chinese zodiac characteristics: Taoist Astrology Susan Levitt, 1997-06-01 This guide brings Chinese astrology back to its ancient roots, providing all the information you need for understanding one of the world's oldest systems of divination. The ancient Chinese people developed a sophisticated science of astrology that continues to have profound influence in China today. Rooted in the fundamentals of Taoism, it evolved into a system vastly different from Western astrology. Rather than determining personality by the time of the year in which you are born, in Taoist astrology it is the year itself that determines your character. The years form a twelve-year cycle of signs, each named after an animal. Additionally, your personality depends on which of the five traditional Taoist elements you are born under--water, wood, fire, earth, or metal. This makes for a cycle of sixty unique signs. Taoist Astrology includes information for each sign's personality, compatibility, child-parent relations, and rising and falling fortunes during the twelve-year cycle. Discussions of yin and yang, Confucianism and Buddhism, Taoist alchemy, and the connection between Taoist astrology and Western astrology give you all the background you need for understanding one of the oldest systems of divination known to humanity. Taoist Astrology differs from other books on the subject by grounding its concepts in the ancient traditions from which it originated.

chinese zodiac characteristics: *The Complete Guide to Chinese Horoscopes* Zheng Weijian, 2020-01-14 The Chinese horoscope represents a tradition more than 2,000 years old. It lasts for twelve years, with each year featuring a different symbolic animal. Ancient Chinese beliefs, which persist to the current day, hold that the year of one's birth has a significant effect on one's character, which relates to the features of that year's symbolic animal. For example, a person born during the year of the mouse will be smart and wealthy, which are characteristics attributed to the mouse. Likewise, a person born in the year of the ox will be hardworking and down-to-earth, while a person born in the year of the tiger will be majestic and fierce. There are further levels of refinement to the Chinese horoscope cycle, based on beliefs related to the ancient divination text, *Classic of Changes* (I Ching), the Five Elements Theory (metal, wood, water, fire, earth), yin and yang, and the Ten Celestial Stems and Twelve Terrestrial Branches. These concepts, fundamental in China, are explained in this book, giving a fuller understanding of the Chinese zodiac, as well as an insight into Chinese culture. Today, a vast number of people around the world believe their zodiac animal influences their hearts, minds, fortunes and relationships. Do you know to which symbolic animal you belong, according to the year of your birth? And do you know the element and other nuances of the forces that rule your particular birth year?
