48 laws of power free reading: Illusions of Reality James H. Korn, 1997-03-20 Some psychologists think it is almost always wrong to deceive research subjects, while others think the use of deception is essential if significant human problems are to receive scientific study. *Illusions of Reality* shows how deception is used in psychological research to create illusions of reality—situations that involve research subjects without revealing the true purpose of the experiment. The book examines the origins and development of this practice that have led to some of the most dramatic and controversial studies in the history of psychology. Social psychology may be the only area of research where the research methods sometimes are as interesting as the results. The most impressive experiments in this field produce their impact by creating situations that lead research subjects to believe that they are taking part in something other than the true experiment, or situations where subjects are not even aware that an experiment is being conducted. These illusions of reality are created by using various forms of deception, such as providing false information to people about how they perform on tests or by using actors who play roles. The research described in *Illusions of Reality* includes significant and controversial experiments in the history of psychology that sometimes took on the characteristics of dramatic stage productions. The ethical issues raised by this research are discussed, and the practice of using deception in research is placed in the context of American cultural values.

LONGLISTED FOR THE JAMES CROPPER WAINWRIGHT PRIZE LONGLIST 2022 ** 'Really packs a punch' Aja Barber, author of *Consumed: The Need for Collective Change: Colonialism, Climate Change, and Consumerism* 'Will open the minds of even the most ardent denier of climate change and/or systemic racism. If there's one book that will help you to be an effective activist for climate justice, it's this one.' Dr Shola Mos-Shogbamimu, author of *This is Why I Resist* 'Accessible. Poignant. Challenging.' Nnimmo Bassey, environmentalist and author of *To Cook a Continent: Destructive Extraction and the Climate Crisis in Africa* When we talk about racism, we often mean personal prejudice or institutional biases. Climate change doesn't work that way. It is structurally racist, disproportionately caused by majority White people in majority White countries, with the damage unleashed overwhelmingly on people of colour. The climate crisis reflects and reinforces racial injustices. In this eye-opening book, writer and environmental activist Jeremy Williams takes us on a short, urgent journey across the globe - from Kenya to India, the USA to Australia - to understand how White privilege and climate change overlap. We'll look at the environmental facts, hear the experiences of the people most affected on our planet and learn from the activists leading the change. It's time for each of us to find our place in the global struggle for justice.

48 laws of power free reading: The 48 Laws of Black Empowerment Dante Fortson, 2018-11-12 The *48 Laws of Power* was written by Robert Greene and first published in 1998. It is often praised as one of the best books to read if you want to get ahead in life. This got me to thinking, why isn't there anything like this for our community? We have a lot of people talking about what we need to do, what we should do, and what we could do as a community, but nothing concrete that we could all sit down with, learn from, and relate to on an individual level. The *48 Laws of Black Empowerment* was written to bridge the gap between individual action and a united black community. This book is broken down into six areas of importance to the black community. 1. Personal 2. Family 3. Finance 4. Community 5. Philanthropy 6. Activism Working to individually improve ourselves in these areas will automatically result in a shift in black community consciousness. While *The 48 Laws of Power* is a great book, it just wasn't written with our community or needs in mind. The *48 Laws of Black Empowerment* is about cultivating success in business and life, while also helping our friends, family and community succeed with us.

48 laws of power free reading: Economic Facts and Fallacies Thomas Sowell, 2011-03-22 Thomas Sowell "both surprises and overturns received wisdom" in this indispensable examination of widespread economic fallacies (The Economist) Economic Facts and Fallacies exposes some of the most popular fallacies about economic issues-and does so in a lively manner and without requiring any prior knowledge of economics by the reader. These include many beliefs widely disseminated in the media and by politicians, such as mistaken ideas about urban problems, income differences, male-female economic differences, as well as economics fallacies about academia, about race, and about Third World countries. One of the themes of Economic Facts and Fallacies is that fallacies are not simply crazy ideas but in fact have a certain plausibility that gives them their staying power-and makes careful examination of their flaws both necessary and important, as well as sometimes humorous. Written in the easy-to-follow style of the author's Basic Economics, this latest book is able to go into greater depth, with real world examples, on specific issues.
