us history regents 2023: *An Indigenous Peoples' History of the United States (10th Anniversary Edition)* Roxanne Dunbar-Ortiz, 2023-10-03 New York Times Bestseller Now part of the HBO docuseries *Exterminate All the Brutes*, written and directed by Raoul Peck Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. With growing support for movements such as the campaign to abolish Columbus Day and replace it with Indigenous Peoples' Day and the Dakota Access Pipeline protest led by the Standing Rock Sioux Tribe, *An Indigenous Peoples' History of the United States* is an essential resource providing historical threads that are crucial for understanding the present. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: "The country can be rid of them only by exterminating them." Spanning more than four hundred years, this classic bottom-up peoples' history radically reframes US history and explodes

the silences that have haunted our national narrative. An Indigenous Peoples' History of the United States is a 2015 PEN Oakland-Josephine Miles Award for Excellence in Literature.

us history regents 2023: Mexican Waves Sonia Robles, 2019-10-08 Mexican Waves is the fascinating history of how borderlands radio stations shaped the identity of an entire region as they addressed the needs of the local population and fluidly reached across borders to the United States. In so doing, radio stations created a new market of borderlands consumers and worked both within and outside the constraints of Mexican and U.S. laws. Historian Sonia Robles examines the transnational business practices of Mexican radio entrepreneurs between the Golden Age of radio and the early years of television history. Intersecting Mexican history and diaspora studies with communications studies, this book explains how Mexican radio entrepreneurs targeted the Mexican population in the United States decades before U.S. advertising agencies realized the value of the Spanish-language market. Robles's robust transnational research weaves together histories of technology, performance, entrepreneurship, and business into a single story. Examining the programming of northern Mexican commercial radio stations, the book shows how radio stations from Tijuana to Matamoros courted Spanish-language listeners in the U.S. Southwest and local Mexican audiences between 1930 and 1950. Robles deftly demonstrates Mexico's role in creating the borderlands, adding texture and depth to the story. Scholars and students of radio, Spanish-language media in the United States, communication studies, Mexican history, and border studies will see how Mexican radio shaped the region's development and how transnational listening communities used broadcast media's unique programming to carve out a place for themselves as consumers and citizens of Mexico and the United States.

us history regents 2023: Our Fight Has Just Begun Cheryl Redhorse Bennett, 2022-03-01 Our Fight Has Just Begun is a timely and urgent work. The result of more than a decade of research, it revises history, documents anti-Indianism, and gives voice to victims of racial violence. Navajo scholar Cheryl Redhorse Bennett reveals a lesser-known story of Navajo activism and the courageous organizers that confronted racial injustice and inspired generations. Illuminating largely untold stories of hate crimes committed against Native Americans in the Four Corners region of the United States, this work places these stories within a larger history, connecting historical violence in the United States to present-day hate crimes. Bennett contends that hate crimes committed against Native Americans have persisted as an extension of an "Indian hating" ideology that has existed since colonization, exposing how the justice system has failed Native American victims and families. While this book looks deeply at multiple generations of unnecessary and ongoing pain and violence, it also recognizes that this is a time of uncertainty and hope. The movement to abolish racial injustice and racially motivated violence has gained fierce momentum. Our Fight Has Just Begun shows that racism, hate speech, and hate crimes are ever present and offers recommendations for racial justice.

us history regents 2023: Menace to Empire Moon-Ho Jung, 2023-12-12 Menace to Empire is a profoundly original and ambitious book, a history of race and empire that traces both the colonial violence and the anticolonial rage that the United States spread across the Pacific between the Philippine-American War and World War II. Author Moon-Ho Jung argues that the US national security state as we know it was born out of attempts to repress and silence colonized subjects, from the Philippines and Hawai'i to California and beyond, whose anticolonial aspirations challenged US claims to sovereignty. Jung examines how the contradictions of race, nation, and empire generated waves of revolutionary movements spanning the Pacific--anticolonial, antiracist, and labor movements that exposed and confronted the US empire. In response, the US state closely monitored and brutally suppressed those movements by racializing particular politics and distinct communities as seditious, exaggerating fears of pan-Asian solidarities and sowing anti-Asian racism under the guise of national security. Menace to Empire transforms familiar themes in American history to highlight the critical role of colonial violence in the formation of radical movements and the antiradical origins of anti-Asian racism. Radicalized by their opposition to the US empire and

racialized as threats to US security, peoples in and from Asia pursued a revolutionary politics that gave rise to the national security state--the heart and soul of the US empire ever since--Provided by publisher.

us history regents 2023: An Archive of Skin, An Archive of Kin Adria L. Imada, 2022-02-01 What was the longest and harshest medical quarantine in modern history, and how did people survive it? In Hawai'i beginning in 1866, men, women, and children suspected of having leprosy were removed from their families. Most were sentenced over the next century to lifelong exile at an isolated settlement. Thousands of photographs taken of their skin provided forceful, if conflicting, evidence of disease and disability for colonial health agents. And yet among these exiled people, a competing knowledge system of kinship and collectivity emerged during their incarceration. This book shows how they pieced together their own intimate archives of care and companionship through unanticipated adaptations of photography.

us history regents 2023: *Living and Leaving* Donna M. Glowacki, 2015-04-02 The Mesa Verde migrations in the thirteenth century were an integral part of a transformative period that forever changed the course of Pueblo history. For more than seven hundred years, Pueblo people lived in the Northern San Juan region of the U.S. Southwest. Yet by the end of the 1200s, tens of thousands of Pueblo people had left the region. Understanding how it happened and where they went are enduring questions central to Southwestern archaeology. Much of the focus on this topic has been directed at understanding the role of climate change, drought, violence, and population pressure. The role of social factors, particularly religious change and sociopolitical organization, are less well understood. Bringing together multiple lines of evidence, including settlement patterns, pottery exchange networks, and changes in ceremonial and civic architecture, this book takes a historical perspective that naturally forefronts the social factors underlying the depopulation of Mesa Verde. Author Donna M. Glowacki shows how "living and leaving" were experienced across the region and what role differing stressors and enablers had in causing emigration. The author's analysis explains how different histories and contingencies—which were shaped by deeply rooted eastern and western identities, a broad-reaching Aztec-Chaco ideology, and the McElmo Intensification—converged, prompting everyone to leave the region. This book will be of interest to southwestern specialists and anyone interested in societal collapse, transformation, and resilience.

us history regents 2023: Becoming Hopi Wesley Bernardini, Stewart B. Koyiyumptewa, Gregson Schachner, Leigh J. Kuwanwisiwma, 2021-07-06 Becoming Hopi is a comprehensive look at the history of the people of the Hopi Mesas as it has never been told before. The Hopi Tribe is one of the most intensively studied Indigenous groups in the world. Most popular accounts of Hopi history romanticize Hopi society as "timeless." The archaeological record and accounts from Hopi people paint a much more dynamic picture, full of migrations, gatherings, and dispersals of people; a search for the center place; and the struggle to reconcile different cultural and religious traditions. Becoming Hopi weaves together evidence from archaeology, oral tradition, historical records, and ethnography to reconstruct the full story of the Hopi Mesas, rejecting the colonial divide between "prehistory" and "history." The Hopi and their ancestors have lived on the Hopi Mesas for more than two thousand years, a testimony to sustainable agricultural practices that supported one of the largest populations in the Pueblo world. Becoming Hopi is a truly collaborative volume that integrates Indigenous voices with more than fifteen years of archaeological and ethnographic fieldwork. Accessible and colorful, this volume presents groundbreaking information about Ancestral Pueblo villages in the greater Hopi Mesas region, making it a fascinating resource for anyone who wants to learn about the rich and diverse history of the Hopi people and their enduring connection to the American Southwest. us history regents 2023: A Place at the Nayarit Natalia Molina, 2024-02-13 In 1951, Doña Natalia Barraza opened the Nayarit, a Mexican restaurant in Echo Park, Los Angeles. With *A Place at the Nayarit*, historian Natalia Molina traces the life's work of her grandmother, remembered by all who knew her as Doña Natalia--a generous, reserved, and extraordinarily capable woman. Doña Natalia immigrated alone from Mexico to L.A., adopted two children, and ran a successful business. She also sponsored, housed, and employed dozens of other immigrants, encouraging them to lay claim to a city long characterized by anti-Latinx racism. Together, the employees and customers of the Nayarit maintained ties to their old homes while providing one another safety and support.--

us history regents 2023: Diné Identity in a Twenty-First-Century World Lloyd L. Lee, 2020-05-19 Diné identity in the twenty-first century is distinctive and personal. It is a mixture of traditions, customs, values, behaviors, technologies, worldviews, languages, and lifeways. It is a holistic experience. Diné identity is analogous to Diné weaving: like weaving, Diné identity intertwines all of life's elements together. In this important new book, Lloyd L. Lee, a citizen of the Navajo Nation and an associate professor of Native American studies, takes up and provides insight on the most essential of human questions: who are we? Finding value and meaning in the Diné way of life has always been a hallmark of Diné studies. Lee's Diné-centric approach to identity gives the reader a deep appreciation for the Diné way of life. Lee incorporates Diné baa hane' (Navajo history), Sa'áh Naagháí Bik'eh Hózhón (harmony), Diné Bizaad (language), K'é (relations), K'éeí (clanship), and Níhi Kéyah (land) to address the melding of past, present, and future that are the hallmarks of the Diné way of life. This study, informed by personal experience, offers an inclusive view of identity that is encompassing of cultural and historical diversity. To illustrate this, Lee shares a spectrum of Diné insights on what it means to be human. *Diné Identity in a Twenty-First-Century World* opens a productive conversation on the complexity of understanding and the richness of current Diné identities.

us history regents 2023: Brown v. Board of Education James T. Patterson, 2001-03-01 2004 marks the fiftieth anniversary of the Supreme Court's unanimous decision to end segregation in public schools. Many people were elated when Supreme Court Chief Justice Earl Warren delivered *Brown v. Board of Education of Topeka* in May 1954, the ruling that struck down state-sponsored racial segregation in America's public schools. Thurgood Marshall, chief attorney for the black families that launched the litigation, exclaimed later, I was so happy, I was numb. The novelist Ralph Ellison wrote, another battle of the Civil War has been won. The rest is up to us and I'm very glad. What a wonderful world of possibilities are unfolded for the children! Here, in a concise, moving

narrative, Bancroft Prize-winning historian James T. Patterson takes readers through the dramatic case and its fifty-year aftermath. A wide range of characters animates the story, from the little-known African Americans who dared to challenge Jim Crow with lawsuits (at great personal cost); to Thurgood Marshall, who later became a Justice himself; to Earl Warren, who shepherded a fractured Court to a unanimous decision. Others include segregationist politicians like Governor Orval Faubus of Arkansas; Presidents Eisenhower, Johnson, and Nixon; and controversial Supreme Court justices such as William Rehnquist and Clarence Thomas. Most Americans still see Brown as a triumph--but was it? Patterson shrewdly explores the provocative questions that still swirl around the case. Could the Court--or President Eisenhower--have done more to ensure compliance with Brown? Did the decision touch off the modern civil rights movement? How useful are court-ordered busing and affirmative action against racial segregation? To what extent has racial mixing affected the academic achievement of black children? Where indeed do we go from here to realize the expectations of Marshall, Ellison, and others in 1954?

us history regents 2023: How the Clinic Made Gender Sandra Eder, 2022-06-07 An eye-opening exploration of the medical origins of gender in modern US history. Today, a world without "gender" is hard to imagine. Gender is at the center of contentious political and social debates, shapes policy decisions, and informs our everyday lives. Its formulation, however, is lesser known: Gender was first used in clinical practice. This book tells the story of the invention of gender in American medicine, detailing how it was shaped by mid-twentieth-century American notions of culture, personality, and social engineering. Sandra Eder shows how the concept of gender transformed from a pragmatic tool in the sex assignment of children with intersex traits in the 1950s to an essential category in clinics for transgender individuals in the 1960s. Following gender outside the clinic, she reconstructs the variable ways feminists integrated gender into their theories and practices in the 1970s. The process by which ideas about gender became medicalized, enforced, and popularized was messy, and the route by which gender came to be understood and applied through the treatment of patients with intersex traits was fraught and contested. In historicizing the emergence of the sex/gender binary, Eder reveals the role of medical practice in developing a transformative idea and the interdependence between practice and wider social norms that inform the attitudes of physicians and researchers. She shows that ideas like gender can take on a life of their own and may be used to question the normative perceptions they were based on. Illuminating and deeply researched, the book closes a notable gap in the history of gender and will inspire current debates on the relationship between social norms and medical practice.

us history regents 2023: Race and Education in New Orleans Walter Stern, 2018-05-04 Surveying the two centuries that preceded Jim Crow's demise, *Race and Education in New Orleans* traces the course of the city's education system from the colonial period to the start of school

desegregation in 1960. This timely historical analysis reveals that public schools in New Orleans both suffered from and maintained the racial stratification that characterized urban areas for much of the twentieth century. Walter C. Stern begins his account with the mid-eighteenth-century kidnapping and enslavement of Marie Justine Sirmir, who eventually secured her freedom and played a major role in the development of free black education in the Crescent City. As Sirmir's story and legacy illustrate, schools such as the one she envisioned were central to the black antebellum understanding of race, citizenship, and urban development. Black communities fought tirelessly to gain better access to education, which gave rise to new strategies by white civilians and officials who worked to maintain and strengthen the racial status quo, even as they conceded to demands from the black community for expanded educational opportunities. The friction between black and white New Orleanians continued throughout the nineteenth century and well into the twentieth, when conflicts over land and resources sharply intensified. Stern argues that the post-Reconstruction reorganization of the city into distinct black and white enclaves marked a new phase in the evolution of racial disparity: segregated schools gave rise to segregated communities, which in turn created structural inequality in housing that impeded desegregation's capacity to promote racial justice. By taking a long view of the interplay between education, race, and urban change, Stern underscores the fluidity of race as a social construct and the extent to which the Jim Crow system evolved through a dynamic though often improvisational process. A vital and accessible history, *Race and Education in New Orleans* provides a comprehensive look at the ways the New Orleans school system shaped the city's racial and urban landscapes.

us history regents 2023: Cannabis Lucas Richert, Jim Mills, 2021-08-03 Cannabis consumption, commerce, and control in global history, from the nineteenth century to the present day. This book gathers together authors from the new wave of cannabis histories that has emerged in recent decades. It offers case studies from Africa, Asia, the Americas, Europe, and the Middle East. It does so to trace a global history of the plant and its preparations, arguing that Western colonialism shaped and disseminated ideas in the nineteenth century that came to drive the international control regimes of the twentieth. More recently, the emergence of commercial interests in cannabis has been central to the challenges that have undermined that cannabis consensus. Throughout, the determination of people around the world to consume substances made from the plant has defied efforts to stamp them out and often transformed the politics and cultures of using them. These texts also suggest that globalization might have a cannabis history. The migration of consumers, the clandestine networks established to supply them, and international cooperation on control may have driven much of the interconnectedness that is a key feature of the contemporary world.

us history regents 2023: Taking the Field Amy Kohout, 2023 Published in Cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. In the late nineteenth century, at a time when Americans were becoming more removed from nature than ever before, U.S. soldiers were uniquely positioned to understand and construct nature's ongoing significance for their work and for the nation as a whole. American ideas and debates about nature evolved alongside discussions about the meaning of frontiers, about what kind of empire the United States should have, and about what it meant to be modern or to make "progress." Soldiers stationed in the field were at the center of these debates, and military action in the expanding empire brought new environments into play. In Taking the Field Amy Kohout draws on the experiences of U.S. soldiers in both the Indian Wars and the Philippine-American War to explore the interconnected ideas about nature and empire circulating at the time. By tracking the variety of ways American soldiers interacted with the natural world, Kohout argues that soldiers, through their words and their work, shaped Progressive Era ideas about both American and Philippine environments. Studying soldiers on multiple frontiers allows Kohout to inject a transnational perspective into the

environmental history of the Progressive Era, and an environmental perspective into the period's transnational history. Kohout shows us how soldiers—through their writing, their labor, and all that they collected—played a critical role in shaping American ideas about both nature and empire, ideas that persist to the present.

us history regents 2023: Continental Reckoning Elliott West, 2023-02 Winner of Columbia University's 2024 Bancroft Prize in American History 2024 Spur Award Winner Named a Best Civil War Book of 2023 by Civil War Monitor In *Continental Reckoning* renowned historian Elliott West presents a sweeping narrative of the American West and its vital role in the transformation of the nation. In the 1840s, by which time the United States had expanded to the Pacific, what would become the West was home to numerous vibrant Native cultures and vague claims by other nations. Thirty years later it was organized into states and territories and bound into the nation and world by an infrastructure of rails, telegraph wires, and roads and by a racial and ethnic order, with its Indigenous peoples largely dispossessed and confined to reservations. Unprecedented exploration uncovered the West's extraordinary resources, beginning with the discovery of gold in California within days of the United States acquiring the territory following the Mexican-American War. As those resources were developed, often by the most modern methods and through modern corporate enterprise, half of the contiguous United States was physically transformed. *Continental Reckoning* guides the reader through the rippling, multiplying changes wrought in the western half of the country, arguing that these changes should be given equal billing with the Civil War in this crucial transition of national life. As the West was acquired, integrated into the nation, and made over physically and culturally, the United States shifted onto a course of accelerated economic growth, a racial reordering and redefinition of citizenship, engagement with global revolutions of science and technology, and invigorated involvement with the larger world. The creation of the West and the emergence of modern America were intimately related. Neither can be understood without the other. With masterful prose and a critical eye, West presents a fresh approach to the dawn of the American West, one of the most pivotal periods of American history.
