and ensuring the growth and sustainability of the institution and its services. The key chapters are: What are archives? Archival institutions: creatures of history and culture Archival service: a matter of trust Protecting archives Provenance, original order and respect des fonds Appraising and acquiring archives Arranging and describing archives Making archives available The challenge of digital archives. The final section of the book offers a glossary of terms and a wide range of specialist information including comprehensive lists of recommended further reading, national institutions, professional bodies and other sources of advice. kristen ar hives: Archives and Emotions Ilaria Scaglia, Valeria Vanesio, 2024-11-14 Archives and Emotions argues, at its most fundamental level, that emotions matter and have always mattered to both the people whose histories are documented by archives and to those working with the documents these contain. This is the first study to put archivists and historians-scholars and practitioners from different settings, geographical provenance, and stages of career-in conversation with one another to examine the interplay of a broad range of emotions and archives, traditional and digital, from the eighteenth to the twenty-first centuries across national and disciplinary borders. Drawing on methodologies from the history of emotions and critical archival studies, this book provides an original analysis of two interconnected themes through a selected number of case studies: the emotional dynamics affecting the construction and management of archives; and the emotions and their effects on the people engaging with them, such as archivists, researchers, and a broad range of communities. Its main message is that critically investigating the history and mechanics of emotions-including their suppression and exclusion-also being conscious of their effects on people and societies is essential to understanding how archives came to hold deep civic and ethical implications for both present and future. This study thus establishes a solid base for future scholarship and interdisciplinary collaborations and challenges academic and non-academic readers to think, work, and train new generations differently, fully aware that past and present choices have-and might again-hurt, inspire, empower, or silence.

kristen ar hives: One Job Town Steven High, 2018-05-04 There's a pervasive sense of betrayal in areas scarred by mine, mill and factory closures. Steven High's One Job Town delves into the long history of deindustrialization in the paper-making town of Sturgeon Falls, Ontario, located on Canada's resource periphery. Much like hundreds of other towns and cities across North America and Europe, Sturgeon Falls has lost their primary source of industry, resulting in the displacement of workers and their families. One Job Town takes us into the making of a culture of industrialism and the significance of industrial work for mill-working families. One Job Town approaches deindustrialization as a long term, economic, political, and cultural process, which did not begin and simply end with the closure of the local mill in 2002. High examines the work-life histories of fifty paper mill workers and managers, as well as city officials, to gain an in-depth understanding of the

impact of the formation and dissolution of a culture of industrialism. Oral history and memory are at the heart of One Job Town, challenging us to rethink the relationship between the past and the present in what was formerly known as the industrialized world.

kristen ar hives: The Toxic Museum Helene Tello, 2023-12-29 The Toxic Museum examines the use of pesticides in German museum collections at the end of the 19th and early 20th centuries. It reconstructs the research of substances against harmful insects in museum collections within the historical context of the formation of nation-states, colonialism, a strengthening chemical industry,

the First World War, and the resulting broad-based hygiene movement through the lens of the Ethnologisches Museum (Ethnological Museum) in Berlin. Because of their persistence, the consequences of the use of pesticides in museum collections are now unmistakable and well documented in many places. Numerous objects are highly contaminated and are only accessible under difficult conditions regarding occupational health and safety. This creates obstacles for conservation and scientific processing, as well as for mediation in the context of exhibitions and external loans. The most precarious and difficult situations arise when contaminated museum objects are repatriated to their countries of origin. This monograph examines contemporary challenges in the 21st century museum landscape and contextualises the history of pesticide use at the turn of the 20th century. The Toxic Museum will be of great interest to students and scholars working in conservation, museology, monument preservation, art and cultural studies, ethnology, history, and economics.

kristen ar hives: Community Archives, Community Spaces Jeannette Bastian, Andrew Flinn, 2019-12-19 This book traces the trajectory of the community archives movement, expanding the definition of community archives to include sites such as historical societies, social movement organisations and community centres. It also explores new definitions of what community archives might encompass, particularly in relation to disciplines outside the archives. Over ten years have passed since the first volume of Community Archives, and inspired by continued research as well as by the formal recognition of community archives in the UK, the community archives movement has become an important area of research, recognition and appreciation by archivists, archival scholars and others worldwide. Increasingly the subject of papers and conferences, community archives are now seen as being in the vanguard of social concerns, markers of community-based activism, a participatory approach exemplifying the on-going evolution of 'professional' archival (and heritage) practice and integral to the ability of people to articulate and assert their identity. Community Archives, Community Spaces reflects the latest research and includes practical case studies on the challenges of building and sustaining community archives. This new book will appeal to practitioners, researchers, and academics in the archives and records community as well as to historians and other scholars concerned with community building and social issues.

kristen ar hives: Turning Archival Daniel Marshall, Zeb Tortorici, 2022-09-06 The contributors to Turning Archival trace the rise of "the archive" as an object of historical desire and study within queer studies and examine how it fosters historical imagination and knowledge. Highlighting the growing significance of the archival to LGBTQ scholarship, politics, and everyday life, they draw upon accounts of queer archival encounters in institutional, grassroots, and everyday repositories of historical memory. The contributors examine such topics as the everyday life of marginalized queer immigrants in New York City as an archive; secondhand vinyl record collecting and punk bootlegs; the self-archiving practices of grassroots lesbians; and the decolonial potential of absences and gaps in the colonial archives through the life of a suspected hermaphrodite in colonial Guatemala. Engaging with archives from Africa to the Americas to the Arctic, this volume illuminates the allure of the archive, reflects on that which resists archival capture, and outlines the stakes of queer and trans lives in the archival turn. kristen ar hives: *Paper Cadavers* Kirsten Weld, 2014-03-21 In *Paper Cadavers*, an inside account of the astonishing discovery and rescue of Guatemala's secret police archives, Kirsten Weld probes the politics of memory, the wages of the Cold War, and the stakes of historical knowledge production. After Guatemala's bloody thirty-six years of civil war (1960–1996), silence and impunity reigned. That is, until 2005, when human rights investigators stumbled on the archives of the country's National Police, which, at 75 million pages, proved to be the largest trove of secret state records ever found in Latin America. The unearthing of the archives renewed fierce debates about history, memory, and justice. In *Paper Cadavers*, Weld explores Guatemala's struggles to manage this avalanche of evidence of past war crimes, providing a firsthand look at how postwar justice activists worked to reconfigure terror archives into implements of social change. Tracing the history of the police files as they were transformed from weapons of counterinsurgency into tools for post-conflict reckoning, Weld sheds light on the country's fraught transition from war to an uneasy peace, reflecting on how societies forget and remember political violence.

kristen ar hives: Producing the Archival Body Jamie A. Lee, 2020-12-21 *Producing the Archival Body* draws on theoretical and practical research conducted within US and Canadian archives, along with critical and cultural theory, to examine the everyday lived experiences of archivists and records creators that are often overlooked during archival and media production. Expanding on the author's previous work, which engaged archival and queer theories to develop the *Queer/ed Archival Methodology* that intervenes in traditional archival practices, the book invites readers interested in humanistic inquiry to re-consider how archives are defined, understood, deployed, and accessed to produce subjects. Arguing that archives and bodies are mutually constitutive and developing a keen focus on the body and embodiment alongside archival theory, the author introduces new understandings of archival bodies. Contributing to recent disciplinary moves that offer a more transdisciplinary emphasis, Lee interrogates how power circulates and is deployed in archival contexts in order to build critical understandings of how deeply archives influence and shape the production of knowledges and human subjectivities. *Producing the Archival Body* will be essential reading for academics and students engaged in the study of archival studies, library and information science, gender and women's studies, anthropology, history, digital humanities, and media studies. It should also be of great interest to practitioners working in and with archives

kristen ar hives: Supervision Sophie Hamacher, 2023-04-25 A wide-ranging, first-of-its-kind anthology of art and writing exploring how surveillance impacts contemporary motherhood. The tracking of our personal information, activities, and medical data through our digital devices is an increasingly recognizable field in which the lines between caretaking and control have blurred. In this age of surveillance, mothers' behaviors and bodies are observed, made public, exposed, scrutinized, and policed like never before. *Supervision: On Motherhood and Surveillance* gathers together the work of fifty contributors from diverse disciplines that include the visual arts, legal scholarship, ethnic studies, sociology, gender studies, poetry, and activism to ask what the relationship is between how we watch and how we are watched, and how the attention that mothers pay to their children might foster a kind of counterattention to the many ways in which mothers are scrutinized. A groundbreaking collection, *Supervision* is a project about vision (and supervision), and all the ways in which vision intersects with surveillance and politics, through motherhood and personal history as well as through the histories and relations of the societies in which we live. kristen ar hives: The SAGE Encyclopedia of Communication Research Methods Mike Allen, 2017-01-15 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to provide robust search-and-browse in the e-version.

At once a memoir and a social history of a time, *The Occupied Garden* is the story of a good but poor man, a market gardener, and his fiercely devout wife, raising their young family in Holland during the Nazi occupation. Pieced together by the couple's granddaughters, who combed through historical research, family lore, and insights from a neighbour's wartime diary, the story chronicles how the couple struggled to keep their children from starving, but could not keep them from harm, and reveals the strife and hardship endured not just by them, but by a nation. These experiences, kept from subsequent generations of the family, were almost lost until, long after their deaths, the path of the couple through the war and on to Canada was uncovered. A personal and intimate account within the larger context of a terrorized nation, this is also a story of the bonds and strains among family, told with the haunting, evocative prose for which Kristen den Hartog is known.

We need to move beyond talking about racism and start equipping ourselves to fight against it. In this follow-up to the New York Times Bestseller *the Color of Compromise*, Jemar Tisby offers an array of

actionable items to confront racism. *How to Fight Racism* introduces a simple framework—the A.R.C. Of Racial Justice—that teaches readers to consistently interrogate their own actions and maintain a consistent posture of anti-racist behavior. The A.R.C. Of Racial Justice is a clear model for how to think about race in productive ways: Awareness: educate yourself by studying history, exploring your personal narrative, and grasping what God says about the dignity of the human person. Relationships: understand the spiritual dimension of race relations and how authentic connections make reconciliation real and motivate you to act. Commitment: consistently fight systemic racism and work for racial justice by orienting your life to it. Tisby offers practical tools for following this model and suggests that by applying these principles, we can help dismantle a social hierarchy long stratified by skin color. He encourages rejection passivity and active participation in the struggle for human dignity. There is hope for transforming our nation and the world, and you can be part of the solution.

Concentrating on contemporary life texts found in the material book, museums, on social media and archives that present perceptions of individuality and autonomy, *Reading Mediated Life Narratives* exposes the traces of personal, cultural, technological, and political mediation that must be considered when developing reading strategies for such life narratives. Amy Carlson asks such questions as what agents act upon these narratives; what do the text, the creator, and the audience gain, and what do they lose; how do constantly evolving technologies shape or stymie the auto/biographical [□I□](#); and finally, how do the mediations affect larger issues of social and collective memory? An examination of the range of sites at which vulnerability and intervention can occur, Carlson does not condemn but stages an intercession, showing us how it is increasingly necessary to register mediated agents and processes modifying the witnessing or recuperation of original texts that could condition our reception. With careful thought on how we remember, how we create and control our pictures, voices, words, and records, *Reading Mediated Life Narratives* reveals how we construct and negotiate our social identities and memories, but also what systems control us.

The contributors examine the state of archival studies as a discipline and practice, placing it within an international, interdisciplinary, forward-looking context. Topics include: the identity of archival science as a discipline, the authenticity and trustworthiness of archives in various forms, archival practice around the world, and new directions for archives in the 21st century. Many of these topics were originally articulated or strongly influenced by Luciana Duranti's international and interdisciplinary InterPARES projects (1998-2026). The book's themes (theoretical concepts about trustworthiness of records, interdisciplinary research, archival education, and the archival profession) are particularly relevant in today's environment when governments and institutions are questioning the trustworthiness of records and attempting to combat disinformation. The book will fill a unique niche by presenting scholarship, practice, and pedagogy influenced by Duranti.

kristen ar hives: *The Perpetual Ending* Kristen Den Hartog, 2011-01-14 From a writer acclaimed for her "probing, idiosyncratic intelligence and emotional generosity" (Calgary Herald), comes a deeply imagined novel that takes us into the lives of devoted twin sisters and their world of opposites, doppelgängers and ghosts. Jane and Eugenie Ingrams are mirror-image twins, and thus

exact opposites. Halves of a whole, they are inseparable, each understanding her world through the other. But when Lucy, their artistic mother, moves her daughters from Deep River to Toronto (leaving behind a bewildered husband), she finds she can't entirely escape the remains of their troubled marriage. Eugenie thrives in the jumble of urban life, but Jane is sickened by its underside: the mess of lost souls who live on the streets, the garbage, the noise and the violence. When their father eventually seeks them out, Jane is relieved for the chance to go back to Deep River. Eugenie agrees to return for the sake of her beloved sister -- a soon-to-be-tragic concession. Years later, Jane is a writer in Vancouver, living with her lover, Simon, a gifted illustrator. Although troubled by her past, she finds solace (and commercial success) in the rich, fabulist tales she and Simon create -- which are expertly woven throughout the book -- tales of people born with extraordinary qualities: horns, the gift of prophesy, spiderweb hair or unquenchable thirst. Wondrous, inventive and brimming with charm, *The Perpetual Ending* is an exploration of love and artistry that shows the world as a whole, in all its grotesqueness and beauty. And it uncovers the surprising ways we sometimes arrive at the heart of one story through the telling of others.

kristen ar hives: Girl Meets Change Kristen Strong, 2015-09-08 Whether chosen and celebrated--like going off to college or welcoming your first baby--or unexpected and anxiety-inducing--like losing a job or grappling with a broken trust--all change brings stress. Kristen Strong knows about change--especially the kind you didn't choose or expect. What she's fought hard to learn over the years is that change is not something to be feared but something to be received as a blessing from a God who, more often than not, works through change, not in spite of it. Strong has learned to see change not as a grievance but as a grace. In this hope-filled book, she shows women how when we follow God's will, we receive blessings of contentment, purpose, and renewed strength. She encourages women to see change not as the end of their story but as the scenery for this part of life's journey. And she offers practical advice for coping with change in every part of life. Anyone who has struggled to adjust to life's transitions will welcome this warm and personal perspective.

kristen ar hives: The Archival Afterlives of Philippine Cinema Bliss Cua Lim, 2024-01-05 Drawing on cultural policy, queer and feminist theory, materialist media studies, and postcolonial historiography, Bliss Cua Lim analyzes the crisis-ridden history of Philippine film archiving—a history of lost films, limited access, and collapsed archives. Rather than denigrate underfunded Philippine audiovisual archives in contrast to institutions in the global North, *The Archival Afterlives of Philippine Cinema* shows how archival practices of making do can inspire alternative theoretical and historical approaches to cinema. Lim examines formal state and corporate archives, analyzing restorations of the last nitrate film and a star-studded lesbian classic as well as archiving under the Marcos dictatorship. She also foregrounds informal archival efforts: a cinephilic video store specializing in vintage Tagalog classics; a microcuratorial initiative for experimental films; and guerilla screenings for rural Visayan audiences. Throughout, Lim centers the improvisational creativity of audiovisual archivists, collectors, advocates, and amateurs who embrace imperfect access in the face of inhospitable conditions.

kristen ar hives: Archives, Recordkeeping and Social Justice David A. Wallace, Wendy M. Duff, Renée Saucier, Andrew Flinn, 2020-05-10 Archives, Recordkeeping, and Social Justice expands the burgeoning literature on archival social justice and impact. Illuminating how diverse factors shape the relationship between archives, recordkeeping systems, and recordkeepers, this book depicts struggles for different social justice objectives. Discussions and debates about social justice are playing out across many disciplines, fields of practice, societal sectors, and governments, and yet one dimension cross-cutting these actors and engagement spaces has remained unexplored: the role of recordkeeping and archiving. To clarify and elaborate this connection, this volume provides a rigorous account of the engagement of archives and records—and their keepers—in struggles for social justice. Drawing upon multidisciplinary praxis and scholarship, contributors to the volume examine social justice from historical and contemporary perspectives and promote impact methodologies that align with culturally responsive, democratic, Indigenous, and transformative assessment. Underscoring the multiplicity of transformative social justice impacts influenced by recordmaking, recordkeeping, and archiving, the book presents nine case studies from around the world that link the past to the present and offer pathways towards a more just future. Archives, Recordkeeping, and Social Justice will be an essential reading for researchers and students engaged in the study of archives, truth and reconciliation processes, social justice, and human rights. It should also be of great interest to archivists, records managers, and information professionals.
