Understanding the Houghton Mifflin Reading Grade 3 Curriculum

Houghton Mifflin Reading (HMR) is a widely-used reading program known for its structured approach and comprehensive coverage of key reading skills. The Grade 3 curriculum builds upon foundational skills developed in earlier grades, focusing on fluency, comprehension, vocabulary expansion, and phonics reinforcement. This isn't just about decoding words; it's about developing a love for reading and fostering a lifelong appreciation for literature.

Key Components of the HMR Grade 3 Program:

Phonics and Word Recognition: Grade 3 continues to refine phonics skills, focusing on multi-syllable words, prefixes, suffixes, and root words, empowering students to decode more complex vocabulary independently.

Vocabulary Development: HMR introduces a rich vocabulary through engaging stories and targeted instruction, helping students expand their understanding of word meanings and nuances. This often involves learning synonyms, antonyms, and contextual clues.

Reading Comprehension: A significant portion of the curriculum focuses on improving comprehension skills through various strategies like summarizing, inferencing, identifying main ideas, and analyzing characters and plot. Students learn to critically engage with texts, not just passively read them.

Fluency and Oral Reading: Students are encouraged to practice reading aloud, improving their fluency and expression. This builds confidence and improves comprehension by reinforcing word recognition and understanding.

Writing and Language: HMR integrates writing activities to reinforce reading comprehension and

vocabulary. Students develop skills in narrative writing, descriptive writing, and other essential writing forms.
