fbla healthcare administration: Undercover John W. Schilling, 2010-09 When John Schilling, an unassuming midlevel accountant, joined Columbia Healthcare Corporation -- the nation's fastest growing and revolutionary network of public hospitals -- it seemed like the start of an exciting new career with great advancement and earnings potential. He never expected to become a catalyst for the series of whistleblower lawsuits that ripped through the healthcare industry in the late 1990s In Undercover, John Schilling tells the story of his harrowing journey from ordinary citizen and loyal employee to covert FBI informant and top witness for the Justice Department in the largest criminal healthcare fraud case in U.S. history. It began when he stumbled upon evidence-- a \$3.5 million accounting error--of his company's routine practice of defrauding Medicare. When pressured to comply with stealing from taxpayers, Schilling knew he had to speak up for what he believed was right, regardless of the cost to his job, his reputation, and his family. His courageous choice would consume the next seven years of his life, leading to more drama, angst, turmoil, and money than he could have imagined. Ultimately, Schilling's moral conviction and a little known law, the False Claims Act, paid off by forcing the formidable healthcare conglomerate of Columbia/HCA to pay back \$1.7 billion to the federal government. Revealing the personal side of a thankless role, Undercover is a gripping and inspiring account of a long, hard, life-- changing quest for justice. ADVANCE PRAISE FOR UNDERCOVER Undercover crackles with authenticity as it recounts in a lively, readable style how a man on the inside risked everything and blew the whistle on a giant healthcare company that was systematically looting the Medicare program out of billions. A good read for anyone, but a must-read for someone who may contemplate taking the same path as John Schilling -- John R. Phillips, The nation's premier whistleblowing attorney according to the The Wall Street Journal and the National Law Journal John Schilling's book is a must-read for whistleblowers. He shows you how hard it can be, yet also shows you how to prevail. Best of all, John shows you how to be a good citizen -- Jim Moorman, past President, Taxpayers Against Fraud

fbla healthcare administration: Doctors from Hell Vivien Spitz, 2005 A chilling story of human depravity and ultimate justice, told for the first time by an eyewitness court reporter for the Nuremberg war crimes trial of Nazi doctors. This is the account of 22 men and 1 woman and the torturing and killing by experiment they authorized in the name of scientific research and patriotism. Doctors from Hell includes trial transcripts that have not been easily available to the general public and previously unpublished photographs used as evidence in the trial. The author describes the experience of being in bombed-out, dangerous, post-war Nuremberg, where she lived for two years while working on the trial. Once a Nazi sympathizer tossed bombs into the dining room of the hotel where she lived moments before she arrived for dinner. She takes us into the courtroom to hear the dramatic testimony and see the reactions of the defendants to the proceedings. This landmark trial resulted in the establishment of the Nuremberg code, which set the guidelines for medical research involving human beings. A significant addition to the literature on World War II and the Holocaust, medical ethics, human rights, and the barbaric depths to which human beings can descend.

fbla healthcare administration: Blue Ocean Leadership (Harvard Business Review Classics) W. Chan Kim, Renée A. Mauborgne, 2017-05-30 Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing blue ocean strategy, a new model for discovering uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what

is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' customers--that is, the people managers oversee and report to--are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.
