48 laws of power free to read: The Candle and the Flame Nafiza Azad, 2019-05-14 Azad's debut YA fantasy is set in a city along the Silk Road that is a refuge for those of all faiths, where a young woman is threatened by the war between two clans of powerful djinn. Fatima lives in the city of Noor, a thriving stop along the Silk Road. There the music of myriad languages fills the air, and people of all faiths weave their lives together. However, the city bears scars of its recent past, when the chaotic tribe of Shayateen djinn slaughtered its entire population -- except for Fatima and two other humans. Now ruled by a new maharajah, Noor is protected from the Shayateen by the Ifrit, djinn of order and reason, and by their commander, Zulfikar. But when one of the most potent of the Ifrit dies, Fatima is changed in ways she cannot fathom, ways that scare even those who love her. Oud in hand, Fatima is drawn into the intrigues of the maharajah and his sister, the affairs of Zulfikar and the djinn, and the dangers of a magical battlefield. In this William C. Morris YA Debut Award finalist novel, Nafiza Azad weaves an immersive tale of magic and the importance of names; fiercely independent women; and, perhaps most importantly, the work for harmony within a city of a thousand cultures and cadences.

48 laws of power free to read: Illusions of Reality James H. Korn, 1997-03-20 Some psychologists think it is almost always wrong to deceive research subjects, while others think the use of deception is essential if significant human problems are to receive scientific study. Illusions of Reality shows how deception is used in psychological research to create illusions of reality—situations that involve research subjects without revealing the true purpose of the experiment. The book examines the origins and development of this practice that have led to some of the most dramatic and controversial studies in the history of psychology. Social psychology may be the only area of research where the research methods sometimes are as interesting as the results. The most impressive experiments in this field produce their impact by creating situations that lead research subjects to believe that they are taking part in something other than the true experiment, or situations where subjects are not even aware that an experiment is being conducted. These illusions of reality are created by using various forms of deception, such as providing false information to people about how they perform on tests or by using actors who play roles. The research described in Illusions of Reality includes significant and controversial experiments in the history of psychology that sometimes took on the characteristics of dramatic stage productions. The ethical issues raised by this research are discussed, and the practice of using deception in research is placed in the context of American cultural values.

48 laws of power free to read: The 48 Laws of Black Empowerment Dante Fortson, 2018-11-12 The 48 Laws of Power was written by Robert Greene and first published in 1998. It is often praised as one of the best books to read if you want to get ahead in life. This got me to thinking, why isn't there anything like this for our community? We have a lot of people talking about what we need to do, what we should do, and what we could do as a community, but nothing concrete that we could all sit down with, learn from, and relate to on an individual level. The 48

Laws of Black Empowerment was written to bridge the gap between individual action and a united black community. This book is broken down into six areas of importance to the black community. 1. Personal 2. Family 3. Finance 4. Community 5. Philanthropy 6. Activism Working to individually improve ourselves in these areas will automatically result in a shift in black community consciousness. While The 48 Laws of Power is a great book, it just wasn't written with our community or needs in mind. The 48 Laws of Black Empowerment is about cultivating success in business and life, while also helping our friends, family and community succeed with us.

48 laws of power free to read: The Effective Executive Peter Drucker, 2018-03-09 The measure of the executive, Peter Drucker reminds us, is the ability to 'get the right things done'. Usually this involves doing what other people have overlooked, as well as avoiding what is unproductive. He identifies five talents as essential to effectiveness, and these can be learned; in fact, they must be learned just as scales must be mastered by every piano student regardless of his natural gifts. Intelligence, imagination and knowledge may all be wasted in an executive job without the acquired habits of mind that convert these into results. One of the talents is the management of time. Another is choosing what to contribute to the particular organization. A third is knowing where and how to apply your strength to best effect. Fourth is setting up the right priorities. And all of them must be knitted together by effective decision-making. How these can be developed forms the main body of the book. The author ranges widely through the annals of business and government to demonstrate the distinctive skill of the executive. He turns familiar experience upside down to see it in new perspective. The book is full of surprises, with its fresh insights into old and seemingly trite situations.

I refused to throw more garbage into that well of circular thinking. What I give you instead is a way for you to change your mind into a confidence building machine.
