colin fitzpatrick and melissa moore: Darkwing Kenneth Oppel, 2011-11-15 Before there were bats like Shade, Marina or even Goth, there was a young chiropter—a small arboreal glider—named Dusk. . . . It is 65 million years ago, during a cataclysmic moment in the earth's evolution, and Dusk, just months old, has no way of knowing he will play a pivotal role in creating a new world. What he

does know is that he is different from the other newborn chiropters. Not content to use his large sails to glide down from the giant sequoia tree, Dusk discovers that if he flaps quickly enough, he can fly. But this strange gift that makes him feel like an outcast from the colony will also make him its saviour. After most of the colony is savagely massacred by the felids—the earth's first mammalian carnivores—Dusk must lead his fellow chiropters to a new home, and a new life. Against a tableau of disappearing dinosaurs and the ascent of the mammal kingdom, Oppel has created an adventure fantasy that sets the stage for the birth of the bats, the story of the forebears of Shade, the beloved hero of the Silverwing series. As with all Silverwing books, it is impossible to simply read Oppel's Darkwing; each of us enters a world of convincing characters, warring theologies, incredible natural history and a story that roars through head, heart and imagination. A tale that can be read as a stand-alone or as a prequel, Darkwing will be a welcome new classic for the millions of Kenneth Oppel fans.

colin fitzpatrick and melissa moore: *Land of Cockaigne* Jeffrey Lewis, 2021-09-15 A novel written as a sharp parable of American society, addressing love, purpose, discrimination, and poverty. In Jeffrey Lewis's novel of the same name, the Land of Cockaigne, once an old medieval peasants' vision of a sensual paradise on earth, is reimagined as a plot on the coast of Maine. In efforts to assuage their grief over their son's death and to make meaning of his life, Walter Rath and Catherine Gray build what they hope will be a version of paradise for a group of young men from the Bronx. As Walter and Catherine work to reinvent this land, formerly a summer resort, the surrounding town of Sneeds Harbor proves resistant. The residents' well-meaning doubts lead to well-hidden threats, and the Raths' marriage unravels as Walter loses faith in democracy. Meanwhile, the Bronx boys, who had only ever known the city, try to navigate this new land that is completely alien to them. Written as a parable of contemporary American society, Land of Cockaigne is by turns furious, funny, subversive, tragic, and horrifying. Faced with the question of what to do amid disastrous times, Walter Rath offers a clue: Love is an action, not a feeling. Once you go down this path of faith, there is much to be done.

colin fitzpatrick and melissa moore: *Birdman's Wife* Melissa Ashley, 2016-10-01 A woman overshadowed by history steps back into the light . . . The Birdman's Wife at last gives voice to a passionate and adventurous spirit who was so much more than the woman behind the man. Elizabeth was a woman ahead of her time, juggling the demands of her artistic life with her roles as wife, lover, helpmate, and mother to an ever-growing brood of children. In a golden age of discovery, her artistry breathed wondrous life into hundreds of exotic new species, including Charles Darwin's famous Galapagos finches. In The Birdman's Wife, the naïve young girl who falls in love with a demanding and ambitious genius comes into her own as a woman, an artist and a bold adventurer who defies convention by embarking on a trailblazing expedition to collect and illustrate Australia's 'curious' birdlife. In this indelible portrait, an extraordinary woman overshadowed by history steps back into the light where she belongs.

Highlighting the work of nine women playwrights from the eighteenth and nineteenth centuries, as well as thirteen of the twentieth century's key writers, the chapters in this volume explore such varied themes as the impact of space and place on identity, women's strategic use of genre, and theatrical responses to shifts in Irish politics and culture.

colin fitzpatrick and melissa moore: 935 Lies Charles Lewis, 2014-06-24 Facts are and must be the coin of the realm in a democracy, for government of the people, by the people and for the people, requires and assumes to some extent an informed citizenry. Unfortunately, for citizens in the United States and throughout the world, distinguishing between fact and fiction has always been a formidable challenge, often with real life and death consequences. But now it is more difficult and confusing than ever. The Internet Age makes comment indistinguishable from fact, and erodes authority. It is liberating but annihilating at the same time. For those wielding power, whether in the private or the public sector, the increasingly sophisticated control of information is regarded as utterly essential to achieving success. Internal information is severely limited, including calendars, memoranda, phone logs and emails. History is sculpted by its absence. Often those in power strictly control the flow of information, corroding and corrupting its content, of course, using newspapers, radio, television and other mass means of communication to carefully consolidate their authority and cover their crimes in a thick veneer of fervent racialism or nationalism. And always with the specter of some kind of imminent public threat, what Hannah Arendt called objective enemies.' An epiphanic, public comment about the Bush war on terror years was made by an unidentified White House official revealing how information is managed and how the news media and the public itself are regarded by those in power: [You journalists live] in what we call the reality-based community. [But] that's not the way the world really works anymore. We're an empire now, and when we act, we create our own reality . . . we're history's actors . . . and you, all of you, will be left to just study what we do. And yet, as aggressive as the Republican Bush administration was in attempting to define reality, the subsequent, Democratic Obama administration may be more so. Into the battle for truth steps Charles Lewis, a pioneer of journalistic objectivity. His book looks at the various ways in which truth can be manipulated and distorted by governments, corporations, even lone individuals. He shows how truth is often distorted or diminished by delay: truth in time can save terrible erroneous choices. In part a history of communication in America, a cri de coeur for the principles and practice of objective reporting, and a journey into several notably labyrinths of deception, 935 Lies is a valourous search for honesty in an age of casual, sometimes malevolent distortion of the facts.

colin fitzpatrick and melissa moore: A Glorious Dark A. J. Swoboda, 2015-02-03 On Thursday as they ate the Passover meal with Jesus, the disciples believed that the kingdom was coming and they were on the front end of a revolution. Then came the tragedy of Friday and, somehow even worse, the silence of Saturday. They ran. They doubted. They despaired. Yet, within the grave, God's power was still flowing like a mighty river beneath the ice of winter. And then there was Sunday morning. Real, raw, and achingly honest, *A Glorious Dark* meets readers in the ambiguity, doubt, and uncertainty we feel when our beliefs about the world don't match up to reality. Tackling tough questions like Why is faith so hard? Why do I doubt? Why does God allow me to suffer? and Is God really with me in the midst of my pain? A. J. Swoboda puts into sharp focus a faith that is greater than our personal comfort or fulfilment. He invites readers to develop a faith that embraces the tension between what we believe and what we experience, showing that the very tension we seek to eliminate is where God meets us.

colin fitzpatrick and melissa moore: Hitting Trees with Sticks Jane Rogers, 2013-12-03
Long-listed for the 2013 Frank O'Connor International Short Story Prize **Short-listed for the 2013 Edge Hill Short Story Prize** A young textile designer quits Britain to work for a Nigerian women's refuge, confident that this is her one chance to make a difference... A sixteen-year-old uses his first job, as a window-cleaner, to peer into other people's lives and carefully plan his own... A leading scientist spends an evening trying to explain his latest theory to a man who could destroy him... The characters in Jane Rogers' first short story collection are each blessed with an unwavering conviction. Buoyed up on self-belief, they enthuse, take calculated risks, and refuse to be deterred by the odds stacked against them. But just as Rogers' compassion as a writer endears us to their cause, her keen eye shows how fine the balance can be between conviction and self-delusion. At times, her

subject seems to be the fallibility of any point of view, the persistence of blind spots no matter how careful or intelligent the viewer. Hers are not unreliable narrators, merely human ones – diverse, contradictory, imperfect. Indeed it is often their flaws that beguile us. ‘There is nothing predictable about a Jane Rogers story. She has the confidence and skill to inhabit many different voices and different worlds. She slides the reader, in imagination, to a snow-bound France, to Africa, to the Caribbean: she takes us into offices and libraries, under the sea and into the forest, and also into the vast untrodden country of memory that we carry around inside. Her observation of our species is tender, precise, illuminating.’ – Hilary Mantel ‘Thrilling, ambitious stories that cross continents and soar from cells to stars.’ – Maggie Gee ‘Warm, wise, insightful, sharply observed and beautifully written – each story is a world in microcosm.’ – Marina Lewycka ‘This is her first collection of short stories, and it is beautiful.’ – The Independent on Sunday

Now she's counting down the days until she returns to school with her fake arm, where she knows kids will whisper, That's her -- that's Shark Girl, as she passes. In the meantime there are only questions: Why did this happen? Why her? What about her art? What about her life? In this striking first novel, Kelly Bingham uses poems, letters, telephone conversations, and newspaper clippings to look unflinchingly at what it's like to lose part of yourself - and to summon the courage it takes to find yourself again.

God’s intention all along has been for the believer’s life to work. From divine perspective toward terrestrial turf, God meant for his children to succeed. . Are our Christian lives successful? Are they achieving and experiencing what Scripture said they

would? In a recent sermon my son-in-law preached, Curt told us the only way we were going to impact the world and the next generation is to prove that our faith in Christ is real and that it works. For countless Christians I'm convinced it's real. My concern is whether or not we have the fruit to suggest it works."—Beth Moore; Believing God

colin fitzpatrick and melissa moore: The Gormenghast Novels Mervyn Peake, 1995-12-01 A doomed lord, an emergent hero, an array of bizarre creatures, and an ancient royal family plagued by madness and intrigue--these are the denizens of ancient, sprawling, tumbledown Gormenghast Castle. Within its vast halls and serpentine corridors, the members of the Groan dynasty and their master Lord Sepulchrave grow increasingly out of touch with a changing world as they pass their days in unending devotion to meaningless rituals and arcane traditions. Meanwhile, an ambitious kitchen boy named Steerpike rises by devious means to the post of Master of the Ritual while he maneuvers to bring down the Groans. In these extraordinary novels, Peake has created a world where all is like a dream: lush, fantastical, vivid; a symbol of dark struggle. Accompanying the text are Peake's own drawings, illustrating the whole assembly of strange creatures that inhabit Gormenghast. Breathtaking in its power and drenched in dark atmosphere, humor and intrigue, The Gormenghast Trilogy is a classic, one of the great works of 20th century British literature.

colin fitzpatrick and melissa moore: Dark Dreams 2.0 Charles Derry, 2009-11-12 Greatly expanded and updated from the 1977 original, this new edition explores the evolution of the modern horror film, particularly as it reflects anxieties associated with the atomic bomb, the Cold War, 1960s violence, sexual liberation, the Reagan revolution, 9/11 and the Iraq War. It divides modern horror into three varieties (psychological, demonic and apocalyptic) and demonstrates how horror cinema represents the popular expression of everyday fears while revealing the forces that influence American ideological and political values. Directors given a close reading include Alfred Hitchcock, Brian De Palma, David Cronenberg, Guillermo Del Toro, Michael Haneke, Robert Aldrich, Mel Gibson and George A. Romero. Additional material discusses postmodern remakes, horror franchises and Asian millennial horror. This book also contains more than 950 frame grabs and a very extensive filmography.

colin fitzpatrick and melissa moore: Outer Space Development, International Relations and Space Law Edythe Weeks, 2013-02-21 It is the eve of outer space development, but few people are aware of this. In the absence of awareness, people cannot prepare for the opportunities that will arise; and so the vast wealth likely to flow to Earth from outer space will cause ever-greater inequality and instability in our already unequal and unstable world. This book is a call to educators to factor equality and diversity into the process of outer space development by creating a

widespread movement to teach outer space development studies to all students, especially those who study social and behavioral sciences. In calling for this, the author is also putting out a call to visionary thinkers to increase public awareness that outer space is already in the process of being developed. Her objective is to provide a pedagogical approach aimed at mending the knowledge gap. If we fail in this objective, we are more likely than ever before to witness ever-widening gaps of social and financial inequality. The first question that will arise as we embark on this process, of course, will be: Why outer space development? People often ask where the money will come from to develop outer space. Platinum-group metals such as iridium and osmium, and various other valuable untapped natural resources, have been discovered in abundant quantities and are likely to be mined by companies. The discovery of natural resources has sparked development projects in the past. These historical patterns of human behavior are occurring again today, as companies speed up the process of private spaceship development. A myriad of space laws and policies are already in place to support space commercialization. Recently, the 2010 NASA Authorization Act and various other laws and policies initiated by the US government have placed on the agenda plans to build advanced space transportation systems; to privatize spacecraft development; to create commercial space habitats, space stations, and space settlements; to initiate commercial space mining; to investigate spacecraft trajectory optimization for landing on near-Earth asteroids; to engage in commercial spaceport construction and interstellar-interplanetary-international telecommunications; and to launch space exploration missions to near-Earth asteroids, the Moon, Mars, and Mars's moons. US initiatives have in the past been mirrored by the international community, and we can expect to see similar patterns arising on a global scale – indeed, as this book will demonstrate, they already are. The global community is experiencing economic recession, natural disasters, lack of opportunity, employment anxiety, failing K-12 programs, widening inequality gaps, uprisings, revolutions, revolts, unmet educational goals, and a general failure to uplift, inspire, and provide meaningful opportunities for significant portions of our population. People need something that will allow them to focus anew their talents, energies, abilities, and gifts, and use this bleak climate as an opportunity for positive change. Outer space development is emerging as an answer to this state of crisis. The question is: To whom will the benefits accrue? Many strategic decisions have already been taken regarding space development of which the global general public is unaware. Once legal rights to space resources are granted, only those with the capital to take advantage of new laws and policies will be in a position to profit from the new space industries. Only those who are in a position to “know” about outer space development will be in position to take advantage of the opportunities. It is important to remember that the global general public has for several decades been paying the start-up costs for space exploration research, science, and technology. It's not too late to factor in equality before an infrastructure of inequality is forever with us as we venture to establish the final frontier.
