Understanding the MOS Roadmap USMC

The MOS roadmap USMC is a detailed guide developed to assist Marines in planning their careers effectively. It outlines the recommended training, education, and professional milestones for each Military Occupational Specialty within the Marine Corps. The roadmap is tailored for every MOS, providing Marines with a clear path from entry-level to advanced positions in their field. By following the roadmap, Marines can identify required schools, recommended qualifications, and career development opportunities. The MOS roadmap is updated regularly to reflect changes in military technology, doctrine, and organizational needs. Ultimately, it serves as a blueprint for career success and personal growth within the Marine Corps.

Key Components of an MOS Roadmap

An effective MOS roadmap USMC includes several core elements that guide Marines through their career journey. These components are designed to ensure each Marine acquires the necessary skills, knowledge, and experience at every stage of their service. Understanding each part of the roadmap helps Marines set achievable goals and track their progress.

Training and Education Milestones

Each MOS roadmap features a progression of training schools, certifications, and educational requirements. These may include formal classroom instruction, online coursework, and on-the-job training. The roadmap specifies when these milestones should be completed to remain competitive and fully qualified for promotion.

Recommended Professional Development

Beyond mandatory training, the MOS roadmap USMC provides recommendations for additional professional development. This could involve leadership courses, cross-training in related specialties, or participation in special projects. These recommendations help Marines broaden their expertise and prepare for future leadership roles.

Career Path Options

The roadmap outlines multiple career paths within each MOS, including opportunities for lateral movement, special assignments, or advanced technical training. Marines are encouraged to review these options to find a path that aligns with their personal ambitions and the needs of the Corps.

- Initial training and MOS school
- Required and recommended courses
- Promotion prerequisites
- Leadership development opportunities
- Collateral duty options
- Transition planning for civilian careers

Benefits of Using the MOS Roadmap USMC

Utilizing the MOS roadmap USMC provides numerous advantages for both individual Marines and the Marine Corps as an organization. The structured approach ensures that Marines are always prepared for the next stage in their career and can meet mission requirements effectively.

Improved Career Planning

The roadmap takes the guesswork out of career planning by providing a step-by-step guide. Marines can see what is expected of them at each rank and prepare in advance for upcoming opportunities and challenges.

Enhanced Readiness and Competency

Following the MOS roadmap ensures Marines maintain the technical and tactical proficiency required for their specialty. This readiness translates to increased mission effectiveness and unit cohesion.

Personal and Professional Growth

The roadmap encourages Marines to pursue personal growth through education and self-development. By following the recommended steps, Marines can achieve higher qualifications, gain valuable skills, and position themselves for promotion or transition to civilian careers.

How to Navigate Your USMC MOS Roadmap

Navigating the MOS roadmap USMC involves understanding your current career stage and planning the necessary steps for advancement. Marines are encouraged to review their roadmap regularly and consult with mentors or career planners for guidance.

Assess Your Current Position

Begin by identifying your current rank, completed training, and qualifications. Compare this with the roadmap to determine what requirements you have met and which are pending.

Set Short-Term and Long-Term Goals

Use the roadmap as a guide to set achievable short-term and long-term career goals. These may include completing specific training, earning new certifications, or preparing for leadership positions.

Leverage Mentorship and Resources

Mentors, career planners, and supervisors are valuable resources when navigating your MOS roadmap. They can provide insights into best practices, recommend additional training, and help you stay on track.

1. Review your MOS roadmap and career milestones.
2. Identify required and recommended training.

3. Discuss your career goals with a mentor or supervisor.
4. Develop a timeline for completing milestones.
5. Track your progress and update your plan regularly.

Resources for MOS Roadmap Information

The Marine Corps provides several resources to access the latest MOS roadmap USMC information. Staying informed ensures Marines are aware of any changes or updates to their career path.

Official USMC Publications

The primary source for MOS roadmap updates is official Marine Corps publications. These documents are regularly revised to reflect changes in training requirements and career progression standards.

Training and Education Centers

Many Marine Corps bases have dedicated training and education centers where Marines can access roadmaps, sign up for courses, and receive career counseling. These centers offer workshops, seminars, and one-on-one guidance.

Unit Career Planners

Every unit has a designated career planner responsible for assisting Marines with their career development. Career planners help interpret the MOS roadmap, identify upcoming opportunities, and facilitate enrollment in required training.

Tips for Maximizing Your MOS Roadmap

Using the MOS roadmap USMC to its fullest potential requires proactive engagement and strategic planning. Marines who actively manage their roadmap are better positioned for promotion and success.

Stay Informed of Updates

MOS roadmaps are periodically updated. Regularly check with your unit or official sources to ensure you are following the most current guidance for your specialty.

Take Initiative in Professional Development

Pursue additional training, certifications, and leadership opportunities beyond the minimum requirements. Demonstrating initiative can set you apart from your peers and open doors for advancement.

Document Your Achievements

Keep detailed records of all completed training, courses, and achievements. This documentation is essential for promotion boards and transition planning.

MOS Roadmap USMC: Charting Your Course to Success in the Marine Corps

Are you dreaming of a career in the United States Marine Corps? Choosing your Military Occupational Specialty (MOS) is a crucial decision that will shape your entire experience. This comprehensive guide provides a detailed MOS roadmap for USMC hopefuls, walking you through the process of selecting the right path, understanding training requirements, and navigating your career progression within the Corps. We'll cover everything from understanding your aptitude and interests to exploring various MOS options and planning for long-term success. This isn't just another list; it's your strategic guide to navigating the exciting, challenging, and rewarding world of Marine Corps careers.

Understanding the USMC MOS System

Before diving into specific MOS options, it's crucial to understand the fundamental structure. Your MOS is essentially your job within the Marines. The system is designed to match individual aptitudes and interests with critical roles within the organization. The selection process involves a combination of factors:

ASVAB Scores: Your Armed Services Vocational Aptitude Battery (ASVAB) scores are a primary determinant. Different MOS fields require varying levels of proficiency in specific areas like math, science, and verbal reasoning.

Physical Fitness: Meeting the rigorous physical fitness standards of the Marines is non-negotiable. Your physical capabilities will influence the MOS options available to you.

Personal Preferences: While scores and physical fitness are crucial, your personal interests and career aspirations play a significant role in choosing an MOS that suits you.

Exploring Key MOS Categories

The USMC offers a diverse range of MOS options, broadly categorized into several key areas:

Combat MOS:

Infantry (03xx): The backbone of the Marine Corps, Infantry MOSs involve direct combat operations, requiring exceptional physical and mental resilience.

Artillery (08xx): This field focuses on providing fire support to ground troops, involving the operation and maintenance of various artillery systems.

Tank Crewman (18xx): Operating and maintaining tanks, tank crew members are integral to armored warfare capabilities.

Combat Engineer (13xx): These specialists build and dismantle fortifications, clear obstacles, and provide essential engineering support in combat situations.

Support MOS:

Logistics (30xx): Essential for supplying and maintaining the Marine Corps, these MOSs encompass transportation, supply, and maintenance roles.

Aviation (60xx, 70xx): From pilots and crew members to maintenance specialists, aviation MOSs offer a diverse range of opportunities for those with an interest in flying and aircraft maintenance.

Communications (28xx): These roles are crucial for maintaining effective communication and information flow within the Marine Corps.

Intelligence (02xx): Analyzing information, gathering intelligence, and supporting strategic decision-making are core functions of these roles.

Technical MOS:

Cyber Warfare (17xx): With growing importance in modern warfare, these MOSs involve securing and defending Marine Corps networks and systems.

Medical (68xx): Providing medical care to Marines in various settings, from frontline combat to support roles.

Creating Your Personalized MOS Roadmap

After understanding the available MOS options, you can start crafting your personalized roadmap. This involves:

Researching specific MOSs: Dive deep into the responsibilities, training requirements, and career progression pathways for the MOSs that interest you.

Assessing your ASVAB scores: Understand how your scores align with the minimum requirements for your preferred MOS options.

Preparing for the physical fitness test: Start a rigorous training regime to ensure you meet the demanding physical standards.

Talking to recruiters: A Marine Corps recruiter can provide invaluable guidance and support in the MOS selection process.

Considering long-term goals: Think about your career aspirations beyond your initial enlistment. Some MOSs offer better pathways for promotion and civilian career transitions.

Navigating Your Career Progression

Once you've chosen your MOS and completed your initial training, your career progression within the Marine Corps will depend on factors such as performance, leadership potential, and available opportunities. This can include promotions, specialized training courses, and assignments to various units and deployments.

Conclusion

Choosing your MOS is a significant step toward building a successful and fulfilling career in the USMC. By meticulously planning your path, understanding your strengths, and seeking guidance from experienced professionals, you can chart a course towards achieving your goals within the Marine Corps. Remember to utilize resources like the official USMC website and speak with recruiters to get the most accurate and up-to-date information.

FAQs

1. Can I change my MOS after I enlist? While initially difficult, MOS changes are possible under certain circumstances. Performance, available slots, and needs of the Marine Corps will all play a role.
2. What is the typical training length for a USMC MOS? Training durations vary significantly depending on the MOS. Some MOSs may involve several weeks of training, while others can last for many months.
3. How does my ASVAB score impact my MOS options? Your ASVAB scores act as a filter; you'll need to meet the minimum score requirements for each MOS you're interested in.
4. What if I don't meet the physical fitness standards? Failing to meet the physical standards will disqualify you from most MOS options. Focus on rigorous physical training to meet these requirements.
5. Are there MOS options for those with prior civilian experience? Yes, prior civilian experience can be beneficial and might influence the suitability for specific MOS roles. Highlight relevant skills during the recruitment process.

mos roadmap usmc: The 71F Advantage National Defense University Press, 2010-09 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed

to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

mos roadmap usmc: First to Fight V H Krulak, 1999-02-22 In this riveting insider's chronicle, legendary Marine General Brute Krulak submits an unprecedented examination of U.S. Marines—their fights on the battlefield and off, their extraordinary esprit de corps. Deftly blending history with autobiography, action with analysis, and separating fact from fable, General Krulak touches the very essence of the Corps: what it means to be a Marine and the reason behind its consistently outstanding performance and reputation. Krulak also addresses the most basic but challenging question of all about the Corps: how does it manage to survive—even to flourish—despite overwhelming political odds and, as the general writes, an extraordinary propensity for shooting itself in the foot? To answer this question Krulak examines the foundation on which the Corps is built, a system of intense loyalty to God, to country, and to other Marines. He also takes a close look at Marines in war, offering challenging accounts of their experiences in World War II, Korea, and Vietnam. In addition, he describes the Corps's relationship to other services, especially during the unification battles following World War II, and offers new insights into the decision-making process in times of crisis. First published in hardcover in 1984, this book has remained popular ever since with Marines of every rank.

The strains that these deployments, the associated increases in operational tempo, and the general challenges of military life affect not only service members but also the people who depend on them and who support them as they support the nation — their families. Family members provide support to service members while they serve or when they have difficulties; family problems can interfere with the ability of service members to deploy or remain in theater; and family members are central influences on whether members continue to serve. In addition, rising family diversity and complexity will likely increase the difficulty of creating military policies, programs and practices that adequately support families in the performance of military duties. Strengthening the Military Family Readiness System for a Changing American Society examines the challenges and opportunities facing military families and what is known about effective strategies for supporting and protecting military children and families, as well as lessons to be learned from these experiences. This report offers recommendations regarding what is needed to strengthen the support system for military families.

mos roadmap usmc: Utmost Savagery Estate of Joseph H Alexander, 2008-09-01 Marine combat veteran and award-winning military historian Joseph Alexander takes a fresh look at one of the bloodiest battles of the Pacific War. His gripping narrative, first published in 1995, has won him many prizes, with critics lauding his use of Japanese documents and his interpretation of the significance of what happened. The first trial by fire of America's fledgling amphibious assault doctrine, the violent three-day attack on Tarawa, a seemingly invincible Japanese island fortress of

barely three hundred acres, left six thousand men dead. This book offers an authoritative account of the tactics, innovations, leadership, and weapons employed by both antagonists. Alexander convincingly argues that without the vital lessons of Tarawa the larger amphibious victories to come at Saipan, Iwo Jima, and Okinawa might not have been possible.

A key aspect of this construct is the need for flexible, adaptive command, control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) systems. To assist development of this capability, the Navy asked the NRC to examine C4ISR for carrier, expeditionary, and strike and missile defense strike groups, and for expeditionary strike forces. This report provides an assessment of C4ISR capabilities for each type of strike group; recommendations for C4ISR architecture for use in major combat operations; promising technology trends; and an examination of organizational improvements that can enable the recommended architecture.

mos roadmap usmc: Risk and Resilience in U.S. Military Families Shelley MacDermid-Wadsworth, David Riggs, 2010-11-03 War related separations challenge military families in many ways. The worry and uncertainty associated with absent family members exacerbates the challenges of personal, social, and economic resources on the home front. U.S. military operations in Iraq and Afghanistan have sent a million service personnel from the U.S. alone into conflict areas leaving millions of spouses, children and others in stressful circumstances. This is not a new situation for military families, but it has taken a toll of magnified proportions in recent times. In addition, medical advances have prolonged the life of those who might have died of injuries. As a result, more families are caring for those who have experienced amputation, traumatic brain injury, and profound psychological wounds. The Department of Defence has launched unprecedented efforts to support service members and families before, during, and after deployment in all locations of the country as well as in remote locations. Stress in U.S. Military Families brings together an interdisciplinary group of experts from the military to the medical to examine the issues of this critical problem. Its goal is to review the factors that contribute to stress in military families and to point toward strategies and policies that can help. Covering the major topics of parenting, marital functioning, and the stress of medical care, and including a special chapter on single service members, it serves as a comprehensive guide for those who will intervene in these problems and for those undertaking their research.

This publication describes a leadership philosophy that speaks to who we are as Marines. It is about the relationship between the leader and the led. It is also about the bond between all Marines that is formed in the common forge of selfless service and shared hardships. It's in this forge where Marines are hardened like steel, and the undefinable spirit that forms the character of our Corps is born. It draws from shared experiences, hardships, and challenges in training and combat. Leading Marines is not meant to be read passively; as you read this publication, think about the material. You should reflect on, discuss, and apply the concepts presented in this publication. Furthermore, it is the responsibility of leaders at all levels to mentor and develop the next generation of Marine leaders.

He became a chronicler, a historian, a storyteller who turns the extremes of the war in the Pacific—the terror, the camaraderie, the banal and the extraordinary—into terms we mortals can grasp."—Tom Hanks NEW YORK TIMES BESTSELLER In The Wall Street Journal, Victor Davis Hanson named *With the Old Breed* one of the top five books on epic twentieth-century battles. Studs Terkel interviewed the author for his definitive oral history, *The Good War*. Now E. B. Sledge's acclaimed first-person account of fighting at Peleliu and Okinawa returns to thrill, edify, and inspire a new generation. An Alabama boy steeped in American history and enamored of such heroes as George Washington and Daniel Boone, Eugene B. Sledge became part of the war's famous 1st Marine Division—3rd Battalion, 5th Marines. Even after intense training, he was shocked to be thrown into the battle of Peleliu, where "the world was a nightmare of flashes, explosions, and snapping bullets." By the time Sledge hit the hell of Okinawa, he was a combat vet, still filled with fear but no longer with panic. Based on notes Sledge secretly kept in a copy of the New Testament, *With the Old Breed* captures with utter simplicity and searing honesty the experience of a soldier in the fierce Pacific Theater. Here is what saved, threatened, and changed his life. Here, too, is the story of how he learned to hate and kill—and came to love—his fellow man. "In all the literature on the Second World War, there is not a more honest, realistic or moving memoir than Eugene Sledge's. This is the real deal, the real war: unvarnished, brutal, without a shred of sentimentality or false patriotism, a profound primer on what it actually was like to be in that war. It is a classic that will outlive all the armchair generals' safe accounts of—not the 'good war'—but the worst war ever."—Ken Burns

We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

mos roadmap usmc: Service Member Separation Michael Schwille, Agnes Gereben Schaefer, 2019-05-14 Electronic systems are becoming increasingly complicated and interconnected, and those of the U.S. Department of Defense (DoD) are no exception. Due to the evolution of electronic systems, combined with the need to save time, energy, and money, DoD plans to replace paper delivery of servicemember separation information with electronic delivery. A timely analysis is critical to ensure DoD is best positioned to optimize and effectively orchestrate this opportunity. Clear, authoritative information on characterization of service and reasons for separation is critical for individuals as they re-enlist, change duty status, or transfer into civilian employment; for dependents and survivors; for government agencies that adjudicate veteran status and benefits; and for military departments, as they move toward fully integrated digital databases. DoD's DD Form 214 has existed since the 1950s, when it standardized information across the services by replacing service-level forms. The form is largely unchanged since that time and has remained the defining document to verify a servicemember's discharge from active duty. As

electronic information supplants paper, information provided by the services must continue to meet the important purposes of DD Form 214. To ensure consistency across the services and avoid omission of critical information, DoD needs an in-depth analysis of the current use of DD Form 214 to identify ways in which it could be improved to meet the diverse needs of the numerous organizations and individuals who use and depend on it.

mos roadmap usmc: Building Toward an Unmanned Aircraft System Training Strategy Bernard Rostker, 2014 Unmanned aircraft systems (UASs) have become increasingly prevalent in and important to U.S. military operations. Initially serving only as reconnaissance or intelligence platforms, they now carry out such other missions as attacking enemy forces. The swift expansion in their numbers and in the demand for their employment has, however, significantly increased demands on logistics and training systems. The challenge is not simply training system operators but also training operational forces and their commanders to integrate the systems into combat operations. Much of that aspect of training has thus far happened as units employ the systems in actual operations - essentially, on-the-job training. UAS training, particularly for the employment of UASs, now needs to be integrated more formally and cost-effectively into service and joint training programs. This report develops a general concept for training military forces in employment of UASs and a framework for addressing the training requirements and discusses the limits of existing infrastructure in supporting UAS training. Interoperability among services is another issue, because services have thus far mainly developed training suitable for their own needs. But the services have established a set of multiservice tactics, techniques, and procedures for UASs, which should facilitate interoperability training. At present, units are not always ready for joint training, so the focus should be on improving training at the unit level in the employment of UAS capabilities, with the overall guiding principle being to train as we fight.

Wired for War is a book of its time: this is strategy for the Facebook generation." —Foreign Affairs "An engrossing picture of a new class of weapon that may revolutionize future wars. . ." —Kirkus Reviews P. W. Singer explores the greatest revolution in military affairs since the atom bomb: the dawn of robotic warfare We are on the cusp of a massive shift in military technology that threatens to make real the stuff of I, Robot and The Terminator. Blending historical evidence with interviews of an amazing cast of characters, Singer shows how technology is changing not just how wars are fought, but also the politics, economics, laws, and the ethics that surround war itself. Travelling from the battlefields of Iraq and Afghanistan to modern-day skunk works in the midst of

suburbia, *Wired for War* will tantalise a wide readership, from military buffs to policy wonks to gearheads.

mos roadmap usmc: A Historical Review and Analysis of Army Physical Readiness Training and Assessment Whitfield East, 2013-12 The Drillmaster of Valley Forge-Baron Von Steuben-correctly noted in his Blue Book how physical conditioning and health (which he found woefully missing when he joined Washington's camp) would always be directly linked to individual and unit discipline, courage in the fight, and victory on the battlefield. That remains true today. Even an amateur historian, choosing any study on the performance of units in combat, quickly discovers how the levels of conditioning and physical performance of Soldiers is directly proportional to success or failure in the field. In this monograph, Dr. Whitfield Chip East provides a pragmatic history of physical readiness training in our Army. He tells us we initially mirrored the professional Armies of Europe as they prepared their forces for war on the continent. Then he introduces us to some master trainers, and shows us how they initiated an American brand of physical conditioning when our forces were found lacking in the early wars of the last century. Finally, he shows us how we have and must incorporate science (even when there exists considerable debate!) to contribute to what we do-and how we do it-in shaping today's Army. Dr. East provides the history, the analysis, and the pragmatism, and all of it is geared to understanding how our Army has and must train Soldiers for the physical demands of combat. Our culture is becoming increasingly "unfit, due to poor nutrition, a lack of adequate and formal exercise, and too much technology. Still, the Soldiers who come to our Army from our society will be asked to fight in increasingly complex and demanding conflicts, and they must be prepared through new, unique, and scientifically based techniques. So while Dr. East's monograph is a fascinating history, it is also a required call for all leaders to better understand the science and the art of physical preparation for the battlefield. It was and is important for us to get this area of training right, because getting it right means a better chance for success in combat.

mos roadmap usmc: The Bridge at Dong Ha Estate of John G. Miller, 1996-08-19 This is the true story of the legendary Vietnam War hero John Ripley, who braved intense enemy fire to destroy a strategic bridge and stall a major North Vietnamese invasion into the South in April 1972. Told by a fellow Marine, the account lays bare Ripley's innermost thoughts as he rigged 500 pounds of explosives by hand-walking the beams beneath the bridge, crimped detonators with his teeth, and raced the burning fuses back to shore, thus saving his comrades from certain death. First published in 1989, the book has broad appeal as a riveting tale of adventure. But John Miller has taken this daring act of heroism beyond the specifics of time and place to provide new insights into the nature of war and warriors, characteristics that have remained unchanged for centuries and will remain valid for generations to come. It has been on the Marine Corps Commandant's recommended reading list since 1990. Newly illustrated by Col. Charles Waterhouse, USMCR (Ret.).

mos roadmap usmc: Command in War Martin Van Creveld, 1987-01-01 Many books have been written about strategy, tactics, and great commanders. This is the first book to deal exclusively with the nature of command itself, and to trace its development over two thousand years from ancient Greece to Vietnam. It treats historically the whole variety of problems involved in commanding armies, including staff organization and administration, communications methods and technologies, weaponry, and logistics. And it analyzes the relationship between these problems and military strategy. In vivid descriptions of key battles and campaigns—among others, Napoleon at Jena, Moltke's Königgrätz campaign, the Arab-Israeli war of 1973, and the Americans in Vietnam—Martin van Creveld focuses on the means of command and shows how those means worked in practice. He finds that technological advances such as the railroad, breech-loading rifles, the telegraph and later the radio, tanks, and helicopters all brought commanders not only new

tactical possibilities but also new limitations. Although vast changes have occurred in military thinking and technology, the one constant has been an endless search for certainty—certainty about the state and intentions of the enemy's forces; certainty about the manifold factors that together constitute the environment in which war is fought, from the weather and terrain to radioactivity and the presence of chemical warfare agents; and certainty about the state, intentions, and activities of one's own forces. The book concludes that progress in command has usually been achieved less by employing more advanced technologies than by finding ways to transcend the limitations of existing ones.

mos roadmap usmc: Mcdp 5 Planning Department of Defense, 2017-05-22 This publication describes the theory and philosophy of military planning as practiced by the U.S. Marine Corps. The intent is to describe how we can prepare effectively for future action when the future is uncertain and unpredictable. In so doing, this publication provides all Marines a conceptual framework for planning in peace, in crisis, or in war. This approach to planning is based on our common understanding of the nature of war and on our warfighting philosophy of maneuver warfare as described in Marine Corps Doctrinal Publication (MCDP) 1, Warfighting.

The case studies span the major wars of the twentieth-century from the perspectives of several great powers and offer both a primer for planners of military deception and a caution for all military personnel to remain constantly on guard for practitioners of this ancient art.

mos roadmap usmc: U.S. Marines in Afghanistan, 2001-2009 U S Marine Corps History Division, 2017-02-05 This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield. Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the three-block war. Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and

Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the gains made as a result of Army General David H. Petraeus' surge strategy in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story *How We Lost the War We Won*. In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the Afghan mission from the Army. . . .

mos roadmap usmc: Beyond Close Air Support Bruce Pirnie, Adam Grissom, Alan Vick, Karl P. Mueller, David T. Orletsky, 2005 Operations in Afghanistan and Iraq have renewed interest in close air support and the integration of air and ground power. In particular situations, either might predominate, and their relationship is likely to shift over the course of a campaign. This report addresses three questions: (1) How should air attack and ground maneuver be integrated? (2) How should the terminal attack control function be executed? (3) How should ground maneuver/fires and air attack be deconflicted? It recommends that the Army and the Air Force work together to develop new concepts and technologies to improve the partnering of air and ground. It recommends new processes to effectively designate targets and improved control mechanisms to exploit the benefits of the digital battlefield.

mos roadmap usmc: Building Diplomacy Elizabeth Gill Lui, Keya Keita, Jane C. Loeffler, 2004 Embassy architecture and design ranges from the humble to the stately, from the practical to the grand. *Building Diplomacy* is the first comprehensive photographic portrait of the official face of American diplomacy around the world. Elizabeth Gill Lui traveled to fifty countries to photograph American embassies, chanceries, and ambassadors' residences. This record of her journey includes approximately five hundred artful and eloquent interior and exterior views shot by Lui with a large-format camera. Keya Keita, Lui's daughter and partner on the project, shot a live-action documentary of embassies and the cultural milieu of each nation Lui and Keita visited. The text includes an essay by Jane Loeffler detailing the history of the U.S. Department of State's building program. America's commitment to historic preservation of properties has been realized in Buenos Aires, London, Paris, Prague, and Tokyo. The modernist tradition is showcased in Argentina, Greece, India, Indonesia, Mexico, the Netherlands, and Uruguay. Vernacular buildings adapted to diplomatic use are widespread: Lui photographed examples of adapted reuse in Ghana, Iceland, Mongolia, Myanmar, and Palau. Buildings that reflect Europe's colonial legacy are also in evidence. After the 1983 bombing in Beirut, embassy construction began to reflect increased security concerns. Embassies built after 1998, although isolated within walled compounds, are well regarded by those who work in them. The author makes a case that embassy architecture is a critical aspect of American identity on the international landscape and can be formative in defining a new cultural diplomacy in the twenty-first century. Structured geographically, *Building Diplomacy* portrays embassies in Africa, East Asia, Europe, the Near East, the Pacific, South Asia, and the Western Hemisphere. An appendix lists the architects and designers of the featured buildings. More information about *Building Diplomacy* is also available.

mos roadmap usmc: Test & Evaluation Management Guide: August 2016 Department Of Defense, 2019-03-06 This PRINT REPLICA contains the 6th edition of the Test & Evaluation Management Guide (TEMG). The Test & Evaluation Management Guide is intended primarily for use in courses at DAU and secondarily as a generic desk reference for program and project management, and Test & Evaluation (T&E) personnel. It is written for current and potential acquisition management personnel and assumes some familiarity with basic terms, definitions, and processes as employed by the DoD acquisition process. The Test & Evaluation Management Guide is designed to assist Government and industry personnel in executing their management responsibilities relative to the T&E support of defense systems and facilitate learning during Defense Acquisition University coursework. The objective of a well-managed T&E program is to

provide timely and accurate information to decision makers and program managers (PMs). The Test & Evaluation Management Guide was developed to assist the acquisition community in obtaining a better understanding of who the decision makers are and determining how and when to plan T&E events so that they are efficient and effective. Why buy a book you can download for free? We print this book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. We look over each document carefully and replace poor quality images by going back to the original source document. We proof each document to make sure it's all there - including all changes. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. <https://usgovpub.com>

mos roadmap usmc: The Noncommissioned Officer and Petty Officer Department of Defense, National Defense University Press, 2020-02-10 The Noncommissioned Officer and Petty Officer BACKBONE of the Armed Forces. Introduction The Backbone of the Armed Forces To be a member of the United States Armed Forces--to wear the uniform of the Nation and the stripes, chevrons, or anchors of the military Services--is to continue a legacy of service, honor, and patriotism that transcends generations. Answering the call to serve is to join the long line of selfless patriots who make up the Profession of Arms. This profession does not belong solely to the United States. It stretches across borders and time to encompass a culture of service, expertise, and, in most cases, patriotism. Today, the Nation's young men and women voluntarily take an oath to support and defend the Constitution of the United States and fall into formation with other proud and determined individuals who have answered the call to defend freedom. This splendid legacy, forged in crisis and enriched during times of peace, is deeply rooted in a time-tested warrior ethos. It is inspired by the notion of contributing to something larger, deeper, and more profound than one's own self. Notice: This is a printed Paperback version of the The Noncommissioned Officer and Petty Officer BACKBONE of the Armed Forces. Full version, All Chapters included. This publication is available (Electronic version) in the official website of the National Defense University (NDU). This document is properly formatted and printed as a perfect sized copy 6x9.
