camille beck iceberg slim daughters death: Alien Policy in Belgium, 1840-1940 Frank Caestecker, 2000 Belgium has a unique place in the history of migration in that it was the first among industrialized nations in Continental Europe to develop into an immigrant society. In the nineteenth century Italians, Jews, Poles, Czechs, and North Africans settled in Belgium to work in industry and commerce. They were followed by Russians in the 1920s and Germans in the 1930s who were seeking a safe haven from persecution by totalitarian regimes. In the nineteenth century immigrants were to a larger extent integrated into Belgian society: they were denied political rights but participated on equal terms with Belgians in social life. This changed radically in the twentieth century; by 1940 the rights of aliens were severely curtailed, while those of Belgian citizens, in particular in the social domain, were extended. While the state evolved into a welfare state for its citizens it became more of a police state for immigrants. The state only tolerated immigrants who were prepared to carry out those jobs that were shunned by the Belgians. Under the pressure of public opinion, an exception was made in the cases of thousands of Jewish refugees that had fled from Nazi Germany. However, other immigrants were subjected to harsh regulations and in fact became the outcasts of twentieth-century Belgian liberal society. This remarkable study examines in depth and over a long time span how (anti-) alien policies were transformed, resulting in an illiberal exclusion of foreigners at the same time as democratization and the welfare state expanded. In this respect Belgium is certainly not unique but offers an interesting case study of developments that are characteristic for Europe as a whole.

camille beck iceberg slim daughters death: *Totalitarian Art and Modernity* Mikkel Bolt Rasmussen, Jacob Wamberg, 2010 In spite of the steadily expanding concept of art in the Western world, art made in twentieth-century totalitarian regimes — notably Nazi Germany, fascist Italy and the communist East Bloc countries — is still to a surprising degree excluded from main stream art history and the exhibits of art museums. In contrast to earlier art made to promote princely or ecclesiastical power, this kind of visual culture seems to somehow not fulfill the category of 'true' art, instead being marginalised as propaganda for politically suspect regimes. *Totalitarian Art and Modernity* wants to modify this displacement, comparing totalitarian art with modernist and avant-garde movements; confronting their cultural and political embeddings; and writing forth their common genealogies. Its eleven articles include topics as varied as: the concept of totalitarianism and totalitarian art, totalitarian exhibitions, monuments and architecture, forerunners of totalitarian art in romanticism and heroic realism, and diverse receptions of totalitarian art in democratic cultures.

camille beck iceberg slim daughters death: Technē/Technology Annie Van Den Oever, 2014 This fourth title in the series 'The key debates' sets out where the term technē comes from, how it released a revolution in thought and how the concept in the midst of the current digital revolution, once again, is influencing the study of film. camille beck iceberg slim daughters death: *Affective Politics of Digital Media* Megan Boler, Elizabeth Davis, 2020-09-02 This interdisciplinary, international collection examines how sophisticated digital practices and technologies exploit and capitalize on emotions, with particular focus on how social media are used to exacerbate social conflicts surrounding racism, misogyny, and nationalism. Radically expanding the study of media and political communications, this book bridges humanities and social sciences to explore affective information economies, and how emotions are being weaponized within mediatized political landscapes. The chapters cover a wide range of topics: how clickbait, fake news, and right-wing actors deploy and weaponize emotion; new theoretical directions for understanding affect, algorithms, and public spheres; and how the wedding of big data and behavioral science enables new frontiers of propaganda, as seen in the Cambridge Analytica and Facebook scandal. The collection includes original interviews with luminary media scholars and journalists. The book features contributions from established and emerging scholars of communications, media studies, affect theory, journalism, policy studies, gender studies, and critical race studies to address questions of concern to scholars, journalists, and students in these fields and beyond.

camille beck iceberg slim daughters death: Havana Year Zero Karla Suárez, 2021-02-23
Sex, lies, and scientific history collide in 1993 Havana. It was as if we'd reached the minimum critical point of a mathematical curve. Imagine a parabola. Zero point down, at the bottom of an abyss. That's how low we sank. The year is 1993. Cuba is at the height of the Special Period, a widespread economic crisis following the collapse of the Soviet bloc. For Julia, a mathematics lecturer who hates teaching, this is Year Zero: the lowest possible point. But a way out appears: the search for a missing document that will prove the telephone was invented in Havana, secure her reputation, and give Cuba a purpose once more. What begins as an investigation into scientific history becomes a tangle of sex, friendship, family legacies, and the intricacies of how people find ways to survive in a country at its lowest ebb.

In the beginning, a scarecrow made his own history, like a symbol that everyone sees year-around (like Halloween) placed in the middle of surrounding pumpkins and flames all around but never hurting the scarecrow. At the end, two different species-a goblin and a troll-made their own history as well. Keeping the scarecrow strong and their willpower intact, so nobody can erase all three of their history, in which no one can change.
