The benefits of bilingualism and biculturalism such as higher cognitive skills, an awareness of language and sensitivity to other cultures, are being increasingly recognised. However many parents don't know how to start, what methods to use or where to seek help when facing problems. Now Suzanne Barron-Hauwaert, a mother of three trilingual children, teacher and linguist who has lived and worked all over the world, has written a book which provides an inspiring approach to passing on two or more languages to your children. In *Language Strategies for Bilingual Families* she considers several methods of bilingualism and focuses on the one-person one-language approach, in which each parent speaks his or her native language and is responsible for passing on his or her culture. Suzanne questioned over a hundred bilingual families about their experiences and she interviewed thirty families in depth. The results of her study are linked to current academic research, but the book is both readable and relevant to non-academics and provides fascinating insights into being a multilingual family. It will prove an exciting and stimulating read for potential and current mixed-language families.

This engaging book explores just how multiple languages are acquired and sorted out by the brain. . . Costa's work derives from a great fund of knowledge, considerable curiosity and solidly scientific spirit' Philip Hensher Spectator The definitive study of bilingualism and the human brain from a leading neuropsychologist Over half of the world's population is bilingual and yet few of us understand how this extraordinary, complex ability really works. How do two languages co-exist in the same brain? What are the advantages and challenges of being bilingual? How do we learn - and forget - a language? In the first study of its kind, leading expert Albert Costa shares twenty years of experience to explore the science of language. Looking at studies and examples from Canada to France to South Korea, The Bilingual Brain investigates the significant impact of bilingualism on daily life from infancy to old age. It reveals, among other things, how babies differentiate between two languages just hours after birth, how accent affects the way in which we perceive others and even why bilinguals are better at conflict resolution. my mother speaks three languages in spanish: Portrait of a Family with a Fat Daughter Margherita Giacobino, 2018-05-10 'It has been a long while in Italian fiction since such an authentic and engaging voice has appeared.' Bruno Quaranta in La Stampa 'This memoir of four generations of a family provides a vivid and eloquent picture of Italian life stretching from the late 19th century,

when the peasant lifestyle had changed little from medieval times, up to the consumer culture of the 1950s. It's a saga that embraces characters like Maria, who emigrated to the USA for an unwise marriage, returning a few years later with a daughter and paralysis down one side of her body, and the author's father, Angelo, a feckless chap who was interned in a German POW camp. In writing about her female-dominated family, some of whom she is old enough to remember – most notably the matriarchal grandmother Ninin – Giacobino imbues her account with a real sense of intimacy. She has a powerful feel for traditional Italian culture, her early chapters conjuring up a time when the hierarchy of the family was the only true reality, fairness was unknown and “a moment's tenderness must last a week”. Alastair Mabbutt in *The Herald* 'An epic novel, which is the story of an Italy which no longer exists, becomes the portrait of a family. It is a novel which touches the heart.' Valeria Parrella in *Grazie Beautifully* and sympathetically evoking the intense world of working-class Turin, this story is a pleasure to read. *The Catholic Herald* '... well written and a fascinating read. I learned a great deal about aspects of Italian social history through the eyes of this one family. The translation is clever too, trying to keep a flavour of Piedmontese dialect while making sure English-speaking readers are not alienated by the use of too many foreign words. The characters are all vividly portrayed, from Ninin's drunken and predatory grandfather, to the various aunts, and down to happy-go-lucky dog Pucci. .' *The Historical Novel Society Review* A warm and direct story, memorable for its vivid description and depth of cultural understanding. Thomas Tallon in *The Tablet* 'It's like a rural version of Elena Ferrante's Neapolitan saga . It's a powerful and atmospheric record of largely unexplored terrain.' Margaret Drabble's Book of the Year in *The Times Literary Supplement*

my mother speaks three languages in spanish: Tell about Night Flowers Julia Eichelberger, 2015-07-08 Tell about Night Flowers presents previously unpublished letters by Eudora Welty, selected and annotated by scholar Julia Eichelberger. Welty published many of her best-known works in the 1940s: *A Curtain of Green*, *The Wide Net*, *The Robber Bridegroom*, *Delta Wedding*, and *The Golden Apples*. During this period, she also wrote hundreds of letters to two friends who shared her love of gardening. One friend, Diarmuid Russell, was her literary agent in New York; the other, John Robinson, was a high school classmate and an aspiring writer who served in the Army in WWII, and long the focus of Welty's affection. Welty's lyrical, witty, and poignant discussions of gardening and nature are delightful in themselves; they are also figurative expressions of Welty's views of her writing and her friendships. Taken together with thirty-five illustrations, they form a poetic narrative of their own, chronicling artistic and psychic developments that were underway before Welty was fully conscious of them. By 1949 her art, like her friendships, had evolved in ways that she would never have predicted in 1940. Tell about Night Flowers not only lets readers glimpse Welty in her garden; it also reveals a brilliant and generous mind responding to the public events, people, art, and natural landscapes Welty encountered at home and on her travels during the 1940s. This book enhances our understanding of the life, landscape, and art of a major American writer.

my mother speaks three languages in spanish: Forced Out Susan J. Terrio, 2024-02-20 Features the stories of undocumented mothers who reunite with their children in the US years after fleeing violence at home Facing escalating chaos and violence in their home countries, many Central American mothers have found that a desperate flight to the north was their only choice. Many left their children behind in order to spare them the hardships of the journey. If they made it across the border without getting locked up or deported, they entered a country increasingly unwilling to recognize claims of asylum. This book features the stories of women who crossed the border without

encountering immigration authorities, in some cases several times, and settled in the greater Washington, DC, area, living in the shadows for years. By centering on the voices of the women themselves, it offers an intimate look at what drove them from home and the challenges they face in reuniting years later with their children. *Forced Out* traces the women's evolving attitudes toward the violence embedded in institutions and everyday life in their home countries, as well as their continued vulnerability and dependence in the US. It also highlights the challenges they face in parenting children adapting to American society and learning English while living with mothers who had left them years before and become strangers to them. Rather than sensationalizing their trauma or dwelling on their vulnerability, the stories reveal the women's rich, complex inner lives, their resilience in overcoming senseless violence, and their unswerving commitment to bettering their children's lives. Clear, vivid, and impactful, this is a humbling and humane look at the state of migration to America today.

my mother speaks three languages in spanish: Bilingualism Across the Lifespan Kenneth Hyltenstam, Loraine K. Obler, 1989-09-29 *Bilingualism Across the Lifespan* examines the dynamics of bilingual language processing over time from the perspectives of neurolinguistics, psycholinguistics and sociolinguistics. This multidisciplinary approach is fundamental to an understanding of how the bilingual's two (or more) language systems interact with each other and with other higher cognitive systems, neurological substrates, and social systems - a central theme of this volume. Contributors examine the nature of bilingualism during various phases of the lifecycle - childhood, adulthood, and old age - and in various health/pathology conditions. Topics range from code separation in the young bilingual child, across various types of language pathologies in adult bilinguals, to language choice problems in dementia. The volume thus offers a broad overview of current theoretical and empirical approaches to the study of bilingualism. It will interest and stimulate researchers and graduate students in the fields of linguistics, neuropsychology, and developmental psychology, as well as in foreign language teaching, speech pathology, educational psychology, and special education.

my mother speaks three languages in spanish: **Feminist Views on the English Stage** Elaine Aston, 2003-11-24 Feminist Views on the English Stage, first published in 2003, is an exciting and insightful study on drama from a feminist perspective, one that challenges an idea of the 1990s as a 'post-feminist' decade and pays attention to women's playwriting marginalized by a 'renaissance' of angry young men. Working through a generational mix of writers, from Sarah Kane, the iconoclastic 'bad girl' of the stage, to the 'canonical' Caryl Churchill, Elaine Aston charts the significant political and aesthetic changes in women's playwriting at the century's end. Aston also explores writing for the 1990s in theatre by Sarah Daniels, Bryony Lavery, Phyllis Nagy, Winsome Pinnock, Rebecca Prichard, Judy Upton and Timberlake Wertenbaker.

my mother speaks three languages in spanish: Down Country Lanes, Behind Abandoned Houses Keith V. Bletzer, 2015-07-15 Based on six years of extended ethnography in multiple agricultural areas of the Eastern United States, Down Country Lanes, Behind Abandoned Houses is a monograph which explores the lives of migrant and seasonal farm workers. The six-year study secured multi-setting field data in primary, secondary and casual sites, and audio-taped narrative life stories from men and women who harvest and perform the related tasks that help to make the many foods which we enjoy in abundance. The study presented in this book elaborates vignettes from field observations with a focus on workers who use drugs and alcohol, and is complemented by formal (narrative life stories) and informal interviews. The author explores diverse field data that reveal the hardships, exclusion and social adversities that migrant farm workers experience many times more often than any other social group with considerable susceptibility to drug / alcohol use. Down Country Lanes, Behind Abandoned Houses gives readers a perspective about farm workers' social vulnerability across multiple agricultural areas, while comparing willful neglect and social non-existence experienced by farm workers to a gray zone of contemporary horrors in the way that these men and women have been viewed and treated over many decades. The monograph is an invaluable reference for the study of social problems, substance abuse, trans-national migratory experiences and field methods in sociology. The book also serves as a contemporary handbook on the anthropology of American agricultural labor.

my mother speaks three languages in spanish: *Queer, Latinx, and Bilingual* Holly Cashman, 2017-11-10 Shortlisted for the 2018 BAAL Book Prize This book is a sociolinguistic ethnography of LGBT Mexicans/Latinxs in Phoenix, Arizona, a major metropolitan area in the U.S. Southwest. The main focus of the book is to examine participants' conceptions of their ethnic and sexual identities

and how identities influence (and are influenced by) language practices. This book explores the intersubjective construction and negotiation of identities among queer Mexicans/Latinxs, paying attention to how identities are co-constructed in the interview setting in coming out narratives and in narratives of silence. The book destabilizes the dominant narrative on language maintenance and shift in sociolinguistics, much of which relies on a (heterosexual) family-based model of intergenerational language transmission, by bringing those individuals often at the margin of the family (LGBTQ members) to the center of the analysis. It contributes to the queering of bilingualism and Spanish in the U.S., not only by including a previously unstudied subgroup (LGBTQ people), but also by providing a different lens through which to view the diverse language and identity practices of U.S. Mexicans/Latinxs. This book addresses this exclusion and makes a significant contribution to the study of bilingualism and multilingualism by bringing LGBTQ Latinas/os to the center of the analysis.

my mother speaks three languages in spanish: Bilingualism and Identity Mercedes Niño-Murcia, Jason Rothman, 2008-04-02 Sociolinguists have been pursuing connections between language and identity for several decades. But how are language and identity related in bilingualism

and multilingualism? Mobilizing the most current methodology, this collection presents new research on language identity and bilingualism in three regions where Spanish coexists with other languages. The cases are Spanish-English contact in the United States, Spanish-indigenous language contact in Latin America, and Spanish-regional language contact in Spain. This is the first comparativist book to examine language and identity construction among bi- or multilingual speakers while keeping one of the languages constant. The sociolinguistic standing of Spanish varies among the three regions depending whether or not it is a language of prestige. Comparisons therefore afford a strong constructivist perspective on how linguistic ideologies affect bi/multilingual identity formation.

With data from over 100 international families this book investigates the reality of family life with two or more children and languages.

my mother speaks three languages in spanish: Considering Trilingual Education Kathryn Henn-Reinke, 2012-04-27 Based in case studies conducted in the US, Europe, and Latin America, this book explores the feasibility and benefits of trilingual/ multilingual education in the United States. Currently, there are few programs in the country of this nature, as educators tend to conclude that English-language learners would be overwhelmed by study in additional languages. Henn-Reinke builds an argument supporting trilingual education in the US, discussing issues of identity, curriculum, pedagogy, and the impact of other psycho-socio-linguistic factors.
