army basic training start dates 2023 fort sill: A Spirit of Service John Norberg, 2024-12-01 A Spirit of Service: Purdue University and the United States Military is a richly illustrated, comprehensive look at the intersection of this great land-grant university and the US military since classes first began in 1874. Spearheaded by the Purdue University College of Engineering in recognition of its 150th anniversary, this book examines how Purdue Boilermakers have played a consequential role in defending democracy, freedom, and independence in times of war and great duress. Pioneering Purdue contributions include more than one hundred faculty working on the Manhattan Project, learning how to better cool machine gun barrels, and making radar practical—all during World War II—as well as the transition from vacuum tubes to semiconductors, Dorothy

Stratton advancing the role of women in the military, the founding of the National Society of Black Engineers, the first School of Engineering Education, the first university airport, and, most famously, Neil Armstrong, a US Navy officer and Purdue alumnus, and the first human to set foot on the moon. Today Purdue is at the forefront of drones, hypersonics, energetics, artificial intelligence, space exploration, cybersecurity, semiconductors, and much more. In fact, approximately one-third of US spaceflights have included a Boilermaker astronaut, and many of those alumni served in the military. This large number of astronauts partially stems from a Purdue-Air Force Academy program to provide advanced degrees to graduating officers. A Spirit of Service tells the stories of men and women who lived this history, from ROTC students to a Medal of Honor recipient, from soldiers at the front during the Great War to a man who witnessed the December 7, 1941 attack on Pearl Harbor, from a pilot who led thousands of planes in bombing missions over Germany during World War II to military astronauts, from trailblazing female officers and pilots to twenty-first-century teachers and researchers who are creating the future. This volume records the stories of Purdue men and women whose patriotism, leadership, and heroism have preserved life, liberty, and the pursuit of happiness for generations of Americans—past, present, and future.

army basic training start dates 2023 fort sill: Commanding Professionalism William Stuart Nance, 2023-10-03 When one thinks of influential World War II military figures, five-star generals such as Dwight D. Eisenhower and Omar Bradley instantly come to mind. As important as these central figures were to the Second World War, the conflict produced equally effective lower-profile leaders whose influence had an undeniable impact. Among these leaders are William Simpson, commander of the US Ninth Army, and James Moore, his chief of staff. Working in tandem, the pair helmed a unit that gained recognition as uncommonly normal, an affectionate designation driven by their steadfast professionalism in all endeavors. It was their unobtrusive leadership style that relegated these career military men to the footnotes of military history. *Commanding Professionalism: Simpson, Moore, and the Ninth US Army* corrects this historical oversight by examining the achievements of these overlooked heroes. Focusing on Simpson and Moore's careers from 1940 through the end of World War II, author William Stuart Nance recounts the pair's working relationship. Together, they successfully maneuvered through the squabbling of the American and British forces and developed an army admired for its consistency of conduct and military prowess, capable of resisting the complex external and political machinations of the time. Simpson and Moore's unflinching devotion to the greater good and their steady handle on the dynamics of command/staff relationships proved essential to the war effort and its ultimate success. Their example, Nance argues, remains aspirational and worthy of emulation in the military command structure of today.

"For twenty years prior to World War II General Arnold was a tireless and effective evangelist for American air power. No other foresaw more clearly than he the revolutionary impact of the airplane upon the methods and conduct of war. Hap Arnold performed still another public duty in recording for us the results and the conclusions of his lifetime experiences. Whatever he has to say about air power deserves the close attention of all his fellow citizens." — General Dwight D. Eisenhower, US Army "The compellingly interesting autobiography of a great soldier-statesman and one of the finest presentations I have ever seen of the history of American military aviation." — Lieutenant General James H. Doolittle, US Air Force "[T]his book is more than the chronicle of a flier's life; it is in a sense a saga of United States air power, and particularly a top-level picture of the United States Army Air Force in World War II... *Global Mission* will take an important place in the growing library of war books... a delightful book; it brings out so strongly the lovable personality of "Hap" Arnold. It is an important book... these reminiscences are a monument to him." — Hanson W. Baldwin, *The New York Times* "[An] interesting and important book" — Robert Gale Woolbert, *Foreign Affairs* "There are many groups of people who will profit by a careful reading of *Global Mission*. As General Bradley well said in a recent letter to me, 'It is "must" reading for the young military men of today who will have to be the Marshalls and Arnolds and Kings in any future emergency.' The thinking people of the United States will make wiser decisions in the selection of their leaders, both military and civil, if they have read *Global Mission*. They will understand more clearly the frightful errors which have been made in the past and their cost in blood and treasure... Any who are tempted to be pacifists or isolationists in the future had better read *Global Mission* to learn the implications which can flow from false doctrines. The historian who has the difficult job of painting the true picture of the Second World War needs to read *Global Mission* for background. Here alone will he find some of the missing pieces in his puzzle... by any yardstick, [*Global Mission*] is worthy reading for any American." — Lieutenant General Ira C. Eaker, USAF (Ret.), *Air University Quarterly Review* "[General Arnold's] book is a very important contribution to the history of the Second World War; one reads it with passionate interest from start to finish. It is written in a lively way and also with that frankness, that outspokenness, which always surprises French people from the pen of such a high authority. It is also extremely revealing about the American character." — René Jouan, *Revue d'histoire de la Deuxième Guerre mondiale* "[This] book will be of enduring value." — Ordnance

army basic training start dates 2023 fort sill: Indian Wars Everywhere Stefan Aune, 2023 References to the Indian Wars, those conflicts that accompanied US continental expansion, suffuse American military history. From Black Hawk helicopters to the exclamation Geronimo used by paratroopers jumping from airplanes, words and images referring to Indians have been indelibly linked with warfare. In *Indian Wars Everywhere*, Stefan Aune shows how these resonances signal a deeper history, one in which the Indian Wars function as a shadow doctrine that influences US military violence. The United States' formative acts of colonial violence persist in the actions, imaginations, and stories that have facilitated the spread of American empire, from the savage wars of the nineteenth century to the counterinsurgencies of the Global War on Terror. Ranging across centuries and continents, *Indian Wars Everywhere* considers what it means for the conquest of Native peoples to be deemed a success that can be used as a blueprint for modern warfare.

army basic training start dates 2023 fort sill: Point of the Spear Eduardo Infante Antonio, 2023-07-20 Why I wrote this Book I became interested in writing about the Vietnam War from my own perspective when I saw TV documentaries showing marines and some army soldiers indiscriminately burning Vietnamese thatch houses, destroying livestock and capturing old men, women and children. Those documentaries give a negative impression to the American public, that all American soldiers did that. This book is to tell the readers from my own personal combat experiences, that there were American soldiers and ARVN Rangers who fought and died courageously against the Viet Cong guerillas and North Vietnamese Army soldiers without harming old men, women or children. On my tour of duty from 1966 to 1967, my recon platoon, my 4th/12th Battalion, my 199th Brigade and the gallant South Vietnamese Black Panther Rangers that fought and died beside us, did not burn any thatch houses or shoot any innocent civilians.

army basic training start dates 2023 fort sill: Outnumbered 20-1 William P. Collier, 2023-01-03 *Outnumbered 20 to 1* story is a force that transcends ages. Through the development of humankind's culture, the holy vessel of story has exerted a power that defines generations. A good story has the ability to entertain; a great story has the ability to inspire. But a story like *Outnumbered 20 to 1* possesses the ability to transform, and so much more. Now retired, Colonel Bill Collier fought firsthand through the devastation and brutality of the Vietnam war. And like many of his fellow soldiers that returned home, he kept many of the stories of his experiences to himself. However, there is one story that Collier knew must be shared in his lifetime. This is the story of his harrowing experience at The Battle of Mo Duc — one of Vietnam's final battles leading up to the signing of a peace agreement that would conclude the war. The Battle of Mo Duc follows then-Major Bill Collier and his team into a hopelessly unwinnable situation with all of the odds stacked against them. Yet even as they stared down their seemingly certain defeat, Collier and his men persevered to victory through what can only be described as the grace of God Himself. *Outnumbered 20 to 1* is a one-of-a-kind war story and so much more. It's a recounting of a remarkable life experience that occurs even less frequently than once in a lifetime. Collier's story is not only a story of perseverance and heroism but of our communion with the divine fabric of existence itself.

army basic training start dates 2023 fort sill: No Sacrifice Too Great Gregory Fontenot, 2023-06-21 The U.S. 1st Infantry Division (1st ID), familiarly known as the Big Red One, adapted to dynamic battlefield conditions throughout the course of its deployment during World War II by

innovating and altering behavior, including tactics, techniques, and procedures. Both the Division's leaders and soldiers accomplished this by thinking critically about their experiences in combat and wasting little time in putting lessons learned to good use. Simply put, they learned on the job—in battle and after battle—and did so quickly. In telling the Division's WWII story, which includes an extensive photographic essay featuring many previously unpublished images, Gregory Fontenot includes the stories of individual members of the Big Red One, from high-ranking officers to enlisted men fresh off the streets of Brooklyn, both during and after the conflict. Colonel Fontenot's rare ability to combine expert analysis with compelling narrative history makes *No Sacrifice Too Great* an absorbing read for anyone interested in the military history of the United States.

army basic training start dates 2023 fort sill: *World War I and the Foundations of American Intelligence* Mark Stout, 2023-11-16 Ask an American intelligence officer to tell you when the country started doing modern intelligence and you will probably hear something about the Office of Strategic Services in World War II or the National Security Act of 1947 and the formation of the Central Intelligence Agency. What you almost certainly will not hear is anything about World War I. In *World War I and the Foundations of American Intelligence*, Mark Stout establishes that, in fact, World War I led to the realization that intelligence was indispensable in both wartime and peacetime. After a lengthy gestation that started in the late nineteenth century, modern American intelligence emerged during World War I, laying the foundations for the establishment of a self-conscious profession of intelligence. Virtually everything that followed was maturation, reorganization, reinvigoration, or reinvention. World War I ushered in a period of rapid changes. Never again would the War Department be without an intelligence component. Never again would a senior American commander lead a force to war without intelligence personnel on their staff. Never again would the United States government be without a signals intelligence agency or aerial reconnaissance capability. Stout examines the breadth of American intelligence in the war, not just in France, not just at home, but around the world and across the army, navy, and State Department, and demonstrates how these far-flung efforts endured after the Armistice in 1918. For the first time, there came to be a group of intelligence practitioners who viewed themselves as different from other soldiers, sailors, and diplomats. Upon entering World War II, the United States had a solid foundation from which to expand to meet the needs of another global hot war and the Cold War that followed.

In 1993 Lieutenant James Lechner, a member of the 3rd Ranger Battalion, was selected for a top secret special operations task force being sent to Mogadishu, Somalia, to capture the insurgent leader Mohamed Farah Aideed. In early October, after weeks on the ground and conducting a number of raids in the city, the Task Force is called upon to conduct a daring daylight mission into the heart of Aideed's territory. During the raid, following the initial dangerous fast rope insertion and subsequent capture of a group of Aideed's lieutenants, one of the Task Force Black Hawk helicopters is shot down and Lechner and his comrades are soon caught up in the fiercest combat involving US forces since the Vietnam War. In the middle of the hostile city, deep in the enemy's stronghold, the small group of Rangers and special operators now find themselves fighting not only to rescue the downed

helicopter's crewmen, but also to save their own lives. This first-hand account tells the story of how these elite warriors were able to stand together and prevail against incredible odds. It gives the reader the perspective of an Army Ranger fighting on the ground, combined with professional military analysis, in a groundbreaking book that tells the complete story with never-before-revealed details.

army basic training start dates 2023 fort sill: *Mel Brooks* Jeremy Dauber, 2023-01-01 A spirited dive into the life and career of a performer, writer, and director who dominated twentieth-century American comedy Mel Brooks, born Melvin Kaminsky in Brooklyn in 1926, is one of the great comic voices of the twentieth century. Having won almost every entertainment award there is, Brooks has straddled the line between outsider and insider, obedient and rebellious, throughout his career, making out-of-bounds comedy the American mainstream. Jeremy Dauber argues that throughout Brooks's extensive body of work--from *Your Show of Shows* to *Blazing Saddles* to *Young Frankenstein* to *Spaceballs*--the comedian has seen the most success when he found a balance between his unflagging, subversive, manic energy and the constraints imposed by comedic partners, the Hollywood system, and American cultural mores. Dauber also explores how Brooks's American Jewish humor went from being solely for niche audiences to an essential part of the American mainstream, paving the way for generations of Jewish (and other) comedians to come.

army basic training start dates 2023 fort sill: *John J. Pershing and the American Expeditionary Forces in World War I, 1917-1919* John T. Greenwood, 2023-12-19 General of the Armies John J. Pershing (1860-1948) had a long and decorated military career but is most famous for leading the American Expeditionary Forces in World War I. He published a memoir, *My Experiences in the World War*, and has been the subject of numerous biographies, but the literature regarding this towering figure and his enormous role in the First World War deserves to be expanded to include a collection of his wartime correspondence. Carefully edited by John T. Greenwood, volume 3 of *John J. Pershing and the American Expeditionary Forces in World War I, 1917-1919* covers the period of January 1 through March 20, 1918, as General Pershing encounters logistical and organizational challenges that originated in the last months of 1917. With the collapse of the Eastern Front and Allied defeats in Italy, British and French commanders were preparing for a renewed German offensive and proposed that American troops be put under their control for training and frontline combat in order to replenish losses. Pershing's diary entries indicate that he rejected these proposals and yet offered four segregated African American regiments to be placed under French control. The conclusion of the AEF autonomy debate allowed Pershing to focus on reorganizing the General Headquarters of the AEF, establishing effective communication lines, and contracting Allied European governments to produce armaments for the AEF with American raw materials. In March 1918, Maj. Gen. Peyton C. March replaced Gen. Tasker H. Bliss as chief of staff. The sources included in this edition show the origin of Pershing and March's personal feud, which persisted well after the war. Pershing's letters during this time period convey a long and arduous struggle to build an American army at the front. Together, these volumes of wartime correspondence provide new insight into the work of a legendary soldier and the historic events in which he participated.

army basic training start dates 2023 fort sill: *Behold the Walls* Clara Luper, 2023-07-25 On August 19, 1958, Clara Luper and thirteen Black youth walked into Katz Drug Store in Oklahoma City and sat down at the lunch counter. When they tried to order, they were denied service. As they sat in silence, refusing to leave, the surrounding white customers unleashed a torrent of threats and racial slurs. This first organized sit-in in Oklahoma--almost two years before the more famous sit-ins in Greensboro, North Carolina--sparked other demonstrations in Oklahoma and other states. *Behold the Walls* is Luper's engrossing firsthand account of how the movement she helped launch ended legal racial segregation. First published in 1979, *Behold the Walls* now features a new introduction and 33 newly selected historical photos. Luper's direct, unvarnished account captures the immediacy of the events she witnessed. As a Black woman, Luper refused to let either racism or sexism deter her from stepping forth as a leader. Born in 1923, Clara Luper taught history in Oklahoma public schools and led the NAACP Youth Council. The students who sat in at Katz Drug

and other businesses belonged to that organization. Luper highlights the contributions of others, especially young people, in breaking down the walls of segregation in Oklahoma through numerous demonstrations, marches, and voter registration campaigns. This commemorative edition of Luper's eye-opening autobiography, published near what would have been her 100th birthday, as well as the 65th anniversary of the sit-ins, offers invaluable insight into the history of protest in the early years of the civil rights movement. With racial inequality still at the forefront of national debate, Behold the Walls places Luper's efforts in the larger national context of the struggle to resist injustice and inspire positive change.

army basic training start dates 2023 fort sill: The Watchdog Steve Drummond, 2023-05-09
The story of how a little-known junior senator fought wartime corruption and, in the process, set himself up to become vice president and ultimately President Harry Truman. Months before Pearl Harbor, Franklin D. Roosevelt knew that the United States was on the verge of entering another world war for which it was dangerously ill-prepared. The urgent times demanded a transformation of the economy, with the government bankrolling the unfathomably expensive task of enlisting millions of citizens while also producing the equipment necessary to successfully fight—all of which opened up opportunities for graft, fraud and corruption. In *The Watchdog*, Steve Drummond draws the reader into the fast-paced story of how Harry Truman, still a newcomer to Washington politics, cobbled together a bipartisan team of men and women that took on powerful corporate entities and the Pentagon, placing Truman in the national spotlight and paving his path to the White House. Drawing on the largely unexamined records of the Truman Committee as well as oral histories, personal letters, newspaper archives and interviews, Steve Drummond—an award-winning senior editor and executive producer at NPR—brings the colorful characters and intrigue of the committee's work to life. *The Watchdog* provides readers with a window to a time that was far from perfect but where it was possible to root out corruption and hold those responsible to account. It shows us what can be possible if politicians are governed by the principles of their office rather than self-interest.

army basic training start dates 2023 fort sill: First In, Last Out John D Howard, 2023-06-14
A Vietnam veteran recounts his experience through two tours of duty—early in the conflict and then in its final stages. Fresh out of West Point, John Howard arrived for his first tour in Vietnam in 1965, the first full year of escalation when U.S. troop levels increased dramatically, from 23,000 to 184,000. When Howard returned for a second tour in 1972, troop strength stood at 24,000 and would dwindle to a mere fifty the following year. He thus participated in the very early and very late stages of American military involvement in the Vietnam War. Howard's two tours—the first as a platoon commander and member of an elite counter guerrilla force, and the second as a senior advisor to the South Vietnamese—provide a fascinating lens through which to view not only one soldier's experience in Vietnam, but also the country's.

Arming East Asia: Deterring China in the Early Cold War examines President Eisenhower's mutual security program in East Asia and explains how that administration worked to contain China. This historical chronicle offers insights and perspectives regarding how to address Sino-American tensions and maintain a free and open Asia-Pacific. Eric Setzekorn argues that President Eisenhower expanded and solidified the U.S. presence in East Asia through use of military aid and military advisory efforts in sharp contrast to the use of U.S. military forces by Presidents Truman, Kennedy and Johnson. In South Korea, Taiwan, Japan, and Southeast Asia (particularly in Thailand and South Vietnam), the United States spent billions of dollars and significant time developing local military forces. By the end of Eisenhower's two terms, a force of over 1.4 million Allied soldiers in East Asia had been trained, equipped, and often paid through American military assistance. Eisenhower's mutual security policies were vital in building local allies, and by the end of the 1950s, East Asia was beginning a long period of growth that would make it the economic heart of the world within fifty years. American policies that created close ties and involvement in the affairs of allied nations also constrained allies, such as Chiang Kai-shek in Taiwan, and Syngman Rhee in South Korea, who often

sought to take direct action against the PRC. The heavy role of American military advisors and experts “on the ground” in East Asia also profoundly shaped the character of these nations, all of which were emerging from war, by putting massive resources into the government administration and military forces of newly formed states. With an assertive China using its growing political and military power throughout East Asia, contemporary U.S. security challenges are similar to the situation faced in that earlier contentious era. Eisenhower’s policies from 1953 to 1961 clearly demonstrate an awareness of the possibilities for military, economic and political growth in East Asia, and the challenges of deterring Chinese (PRC) expansion during the early Cold War. The views expressed in this publication are those of the author and do not necessarily reflect the official policy or position of the Department of Defense or the U.S. government.

army basic training start dates 2023 fort sill: Battlefield and Classroom Richard Henry Pratt, 2023-02-10 General Richard Henry Pratt, best known as the founder and longtime superintendent of the influential Carlisle Indian School in Pennsylvania, profoundly shaped Indian education and federal Indian policy at the turn of the twentieth century. Pratt’s long and active military career included eight years of service as an army field officer on the western frontier. During that time he participated in some of the signal conflicts with Indians of the southern plains, including the Washita campaign of 1868-1869 and the Red River War of 1874-1875. He then served as jailor for many of the Indians who surrendered. His experiences led him to dedicate himself to Indian education, and from 1879 to 1904, still on active military duty, he directed the Carlisle school, believing that the only way to save Indians from extinction was to remove Indian youth to nonreservation settings and there inculcate in them what he considered civilized ways. Pratt’s memoirs, edited by Robert M. Utley and with a new foreword by David Wallace Adams, offer insight into and understanding of what are now highly controversial turn-of-the-century Indian education policies.

Major Clark, 2023-08-31 Vivid, first-hand account of a unique and significant World War II all-black U.S. Army unit—the 597th Field Artillery Battalion, 92nd Division. The 597th Field Artillery Battalion, 92nd Division, was the first, last, and only all-black officered direct support field artillery battalion committed to combat in the history of the U.S. Army. It was the first all-black unit in a combat division and, together with the 600th Field Artillery Battalion, constituted the only all-black units in any combat division. Alongside impressive achievements on the battlefield in Italy in 1944-45, the unit provided more key command and staff positions exclusively for black field artillery officers than

any other U.S. Army unit in combat, giving combat training and experience to more senior black field artillery officers than any of the other 16 black field artillery battalions during World War II. Colonel Wendell Derricks worked to shelter his troops from the worst of the racism exhibited during the war and, due to his ability to envision an integrated postwar army, he provided unique leadership opportunities for his senior officers. The alumni of the 597th Field Artillery Battalion have an impressive record of success, many of them were inducted into the Field Artillery Hall of Fame; some served at the Pentagon, including Lieutenant Colonel Clark; and others forged successful careers in the civilian world.

Fifty years after they fought in Vietnam, they worked it out. They grew up together and went to the same schools, yet they had never met. They served in the army together, were both shot down in helicopters, and lost some of their best friends in combat, but they had to wait to meet. The answer was not in combat, military training, or book learning. They were tough soldiers who were trained to kill. Ray was a helicopter pilot flying some of the army's most advanced killing machines. Bruce was an airborne ranger who deployed the army's artillery with precision. They did their jobs well. Ray and Bruce needed to find an answer to the world's struggle. They did. See if you agree.

Busha, Carol Apacki, 2023-05-28 Major Charles Carpenter made headlines during the Second World War when he affixed six bazookas to his tiny Piper L-4 observation plane and began attacking German tanks. "Bazooka Charlie" and his plane "Rosie the Rocketeer" were profiled in a variety of military and civilian publications, including the iconic Stars & Stripes. The major was a high school educator in the civilian world, teaching history and coaching football. In 1945, the dashing pilot was forced out of the cockpit and into a hospital bed by Hodgkin's lymphoma, which was discovered in his neck. In addition to the enemy and terminal cancer, Carpenter also battled cynicism and guilt, particularly in regard to the state of his marriage, which was on the brink of failure by the time he returned home from Europe. Charles Carpenter died in 1966, having resumed his career, salvaged his marriage, and long outlived the timeline afforded him by his doctors in the initial prognosis. This revealing biography of the famous pilot was made possible through the collaboration of noted aviation author and magazine editor Jim Busha, and Carpenter's daughter, Carol Apacki. Along with memories of her father in his postwar years, Carol provided a treasure trove of wartime correspondence between Charles and his wife, Elda Carpenter.

In fact, Mismo Fire Insurance Company is so certain that the fire was deliberately set that it has denied the insurance claim. Jackson, the sole stockholder in the financially troubled corporation, has filed a civil action to recover damages against Mismo for the denied claim. Mismo asserts that Jackson conspired with others to burn the plant in order to fraudulently collect the insurance policy. Did we mention that the deceased Avery is a suspected "torch," implicated in the burning of two other commercial buildings in Nita City? That reputation isn't helping Jackson's case, but he claims he hired Avery, a talented designer, to help him modernize the Flinders plant. The intrigue grows when it is revealed that one of the witnesses against Jackson has a serious axe to grind that could be clouding her vision. army basic training start dates 2023 fort sill: Defending the Constitution behind Enemy Lines Robert A. Green, 2023-07-04 The story of a silenced minority who put their constitutional oaths before all else to keep our Founding Fathers' great gift of liberty alive. Defending the Constitution Behind Enemy Lines is an explosive, tell-all book, detailing the military COVID-19 vaccine mandate, and the resistance to that mandate by service members who could not, in good conscience, go along. As an actively serving Navy Commander, Robert A. Green Jr. removes the veil of military secrecy and complexity to shed light on the related unlawfulness and the official cover-up being committed by certain DoD leaders. His deep dive into the current crisis details the harms perpetrated against service members and their families as well as the destruction of military readiness that resulted. Standing upon his First Amendment rights, the first-time author analyzes the current crisis in light of the challenges faced by our Founding Fathers. His message to the American people is clear: The crisis our military is facing will only be solved by following in the footsteps of our Founding Fathers and returning to an adherence to the Constitution that our forebears sacrificed everything to leave us.
