fdv user guide: The European Handbook of Media Accountability Tobias Eberwein, Susanne Fengler, Matthias Karmasin, 2017-11-08 In recent years, the Leveson Inquiry in Great Britain, as well as the EU High-Level Group on Media Freedom and Pluralism, have stirred heated debates about media accountability and media self-regulation across Europe. How responsible are journalists? How well-developed are infrastructures of media self-regulation in the different European countries? How much commitment to media accountability is there in the media industry – and how actively do media users become involved in the process of media criticism via social media? With contributions from leading scholars in the field of journalism and mass communication, this handbook brings together reports on the status quo of media accountability in all EU members states as well as key countries close to Europe, such as Turkey and Israel. Each chapter provides an up-to-date overview of media accountability structures as well as a synopsis of relevant research, exploring the role of media accountability instruments in each national setting, including both media self-regulation (such as codes of ethics, press councils, ombudspersons) and new instruments that involve audiences and stakeholder groups (such as media blogs and user comment systems). A theoretically informed, cross-national comparative analysis of the state of media accountability in contemporary Europe, this handbook constitutes an invaluable basis for further research and policy-making and will appeal to students and scholars of media studies and journalism, as well as policy-makers and practitioners.

Lee, Bruce Cronin, 2016-04-29 Despite the important methodological critiques of the mainstream offered by heterodox economics, the dominant research method taught in heterodox programmes remains econometrics. This compelling Handbook provides a comprehensive introduction to a range of alternative research methods, invaluable for analysing the data prominent in heterodox studies. Providing a solid basis for a mixed methods approach to economic investigations, the expertly crafted contributions are split into three distinct sections: philosophical foundation and research strategy, research methods and data collection, and applications. Introductions to a host of invaluable methods such as survey, historical, ethnographic, experimental and mixed approaches, together with factor, cluster, complex and social network analytics, are complemented by descriptions of applications in practice. Practical and expansive, this Handbook is highly pertinent for students and scholars of economics, particularly those dedicated to heterodox approaches, as it provides a solid reference for mixed methods not available in mainstream economics research methods courses.

fdv user guide: Health Advocacy, Inc. Sharon Batt, 2017-06-15 Over the past several decades, a gradual reduction in state funding has pressured patient groups into forming private-sector partnerships, raising an important ethical question: do these alliances ultimately lead to policies that are counter to the public interest? Health activist, scholar, and cancer survivor Sharon Batt examines the issue by investigating Canada's breast cancer movement from 1990 to 2010. Health Advocacy, Inc. dissects the relationship between the companies that sell pharmaceuticals and the individuals who use them, drawing links between neoliberalism and corporate financing and the ensuing threat to the public health care system. Combining archival analysis, interviews with advocacy and industry representatives, and personal observation, Batt argues that the resulting power imbalance continues to challenge the groups' ability to put patients' interests ahead of those of the funders. A movement that once encouraged democratic participation in the development of health policy now eerily echoes the demands of the pharmaceutical industry. Batt's thorough account of this shift defines the stakes of activism in public health today.

fdv user guide: Social Network Analysis John Scott, 2024-04-04 This book introduces the non-specialist reader to the principal ideas, nature and purpose of social network analysis. Social networks operate on many levels, from families up to the level of nations, and play a critical role in determining the way problems are solved, organizations are run, and the degree to which individuals achieve their goals. Social network theory maps these relationships between individual actors and has become hugely influential across the social sciences. Assuming no prior knowledge of quantitative sociology, and avoiding technicalities, this book presents the key ideas in context through examples and illustrations. Using a structured approach to understanding work in this area, John Scott signposts further reading and online sources so that readers can develop their knowledge and skills to become practitioners of this research method. A series of Frequently Asked Questions takes the reader through the main objections raised against social network analysis. The new edition updates the overview of the discipline with more recent work and current research in sociology.

Relying on the findings of four crime victimisation surveys conducted in India, it provides a unique basis for understanding crime in society. It considers the public's fear of crime and perceptions of safety and security, focusing on their access to the police and how they view police effectiveness. This study provides critical data on the level of crime within particular spatial and temporal conditions which can supplement official statistics on crime published by the state, help systematically diagnose law and order issues and develop solutions for improved policing and public safety. A unique and timely volume, this book will be of interest to researchers of Asian criminology, victimology and the study of the criminal justice system, as well as those interested in empirical research and policy making in criminal justice.

fdv user guide: Festival du Voyageur HÉ HO! Lucienne Beaudry Loiselle, 2019-02-18T00:00:00-05:00 Every February, tens of thousands from all over the globe flock to St. Boniface, Manitoba, to attend the largest winter celebration in Western Canada—Festival du Voyageur. For its duration, these visitors can experience the customs and ways of our voyageur ancestors, the hardy men and women who settled the prairies after the arrival of La Vérendrye in 1734. In 1969, the Franco-Manitoban community laid the groundwork for a new winter festival

inspired by the historic voyageur era. It also introduced the ambassadors of the endeavour—the Official Voyageurs, based on notable historical figures such as Jean-Baptiste Lagimodière and his wife Marie-Anne Gaboury, the first pioneers of the Red River Settlement and the grandparents of Louis Riel. Thanks to its experienced team and thousands of volunteers, Festival du Voyageur has since its inception provided a space in which to gather and celebrate the history of the voyageurs and the fur trade, by way of the First Nations, the Métis, and the early days of the Red River Settlement. Festivalgoers are invited to visit striking snow sculptures, skate on the Red River, enjoy traditional foods, take part in a host of contests and competitions, learn legends and lore from kitchen party and folk music performances, and mingle at the various trading posts. This fond retrospective, spearheaded by Lucienne Beaudry Loiselle and brought to fruition under her careful and dedicated guidance, offers a candid and faithful account of Festival's many successes and challenges over its fifty-year history of warming hearts and cold prairie winters.

fdv user guide: Tourism Development in Post-Soviet Nations Susan L. Slocum, Valeria Klitsounova, 2020-01-23 Former communist countries face unique issues in developing and marketing tourism businesses, communities, and attractions because of centralized policies that discouraged international influences. While soviet economies relied on state policies to facilitate community development, the success of capitalism lies in access to a variety of resources, such as the environment, fiscal services, infrastructure, and market knowledge at the local level. Moreover, communal societies potentially possess social capital that can provide unique economic development opportunities. This book incorporates a regional perspective that widens the tourism development debate to include theoretical analyses, applied research, and case studies that document the broader successes and challenges that affect tourism stakeholders and addresses the necessary elements that facilitate a comprehensive tourism development strategy in emerging and transitioning former communist countries.
