr. Kramer is fighting to keep from falling victim to it. For the first time in her life, she truly understands the meaning of the word “charisma.” Not knowing that her own destiny is irrevocably tied to his, Anne Kramer listens to the story of Sontime’s life. “It began with the magic, you see. And so, perforce, must I.” As a boy named Han at the House of Ra, an isolated oasis in the Egyptian desert of a far ancient time, Sontime lived in privilege. There the chosen were trained in the science of alchemy-magic, philosophy, miracles. Only two other initiates were as skilled as he: Akan, quiet and studious, a boy whose thirst for knowledge was matched only by his hunger for truth; and Nefar, beautiful and brilliant, a girl as filled with wonder and unfathomable ambition as Han himself. Together they discovered that in union, theirs was a power unmatched in the physical world. But even in the House of Ra, there were boundaries to be observed, knowledge that only the masters understood and feared. As the threesome’s thirst for answers—and for each other—deepened, they were tempted by the dark arts that they had sworn to avoid. “Look at three magnificent youths who stand astride your world and scoff at the rules you must obey. . . . Look at us, and call us gods.” Their power was palpable, their desire total—until the fateful moment when their alliance was forever damned, their gifts horribly corrupted. A seductive work that seethes with mystery and passion, *The Alchemist* hurtles readers back through time to an era when magic was sacred and the workings of the world lay in the hands of a few gifted, but tortured souls. In a stunning feat of unbridled imagination, Donna Boyd has created her most hypnotic novel to date.

On his way, Ibn Fattouma passes through a series of very different lands--realms where the moon is worshipped, where marriage does not exist, where kings are treated like gods, and where freedom, toleration, and justice are alternately held as the highest goods. All of these places, however, are inevitably marred by the specter of war, and Ibn Fattouma finds himself continually driven onward, ever seeking. Like the protagonists of *A Pilgrim's Progress* and *Gulliver's Travels*, Naguib Mahfouz's hero travels not through any recognizable historical landscape, but through timeless aspects of human possibility.

Mary Losure’s riveting narrative nonfiction account of Isaac’s early life traces his development as a thinker from his childhood, in friendly prose that will capture the attention of today’s budding scientists—as if by magic. Back matter includes an afterword, an author’s note, source notes, and a bibliography.

the alchemist: *These Ghosts Are Family* Maisy Card, 2021-01-05 PEN/Hemingway Award For Debut Novel Finalist Shortlisted for the 2020 Center for Fiction First Novel Prize A "rich, ambitious debut novel" (The New York Times Book Review) that reveals the ways in which a Jamaican family forms and fractures over generations, in the tradition of *Homegoing* by Yaa Gyasi. Stanford Solomon's shocking, thirty-year-old secret is about to change the lives of everyone around him. Stanford has done something no one could ever imagine. He is a man who faked his own death and stole the identity of his best friend. Stanford Solomon is actually Abel Paisley. And now, nearing the end of his life, Stanford is about to meet his firstborn daughter, Irene Paisley, a home health aide who has unwittingly shown up for her first day of work to tend to the father she thought was dead. *These Ghosts Are Family* revolves around the consequences of Abel's decision and tells the story of the Paisley family from colonial Jamaica to present-day Harlem. There is Vera, whose widowhood forced her into the role of a single mother. There are two daughters and a granddaughter who have never known they are related. And there are others, like the houseboy who loved Vera, whose lives might have taken different courses if not for Abel Paisley's actions. This "rich and layered story" (Kirkus Reviews) explores the ways each character wrestles with their ghosts and struggles to forge independent identities outside of the family and their trauma. The result is a "beguiling...vividly

drawn, and compelling” (BookPage, starred review) portrait of a family and individuals caught in the sweep of history, slavery, migration, and the more personal dramas of infidelity, lost love, and regret.

the alchemist: The Alchemy of Us Ainissa Ramirez, 2021-04-06 A “timely, informative, and fascinating” study of 8 inventions—and how they shaped our world—with “totally compelling” insights on little-known inventors throughout history (Elizabeth Kolbert, Pulitzer Prize-winning author of *The Sixth Extinction*) In *The Alchemy of Us*, scientist and science writer Ainissa Ramirez examines 8 inventions and reveals how they shaped the human experience: • Clocks • Steel rails • Copper communication cables • Photographic film • Light bulbs • Hard disks • Scientific labware • Silicon chips Ramirez tells the stories of the woman who sold time, the inventor who inspired Edison, and the hotheaded undertaker whose invention pointed the way to the computer. She describes how our pursuit of precision in timepieces changed how we sleep; how the railroad helped commercialize Christmas; how the necessary brevity of the telegram influenced Hemingway’s writing style; and how a young chemist exposed the use of Polaroid’s cameras to create passbooks to track black citizens in apartheid South Africa. These fascinating and inspiring stories offer new perspectives on our relationships with technologies. Ramirez shows not only how materials were shaped by inventors but also how those materials shaped culture, chronicling each invention and its consequences—intended and unintended. Filling in the gaps left by other books about technology, Ramirez showcases little-known inventors—particularly people of color and women—who had a significant impact but whose accomplishments have been hidden by mythmaking, bias, and convention. Doing so, she shows us the power of telling inclusive stories about technology. She also shows that innovation is universal—whether it's splicing beats with two turntables and a microphone or splicing genes with two test tubes and CRISPR.

the alchemist: Newton the Alchemist William R. Newman, 2018-12-11 A book that finally demystifies Newton’s experiments in alchemy When Isaac Newton’s alchemical papers surfaced at a Sotheby’s auction in 1936, the quantity and seeming incoherence of the manuscripts were shocking. No longer the exemplar of Enlightenment rationality, the legendary physicist suddenly became “the last of the magicians.” *Newton the Alchemist* unlocks the secrets of Newton’s alchemical quest, providing a radically new understanding of the uncommon genius who probed nature at its deepest levels in pursuit of empirical knowledge. In this evocative and superbly written book, William Newman blends in-depth analysis of newly available texts with laboratory replications of Newton’s actual experiments in alchemy. He does not justify Newton’s alchemical research as part of a religious search for God in the physical world, nor does he argue that Newton studied alchemy to learn about gravitational attraction. Newman traces the evolution of Newton’s alchemical ideas and practices over a span of more than three decades, showing how they proved fruitful in diverse scientific fields. A precise experimenter in the realm of “chymistry,” Newton put the riddles of alchemy to the test in his lab. He also used ideas drawn from the alchemical texts to great effect in

his optical experimentation. In his hands, alchemy was a tool for attaining the material benefits associated with the philosopher's stone and an instrument for acquiring scientific knowledge of the most sophisticated kind. Newton the Alchemist provides rare insights into a man who was neither Enlightenment rationalist nor irrational magus, but rather an alchemist who sought through experiment and empiricism to alter nature at its very heart.
