chat en vivo debates sociologicos: *The Cambridge Handbook of Pragmatics* Keith Allan, Kasia M. Jaszczolt, 2012-01-12 Pragmatics is the study of human communication: the choices speakers make to express their intended meaning and the kinds of inferences that hearers draw from an utterance in the context of its use. This Handbook surveys pragmatics from different perspectives, presenting the main theories in pragmatic research, incorporating seminal research as well as cutting-edge solutions. It addresses questions of rational and empirical research methods, what counts as an adequate and successful pragmatic theory, and how to go about answering problems raised in pragmatic theory. In the fast-developing field of pragmatics, this Handbook fills the gap in the market for a one-stop resource to the wide scope of today's research and the intricacy of the many theoretical debates. It is an authoritative guide for graduate students and researchers with its focus on the areas and theories that will mark progress in pragmatic research in the future.

chat en vivo debates sociologicos: *How the World Changed Social Media* Daniel Miller, Elisabetta Costa, Nell Haynes, Tom McDonald, Razvan Nicolescu, Jolynna Sinanan, Juliano Spyer, Shriram Venkatraman, Xinyuan Wang, 2016-02-29 *How the World Changed Social Media* is the first book in *Why We Post*, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

chat en vivo debates sociologicos: *Knowledge and Power* Joseph Rouse, 1990 This lucidly written book examines the social and political significance of the natural sciences through a detailed and original account of science as an interpretive social practice.

chat en vivo debates sociologicos: *Pandemic Exposures* Fassin Didier, Marion Fourcade, 2021-11 An illuminating, indispensable analysis of a watershed moment and its possible aftermath. For people and governments around the world, the onset of the COVID-19 pandemic seemed to place the preservation of human life at odds with the pursuit of economic and social life. Yet this naive alternative belies the complexity of the entanglements the crisis has created and revealed not just between health and wealth but also around morality, knowledge, governance, culture, and everyday subsistence. Didier Fassin and Marion Fourcade have assembled an eminent team of scholars from across the social sciences to reflect on the myriad ways SARS-CoV-2 has entered, reshaped, or exacerbated existing trends and structures in every part of the globe. The contributors show how the disruptions caused by the pandemic have both hastened the rise of new social divisions and hardened old inequalities and dilemmas. An indispensable volume, *Pandemic Exposures* provides an

illuminating analysis of this watershed moment and its possible aftermath.

chat en vivo debates sociologicos: Visualising Facebook Daniel Miller, Jolynna Sinanan, 2017-03-07 Since the growth of social media, human communication has become much more visual. This book presents a scholarly analysis of the images people post on a regular basis to Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.

chat en vivo debates sociologicos: The Deconstruction of Employment as a Political Question Amparo Serrano-Pascual, Maria Jepsen, 2018-12-13 The wide-ranging European perspectives brought together in this volume aim to analyse, by means of an interdisciplinary approach, the numerous implications of a massive shift in the conception of 'work' and the category of 'worker'. Changes in the production models, economic downturn and increasing digitalisation have triggered a breakdown in the terms and assumptions that previously defined and shaped the notion of employment. This has made it more difficult to discuss, and problematise, issues like vulnerability in employment in such terms as unfairness, inequality and inadequate protection. Taking the 'deconstruction of employment' as a central idea for theorising the phenomenon of work today, this volume explores the emergence of new semantic fields and territories for understanding and regulating employment. These new linguistic categories have implications beyond language alone: they reformulate the very concept of waged employment (including those aspects previously considered intrinsic to the meaning of work and of being 'a worker'), along with other closely associated categories such as unemployment, self-employment, and inactivity.

chat en vivo debates sociologicos: Presidential Campaigning in the Internet Age Jennifer Stromer-Galley, 2019 As the plugged-in presidential campaign has arguably reached maturity, Presidential Campaigning in the Internet Age challenges popular claims about the democratizing effect of Digital Communication Technologies (DCTs). Analyzing campaign strategies, structures, and tactics from the past six presidential election cycles, Stromer-Galley reveals how, for all their vaunted inclusivity and tantalizing promise of increased two-way communication between candidates and the individuals who support them, DCTs have done little to change the fundamental dynamics of campaigns. The expansion of new technologies has presented candidates with greater opportunities to micro-target potential voters, cheaper and easier ways to raise money, and faster and more innovative ways to respond to opponents. The need for communication control and management, however, has made campaigns slow and loathe to experiment with truly interactive internet communication technologies. Citizen involvement in the campaign historically has been and, as this book shows, continues to be a means to an end: winning the election for the candidate. For all the proliferation of apps to download, polls to click, videos to watch, and messages to forward, the decidedly undemocratic view of controlled interactivity is how most campaigns continue to operate. In the fully revised second edition, Presidential Campaigning in the Internet Age examines election cycles from 1996, when the World Wide Web was first used for presidential campaigning, through 2016 when campaigns had the full power of advertising on social media sites. As the book charts changes in internet communication technologies, it shows how, even as campaigns have moved from a mass mediated to a networked paradigm, the possibilities these shifts in interactivity seem to promise for citizen input and empowerment remain farther than a click away.

chat en vivo debates sociologicos: Nine Moons Gabriela Wiener, 2020-05-26 From the daring Peruvian essayist and provocateur behind Sexographies comes a fierce and funny exploration of sex, pregnancy, and motherhood that delves headlong into our fraught fascination with human

reproduction. Women play all the time with the great power that's been conferred upon us: it's fun to think about reproducing. Or not reproducing. Or walking around in a sweet little dress with a round belly underneath that will turn into a baby to cuddle and spoil. When you're fifteen, the idea is fascinating, it attracts you like a piece of chocolate cake. When you're thirty, the possibility attracts you like an abyss. Gabriela Wiener is not one to shy away from unpleasant truths or to balk at a challenge. She began her writing career by infiltrating Peru's most dangerous prison, going all in at swingers clubs, ingesting ayahuasca in the Amazon jungle. So at 30, when she gets unexpectedly pregnant, she looks forward to the experience the way a mountain climber approaches a precipitous peak. With a scientist's curiosity and a libertine's unbridled imagination, Wiener hungrily devours every scrap of information and misinformation she encounters during the nine months of her pregnancy. She ponders how pleasure and pain always have something to do with things entering or exiting your body. She laments that manuals for pregnant women don't prepare you for ambushes of lust or that morning sickness is like waking up with a hangover and a guilty conscience all at once. And she tries to navigate the infinity of choices and contradictory demands a pregnant woman confronts, each one amplified to a life-and-death decision. While pregnant women are still placed on pedestals, or used as political battlegrounds, or made into passive objects of study, Gabriela Wiener defies definition. With unguarded humor and breathtaking directness, *Nine Moons* questions the dogmas, upends the stereotypes, and embraces all the terror, beauty, and paradoxes of the propagation of the species. Praise for *Sexographies* "No other writer in the Spanish-speaking world is as fiercely independent and thoroughly irreverent as Gabriela Wiener. Constantly testing the limits of genre and gender, Wiener's work as a cronista (which roughly translates, but is by no means a direct synonym, of nonfiction writer) has bravely unveiled truths some may prefer remain concealed about a range of topics, from the daily life of polymorphous desire to the tiring labor of maternity." —Cristina Rivera Garza, author of *The Iliac Crest* "This collection of essays [opens] on the outskirts of Lima, jumps to a swinger's party in Barcelona, and next a squirt expert's apartment. This book can feel psychologically hazardous to read; it pushes you to answer the questions Wiener asks herself: Would I? Could I? Will I?" —Angela Ledgerwood, *Esquire* Best Books of 2018 "These are essays of unabashed honesty and uncommon freedom of mind, bravely reported and beautifully composed. I hadn't known how hungry I'd been for this book, how I'd needed it and wanted other books to be it. *Sexographies* is an antidote and a revelation, and Gabriela Wiener is a brilliant documenter of sex and life as they really are." —Kristin Dombek, author of *The Selfishness of Others* "In her native Peru, Gabriela Wiener has a reputation as a gonzo journalist who takes an active role in whatever subject she investigates, which as often as not involves sex, and not the vanilla variety. In this collection, her first translated into English, we meet a notorious polygamous pornographer; go to 6&9, a Barcelona sex club; interview the cruel Lady Monique de Nemours, a world-class dominatrix; visit Vanessa, a member of the European community of Latin American trans sex workers; get a first-hand look at the perils of threesomes; and explore other topics a tad too risqué to even name in a family newspaper. Suffice to say, Wiener's free-wheeling style is hugely entertaining." —Sarah Murdoch, *Toronto Star* Reading Gabriela Wiener is a joy. Over the years, her work has made me cry, laugh, hurt, and most importantly, dream. Her essays are daring, intimate, and honest, containing the self-awareness of a poet and the sharp focus of a marksman. I'd follow her anywhere. —Daniel Alarcón, author of *At Night We Walk in Circles* "One of the most interesting writers of this generation is Gabriela Wiener, a Peruvian journalist best known for her high-spirited explorations of female sexuality.... Wiener is witty and fast-paced; many of her experiences, sexual and otherwise, are hard-won, territories explored and sometimes conquered, despite her neurotic misgivings, with courage and aplomb. Part of her appeal lies in the fact that she sometimes writes about sexual topics that have not been well explored, especially by women, and a sense of incredulity is part of the pleasure of reading her work. 'Is she really going to do that?' the reader wonders. 'Is she really going to write (and so openly) about doing that?' And then she does, and there's a slight but perceptible shift in the world because she did." —Lisa Fetchko, *Los Angeles Review of Books* "With sizzling prose and journalistic attentiveness, Wiener honors the no-clothes

rule. She exposes her readers to not only her body, but also to the neuroses, fears, and fantasies that come with it. True to the first-person style of gonzo journalism, each of Wiener's fifteen transgressive crónicas pull readers into penetrative commentaries on infidelity, abortion, and threesomes, not to mention the ever-elusory 'Ninja Squirt.'... Sexographies strikes the delicate balance between carnal and curious.... It [expands] the meaning of what pleasure in life can be, sexual or otherwise." —Madeline Day, *The Paris Review* "What Peruvian essayist and "gonzo" journalist, Wiener, does in this collection is endlessly fascinating. Whether experiencing sexual subcultures or an ayahuasca trip, she uses herself as the point of departure to delve into the infinite manifestations of being human." — Keaton, Brazos Bookstore (Houston, TX), Best Nonfiction Books of 2018 "Gabriela Wiener is a Peruvian sex writer, and *Sexografias* is a book of her collected essays. However, she doesn't just stay on the carnal, and uses her explorations of egg donation, swingers parties, cruising, and squirting as channels into meditations on motherhood, death, and immigration, all while staying sharp and funny and wild." — Alejandra Oliva, Remezcla

chat en vivo debates sociologicos: World Anthropologies Gustavo Lins Ribeiro, Arturo Escobar, 2020-07-12 Since its inception, anthropology's authority has been based on the assumption that it is a unified discipline emanating from the West. In an age of heightened globalization, anthropologists have failed to discuss consistently the current status of their practice and its mutations across the globe. *World Anthropologies* is the first book to provoke this conversation from various regions of the world in order to assess the diversity of relations between regional or national anthropologies and a contested, power-laden Western discourse. Can a planetary anthropology cope with both the 'provincial cosmopolitanism' of alternative anthropologies and the 'metropolitan provincialism' of hegemonic schools? How might the resulting 'world anthropologies' challenge the current panorama in which certain allegedly national anthropological traditions have more paradigmatic weight - and hence more power - than others? Critically examining the international dissemination of anthropology within and across national power fields, contributors address these questions and provide the outline for a veritable world anthropologies project.

chat en vivo debates sociologicos: History and Memory Jacques Le Goff, 1992 In this brilliant meditation on the varying conceptions of history, Jacques Le Goff, one of the leading members of the French Annales school, examines the oppositions between past and present, ancient and modern as well as the various continuities in the evolutions of the historical spirit. Clearly written, broad-ranging, and richly allusive, *History and Memory* is a provocative book that will inspire a better understanding of historical work and provide an overview of the new history that has revolutionized historical studies over the post half century. Le Goff has written a new preface for the English language edition, which examines recent trends in historiography.--Jacket.

chat en vivo debates sociologicos: The Third Wave Alvin Toffler, 2022-01-04 From the author of *Future Shock*, a striking way out of today's despair . . . a bracing, optimistic look at our new potentials. *The Third Wave* makes startling sense of the violent changes now battering our world. Its sweeping synthesis casts fresh light on our new forms of marriage and family, on today's dramatic changes in business and economics. It explains the role of cults, the new definitions of work, play, love, and success. It points toward new forms of twenty-first-century democracy. chat en vivo debates sociologicos: *Queer Space* Aaron Betsky, 1997-03-19 In *Building Sex*, architecture critic and curator Aaron Betsky looked at how traditional gender roles have influenced architecture. In *Queer Space*, he examines how same-sex desire is creating an entirely new architecture. Gay men and women are in the forefront of architectural innovation, reclaiming abandoned neighborhoods, redefining urban spaces, and creating liberating interiors out of hostile environments. Queer spaces have arisen out of the experiences of homosexuals in a straight culture. Often forced to hide their true nature, gay men and women have turned inward, playing with the norms of interior space and creating environments of stagecraft and celebration where they can define themselves with out fear. Their experiments point the way to an architecture that can free us all from the imprisoning structures and spaces of the modern city.

chat en vivo debates sociologicos: *Comparing Ethnographies* Kathryn Anderson-Levitt, Elsie Rockwell, 2017-06-23 *Comparing Ethnographies* presents cross-national comparisons that give researchers and students a fresh look at familiar concepts. How does it matter, for example, to think in terms of majorities rather than minorities, migrants rather than immigrants, or intercultural education rather than multicultural education? How does indigenous education or the work of teachers look different to ethnographers from different countries of the Americas? This engaging new volume edited by Kathryn Anderson-Levitt and Elsie Rockwell includes essays from experts throughout the Americas which help readers understand and learn from ethnographic educational research conducted across the Western Hemisphere, and also includes a practical guide to finding the relevant literature.

Wiemann, Suzanne Pingree, 1988-10 *Advancing Communication Science* illustrates the inadequacies of evidence on which mass and interpersonal communication comparisons are based and make suggestions for improving comparability. Ten chapters discuss ways in which interpersonal and electronic mass communication affect each other, regarding emotional communication and need as determinants in media selection. The authors emphasize the need for special communication skills in the interpretation and use of television, and the role of interpersonal communication in shaping the contours of broadcast news output. The final chapter is a dialogue on the history and evolution of communication leading to a better understanding of where the field is

chat en vivo debates sociologicos: *Twitter* Dhiraj Murthy, 2013-09-04 Twitter has become a household name, discussed both for its role in prominent national elections, natural disasters, and political movements, as well as for what some malign as narcissistic "chatter." This book takes a critical step back from popular discourse and media coverage of Twitter, to present the first balanced, scholarly engagement of this popular medium. In this timely and comprehensive introduction, Murthy not only discusses Twitter's role in our political, economic, and social lives, but also draws a historical line between the telegraph and Twitter to reflect on changes in social communication over time. The book thoughtfully examines Twitter as an emergent global communications medium and provides a theoretical framework for students, scholars, and tweeters

to reflect critically on the impact of Twitter and the contemporary media environment. The book uses case studies including citizen journalism, health, and national disasters to provide empirically rich insights and to help decipher some of the ways in which Twitter and social media more broadly may be shaping contemporary life.

chat en vivo debates sociologicos: *The Craftsman* Richard Sennett, 2009-02-05 Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.

chat en vivo debates sociologicos: *Miami* Jan Nijman, 2011-11-29 As a subtropical city and the southernmost metropolitan area in the United States, Miami has always lured both visitors and migrants from throughout the Americas. During its first half-century they came primarily from the American North, then from the Latin South, and eventually from across the hemisphere and beyond. But if Miami's seductive appeal is one half of the story, the other half is that few people have ever ended up staying there. Today, by many measures, Miami is one of the most transient of all major metropolitan areas in America. *Miami: Mistress of the Americas* tells the story of an urban transformation, perfectly timed to coincide with the surging forces of globalization. Author Jan Nijman connects different historical episodes and geographical regions to illustrate how transience has shaped the city to the present day, from the migrant labor camps in south Miami-Dade to the affluent gated communities along Biscayne Bay. Transience offers opportunities, connecting business flows and creating an ethnically hybrid workforce, and also poses challenges: high mobility and population turnover impede identification of Miami as home. According to Nijman, Miami is mistress of the Americas because of its cultural influence and economic dominance at the nexus of north and south. Nijman likens the city itself to a hotel; people check in, go about their business or pleasure, then check out. Locals, born and raised in the area, make up only one-fifth of the population. Exiles, those who have come to Miami as a temporary haven due to political or economic necessity, are typically yearning to return to their homeland. Mobiles, the affluent and well educated, who reside in Miami's most prized neighborhoods, are constantly on the move. As a social laboratory in urban change and human relationships in a high-speed, high-mobility era, Miami raises important questions about identity, citizenship, place-attachment, transnationalism, and cosmopolitanism. As such, it offers an intriguing window onto our global urban future.

chat en vivo debates sociologicos: *The Global Edge* Prof. Alejandro Portes, Ariel C. Armony, 2018-09-11 Over the last quarter century, no other city like Miami has rapidly transformed into a global city. The Global Edge charts the social tensions and unexpected consequences of this remarkable process of change. Acting as a follow-up to the highly successful *City on the Edge*, The Global Edge examines Miami in the context of globalization and scrutinizes its newfound place as a major international city. Written by two well-known scholars in the field, the book examines Miami's rise as a finance and banking center and the simultaneous emergence of a highly diverse but contentious ethnic mosaic. The Global Edge serves as a case study of Miami's present cultural, economic, and political transformation, and describes how its future course can provide key lessons for other metropolitan areas throughout the world.

chat en vivo debates sociologicos: Hybrid Politics Laura Iannelli, 2015-03-15 *Hybrid Politics* examines the combinations and competitions between older and newer media technologies, practices, actors, contents and logics, by exploring their potential and practical implications in terms of political participation. In this Swift, Laura Iannelli analyses the 'hybridity' of politics in democratic societies from a multidisciplinary perspective, identifying the diverse forms of power and political participation that coexist within the contemporary complex media sphere, and which influence participation in the spheres of institutionalised and protest politics. Building upon renowned global research and original case studies, the book proposes an innovative and challenging analytic strategy to understand, explain, and problematise the contemporary complexity of political participation and communication.

chat en vivo debates sociologicos: Planetary Gentrification Loretta Lees, Hyun Bang Shin, Ernesto López-Morales, 2016-05-27 This is the first book in Polity's new 'Urban Futures' series. At the beginning of the twenty-first century, proclamations rang out that gentrification had gone global. But what do we mean by 'gentrification' today? How can we compare 'gentrification' in New York and London with that in Shanghai, Johannesburg, Mumbai and Rio de Janeiro? This book argues that gentrification is one of the most significant and socially unjust processes affecting cities worldwide today, and one that demands renewed critical assessment. Drawing on the 'new' comparative urbanism and writings on planetary urbanization, the authors undertake a much-needed transurban analysis underpinned by a critical political economy approach. Looking beyond the usual gentrification suspects in Europe and North America to non-Western cases, from slum gentrification to mega-displacement, they show that gentrification has unfolded at a planetary scale, but it has not assumed a North to South or West to East trajectory the story is much more complex than that. Rich with empirical detail, yet wide-ranging, *Planetary Gentrification* unhinges, unsettles and provincializes Western notions of urban development. It will be invaluable to students and scholars interested in the future of cities and the production of a truly global urban studies, and equally importantly to all those committed to social justice in cities.

chat en vivo debates sociologicos: Networks, Crowds, and Markets David Easley, Jon Kleinberg, 2010-07-19 Are all film stars linked to Kevin Bacon? Why do the stock markets rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

chat en vivo debates sociologicos: Routine Politics and Violence in Argentina Javier Auyero, 2007-04-16 Close to three hundred stores and supermarkets were looted during week-long food riots in Argentina in December 2001. Thirty-four people were reported dead and hundreds were injured. Among the looting crowds, activists from the Peronist party (the main political party in the country) were quite prominent. During the lootings, police officers were conspicuously absent - particularly when small stores were sacked. Through a combination of archival research, statistical analysis, multi-sited fieldwork, and taking heed of the perspective of contentious politics, this book provides an analytic description of the origins, course, meanings, and outcomes of the December 2001 wave of lootings in Argentina.

chat en vivo debates sociologicos: Cyberpragmatics Francisco Yus, 2011-08-22

Cyberpragmatics is an analysis of Internet-mediated communication from the perspective of cognitive pragmatics. It addresses a whole range of interactions that can be found on the Net: the web page, chat rooms, instant messaging, social networking sites, 3D virtual worlds, blogs, videoconference, e-mail, Twitter, etc. Of special interest is the role of intentions and the quality of interpretations when these Internet-mediated interactions take place, which is often affected by the textual properties of the medium. The book also analyses the pragmatic implications of transferring offline discourses (e.g. printed paper, advertisements) to the screen-framed space of the Net. And although the main framework is cognitive pragmatics, the book also draws from other theories and models in order to build up a better picture of what really happens when people communicate on the Net. This book will interest analysts doing research on computer-mediated communication, university students and researchers undergoing post-graduate courses or writing a PhD thesis. chat en vivo debates sociologicos: *Crystallizing Public Opinion* Edward L. Bernays, 2023-10-09 In writing this book I have tried to set down the board principles that govern the profession of public relations. It is certain that the power of public opinion is constantly increasing and will keep on increasing. It is equally certain that it is more and more being influenced, changed, stirred by impulses from below. The danger which this development contains for a progressive ennobling of human society and a progressive heightening of human culture is apparent. The duty of the higher strata of society-the cultivated, the learned, the expert, the intellectual-is therefore clear. They must inject moral and spiritual motives into public opinion. Public opinion must become public conscience.

The first section of the book addresses the classification, the neurological underpinnings, and the effect of gender on emotions. The second reviews sociological theories of emotion. Section three covers theory and research on specific emotions: love, envy, empathy, anger, grief, etc. The final section shows how the study of emotions adds new insight into other subfields of sociology: the workplace, health, and more.
