ap lit 2017 international practice exam mcq: Mending the World Rosemarie Robotham, 2009-07-21 The many facets of black family life have not always been fully visible in American literature. Black families have often been portrayed as chaotic, fractured, and emotionally devastated, and historians and sociologists are just beginning to acknowledge the resilience and strength of African American families through centuries of hardship. In *Mending the World*, a host of beloved writers celebrate the richness of black family life, revealing how deep, complicated, and joyous modern kinship can be. From James McBride's tender recollection of the man who claimed eight stepchildren as his own to Toi Derricotte's moving portrait of a pregnant teenager who decides to keep her child; from Debra Dickerson's lament over the shooting that crippled her nephew to Charles Johnson's whimsical look at a married couple's mid-life crisis; from Shay Youngblood's moving fictional evocation of a lost mother to poet Kendel Hippolyte's poignant telling of a father's unexpected legacy, this inspiring volume presents—through fiction, memoir, and poetry—a multi-layered and optimistic portrait of today's black America. *Mending the World* features fiction, personal memoir, and poetry by new writers (some publishing here for the first time) and established members of the canon.

ap lit 2017 international practice exam mcq: World Development Report 2019 World Bank, 2018-10-31 Work is constantly reshaped by technological progress. New ways of production are adopted, markets expand, and societies evolve. But some changes provoke more attention than others, in part due to the vast uncertainty involved in making predictions about the future. The 2019 World Development Report will study how the nature of work is changing as a result of advances in technology today. Technological progress disrupts existing systems. A new social contract is needed to smooth the transition and guard against rising inequality. Significant investments in human capital throughout a person's lifecycle are vital to this effort. If workers are to stay competitive against machines they need to train or retool existing skills. A social protection system that includes a minimum basic level of protection for workers and citizens can complement new forms of employment. Improved private sector policies to encourage startup activity and competition can help countries compete in the digital age. Governments also need to ensure that firms pay their fair share of taxes, in part to fund this new social contract. The 2019 World Development Report presents an analysis of these issues based upon the available evidence.

ap lit 2017 international practice exam mcq: The Theory and Practice of Online Learning Terry Anderson, 2008 Neither an academic tome nor a prescriptive 'how to' guide, *The Theory and Practice of Online Learning* is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved

significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of *The Theory and Practice of Online Learning* features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations.--BOOK JACKET.
