journey across time textbook: For the Love of Physics Walter Lewin, 2011-05-03 "YOU

HAVE CHANGED MY LIFE" is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. "I walk with a new spring in my step and I look at life through physics-colored eyes," wrote one such fan. When Lewin's lectures were made available online, he became an instant YouTube celebrity, and The New York Times declared, "Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube's greatest hits." For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in For the Love of Physics, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. "I introduce people to their own world," writes Lewin, "the world they live in and are familiar with but don't approach like a physicist—yet." Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it,

Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

journey across time textbook: Happy City Charles Montgomery, 2013-11-12 Charles Montgomery's *Happy City* will revolutionize the way we think about urban life. After decades of unchecked sprawl, more people than ever are moving back to the city. Dense urban living has been prescribed as a panacea for the environmental and resource crises of our time. But is it better or worse for our happiness? Are subways, sidewalks and condo towers an improvement on the car-dependence of sprawl? The award-winning journalist Charles Montgomery finds answers to such questions at the intersection between urban design and the emerging science of happiness, during an exhilarating journey through some of the world's most dynamic cities. He meets the visionary mayor who introduced a "sexy" bus to ease status anxiety in Bogotá; the architect who brought the lessons of medieval Tuscan hill towns to modern-day New York City; the activist who turned Paris's urban freeways into beaches; and an army of American suburbanites who have hacked the design of their own streets and neighborhoods. Rich with new insights from psychology, neuroscience and Montgomery's own urban experiments, *Happy City* reveals how our cities can shape our thoughts as well as our behavior. The message is as surprising as it is hopeful: by retrofitting cities and our own lives for happiness, we can tackle the urgent challenges of our age. The happy city can save the world--and all of us can help build it.

journey across time textbook: Open Heart, Open Mind Clara Hughes, 2017-01-03 The long-awaited memoir by Canada's most celebrated Olympian and advocate for mental health. From one of Canada's most decorated Olympians comes a raw but life-affirming story of one woman's struggle with depression. In 2006, when Clara Hughes stepped onto the Olympic podium in Torino, Italy, she became the first and only athlete ever to win multiple medals in both Summer and Winter Games. Four years later, she was proud to carry the Canadian flag at the head of the Canadian team as they participated in the opening ceremony of the Vancouver Olympic Winter Games. But there's another story behind her celebrated career as an athlete, behind her signature billboard smile. While most professional athletes devote their entire lives to training, Clara spent her teenage years using drugs and drinking to escape the stifling home life her alcoholic father had created in Elmwood, Winnipeg. She was headed nowhere fast when, at sixteen, she watched transfixed in her living room as gold medal speed skater Gaétan Boucher effortlessly raced in the 1988 Calgary Olympics. Dreaming of one day competing herself, Clara channeled her anger, frustration, and raw ambition into the endurance sports of speed skating and cycling. By 2010, she had become a six-time Olympic medalist. But after more than a decade in the gruelling world of professional sports that stripped away her confidence and bruised her body, Clara began to realize that her physical extremes, her emotional setbacks, and her partying habits were masking a severe depression. After winning bronze in the last speed skating race of her career, she decided to retire from that sport, determined to repair herself. She has emerged as one of our most committed humanitarians, advocating for a variety of social causes both in Canada and around the world. In 2010, she became national spokesperson for Bell Canada's Let's Talk campaign in support of mental health awareness, using her Olympic standing to share the positive message of the power of forgiveness. Told with honesty and passion, *Open Heart, Open Mind* is Clara's personal journey through physical and mental pain to a life where love and understanding can thrive. This revelatory and inspiring story will touch the hearts of all Canadians.

journey across time textbook: Journey Through Genius William Dunham, 1991-08 Like masterpieces of art, music, and literature, great mathematical theorems are creative milestones, works of genius destined to last forever. Now William Dunham gives them the attention they deserve. Dunham places each theorem within its historical context and explores the very human and often turbulent life of the creator — from Archimedes, the absentminded theoretician whose absorption in his work often precluded eating or bathing, to Gerolamo Cardano, the sixteenth-century mathematician whose accomplishments flourished despite a bizarre array of misadventures, to the paranoid genius of modern times, Georg Cantor. He also provides step-by-step proofs for the theorems, each easily accessible to readers with no more than a knowledge of high school mathematics. A rare combination of the historical, biographical, and mathematical, Journey Through Genius is a fascinating introduction to a neglected field of human creativity. “It is mathematics presented as a series of works of art; a fascinating lingering over individual examples of ingenuity and insight. It is mathematics by lightning flash.” —Isaac Asimov

Sahara during the 19th century. Based on travelogues from European travelers, recently found Arab sources, historical maps and results from several expeditions, the book gives an overview of the historical periods of the caravan trade as well as detailed information about the infrastructure which was necessary to establish those trade networks. journey across time textbook: All That She Carried Tiya Miles, 2023-04-06 SHORTLISTED FOR THE WOMEN'S PRIZE FOR NON-FICTION LONGLISTED FOR THE BAILLIE GIFFORD PRIZE FOR NON-FICTION NATIONAL BOOK AWARD WINNER NEW YORK TIMES BESTSELLER WINNER OF THE CUNDILL HISTORY PRIZE 'An astonishing account of love, resilience and survival' Sunday Times 'A remarkable book' New York Times 'An extraordinary tale through the generations' Guardian In 1850s South Carolina, Rose, an enslaved woman, faced a crisis: the imminent sale of her daughter Ashley. Thinking quickly, she packed a cotton bag with a few items. Soon after, the nine-year-old girl was separated from her mother and sold. Decades later, Ashley's granddaughter Ruth embroidered this family history on the sack in spare, haunting language. That, in itself, is a story. But it's not the whole story. How does one uncover the lives of people who, in their day, were considered property? Harvard historian Tiya Miles carefully traces these women's faint presence in archival records, and, where archives fall short, she turns to objects, art, and the environment to write a singular history of the experience of slavery, and the uncertain freedom afterward. All That She Carried gives us history as it was lived, a poignant story of resilience and love passed down against steep odds.

journey across time textbook: The Raven's Gift Jon Turk, 2010-01-19 Noted scientist and kayak adventurer undertakes a journey of spiritual healing Jon Turk has kayaked around Cape Horn and paddled across the Pacific Ocean to retrace the voyages of ancient people. In a remote Siberian village, Turk met an elderly Koryak shaman named Moolynaut who invoked the help of a Spirit Raven to mend his fractured pelvis. When the healing was complete, he was able to walk without pain. Turk, finding no rational explanation, sought understanding by traversing the frozen tundra where Moolynaut was born, camping with bands of reindeer herders, and recording stories of their lives and spirituality. Framed by high adventure across the vast and forbidding Siberian landscape, The Raven's Gift creates a vision of natural and spiritual realms interwoven by one man's awakening.

Dr. Shah narrates a cultural and inspirational memoir of a child maturing into a man, then father, determined to succeed despite his obstacles. With a love for history and nature, he paints his story through a lens of the landscapes he journeys. He takes you from India, to Wales and Scotland, and finally to America, where he achieves his psychiatry degree and settles with his family in beautiful West Virginia.
