answers to emergency preparedness merit badge: Into the Wild Jon Krakauer, 2009-09-22 NATIONAL BESTSELLER • In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. Four months later, his decomposed body was found by a moose hunter. This is the unforgettable story of how Christopher Johnson McCandless came to die. It may be nonfiction, but *Into the Wild* is a mystery of the highest order. —Entertainment Weekly McCandless had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Not long after, he was dead. *Into the Wild* is the mesmerizing, heartbreaking tale of an enigmatic young man who goes missing in the wild and whose story captured the world’s attention. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

answers to emergency preparedness merit badge: The Unlikely Thru-Hiker Derick Lugo, 2019 Derick Lugo had never been hiking. He didn't even know if he liked being outside all that

much. He certainly couldn't imagine going more than a day without manicuring his goatee. But with a job overseas cut short and no immediate plans, this fixture of the greater New York comedy circuit began to think about what he might do with months of free time and no commitments. He had heard of the Appalachian Trail and knew of its potential for danger and adventure, but he had never seriously considered attempting to hike all 2,192 miles of it. Then again, what could go wrong for a young black man from the city trekking solo through the East Coast backwoods? The Unlikely Thru-Hiker is the story of how an unknowing ambassador of one of the AT's least common demographics, unfamiliar with both the outdoors and thru-hiking culture, sets off with an extremely overweight pack and a willfully can-do attitude to conquer the infamous trail. What follows are eye-opening lessons on preparation, humility, race relations, and nature's wild unpredictability. But this isn't a hard-nosed memoir of discouragement or intolerance. What sets Lugo apart from the typical walk in the woods is his refusal to let any challenge squash his inner Pollyanna. Through it all, he perseveres with humor, tenacity, and an unshakeable commitment to grooming--earning him the trail name Mr. Fabulous--that sees him from Springer Mountain in Georgia to Katahdin in Maine.

answers to emergency preparedness merit badge: Disability, Equality, and Human Rights Alison Harris, Sue Enfield, 2003 This book's basic premise is that disabled people themselves know best what their needs are and that they should be involved in the planning and delivery of relief and development initiatives. The most effective support that agencies can offer is to empower them to claim their basic human rights and their civil and legal rights. The text is based on the experience of Oxfam staff working before, during and after the crisis in Kosovo; but its principles and practical training materials can be applied far more widely. Case studies from Africa and Asia arising from the work of Action and Disability and Development (ADD) show how the values of equality, empowerment and autonomy that are promoted by the social model of disability are universal in their relevance. It suggests practical materials particularly useful to trainers working in geographically isolated areas without access to sophisticated equipment. Most activities and exercises can be adapted for use in groups of people with a wide range of impairments and educational levels.
