The Nation of Gods and Earths, often referred to as the Five Percent Nation, is a cultural movement founded in 1964 by Clarence 13X in Harlem, New York. The group emphasizes self-knowledge, responsibility, and empowerment, especially among African American youth. Members identify as Gods (men) and Earths (women), reflecting their belief in divinity within each individual. This is the greatest story that was never told by the Gods and the Earths during their younger years with Allah the Father from the early 1960s up until the time of his assassination on June 13, 1969. This was a time of struggle for the Black Man, Woman, and Child (the Universal Family). This was the time of the Big Five, who were: Allah the Father, who brought about the Nation of Gods and Earths known as the Five Percenters; the Honorable Elijah Muhammad, who was the last and greatest messenger of Allah, also the leader and teacher of the Black Muslims; Malcolm X of the new arrival; Dr. Martin Luther King, Jr., the civil rights leader; and the Black Panther Party on the East and West coasts. These five groups were called the Big Five, because they had the attention of every Black Man, Woman, and Child in the wilderness of North America and other parts of our planet. There was a host of other Black groups as well. This was a time when the Five Percenter's teachings were being taught/spoken so plain and simple that even a child could understand. Black people were on the rise, and it was a time for a change—for Black Man, Woman, and Child to take their place on earth. Peace!

nation of gods and earths 120 lessons: We Have Never Been Modern Bruno Latour, 2012-10-01 With the rise of science, we moderns believe, the world changed irrevocably, separating us forever from our primitive, premodern ancestors. But if we were to let go of this fond conviction, Bruno Latour asks, what would the world look like? His book, an anthropology of science, shows us how much of modernity is actually a matter of faith. What does it mean to be modern? What difference does the scientific method make? The difference, Latour explains, is in our careful distinctions between nature and society, between human and thing, distinctions that our benighted ancestors, in their world of alchemy, astrology, and phrenology, never made. But alongside this purifying practice that defines modernity, there exists another seemingly contrary one: the construction of systems that mix politics, science, technology, and nature. The ozone debate is such a hybrid, in Latour's analysis, as are global warming, deforestation, even the idea of black holes. As these hybrids proliferate, the prospect of keeping nature and culture in their separate mental chambers becomes overwhelming—and rather than try, Latour suggests, we should rethink our distinctions, rethink the definition and constitution of modernity itself. His book offers a new explanation of science that finally recognizes the connections between nature and culture—and so, between our culture and others, past and present. Nothing short of a reworking of our mental landscape, *We Have Never Been Modern* blurs the boundaries among science, the humanities, and the social sciences to enhance understanding on all sides. A summation of the work of one of the most influential and provocative interpreters of science, it aims at saving what is good and valuable in modernity and replacing the rest with a broader, fairer, and finer sense of possibility.

nation of gods and earths 120 lessons: The God Tribe of Shabazz - The True History Elijah Muhammad, Nasir Hakim, 2012-03-17 The history of the God Tribe of Shabazz is one of the most elusive subjects of the Supreme Wisdom as taught by Messenger Elijah Muhammad, partly because it is spread out over so much time, on so many lectures and in so many different articles. The Tribe of Shabazz is not simply the offspring of a group of people who were the product of a disgruntled scientist who went into Africa to prove that He could make a people that could withstand anything, but a continuum of a vein of expression characteristic of how we as black people, who, when in our natural mind did things that were still superior to the best minds of mankind today. We are so far from what is actually natural for the Blackman, that we think that the trial and error mode of operating of this civilization today is brilliance; when in fact, the incidental actions of the Original Blackman is considered SUPERNATURAL by today's standards. The Messenger of Allah, Elijah Muhammad, delves so far into the most profound depths of wisdom when sharing with us what our God, in person, Master Fard Muhammad, had revealed, it makes you wonder about who is out there dormant and simply waiting to hear that particular word, sentence, paragraph or perspective that will make the light in or above their heads illuminate with Allah's voice communicating with them. In other words, it's not necessary to be mining Facebook, Twitter or Google+, etc, for revelation. It's being handed to you here.

nation of gods and earths 120 lessons: Pale Blue Dot Carl Sagan, Ann Druyan, 2011-07-06 "Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books."—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. "Takes readers far beyond *Cosmos* . . . Sagan sees humanity's future in the stars."—Chicago Tribune

nation of gods and earths 120 lessons: Teachings of Presidents of the Church: Brigham Young The Church of Jesus Christ of Latter-day Saints, The prophet Brigham Young taught the restored gospel of Jesus Christ in a basic, practical way that gave inspiration and hope to the Saints struggling to build a home in the wilderness. Though more than a century has now passed, his words are still fresh and appropriate for us today as we continue the work of building the kingdom of God. President Young declared that as members of The Church of Jesus Christ of Latter-day Saints we possess the "doctrine of life and salvation for all the honest-in-heart" (DBY, 7). He promised that those who receive the gospel in their hearts will have awakened "within them a desire to know and understand the things of God more than they ever did before in their lives" and will begin to "inquire, read and search and when they go to their Father in the name of Jesus he will not leave them without a witness" (DBY, 450). This book reflects the desire of the First Presidency and the Quorum of the Twelve Apostles to deepen the doctrinal understanding of Church members and to awaken within them a greater desire to know the things of God. It will inspire and motivate individuals, priesthood quorums, and Relief Society classes to inquire, read, search, and then go to their Father in Heaven for a witness of the truth of these teachings. Each chapter contains two sections—"Teachings of Brigham Young" and "Suggestions for Study." The first section consists of extracts from Brigham Young's sermons to the early Saints. Each statement has been referenced, and the original spelling and punctuation have been preserved; however, the sources cited will not be readily available to most members. These original sources are not necessary to have in order to effectively study or teach from this book. Members need not purchase additional references and commentaries to study or teach these chapters. The text provided in this book, accompanied by the scriptures, is sufficient for instruction. Members should prayerfully read and study President

Young's teachings in order to gain new insights into gospel principles and discover how those principles apply to their everyday lives. By faithfully and prayerfully studying these selections, Latter-day Saints will have a greater understanding of gospel principles and will more fully appreciate the profound and inspired teachings of this great prophet. The second section of each chapter offers a series of questions that will encourage thoughtful contemplation, personal application, and discussion of President Young's teachings. Members should refer to and carefully reread his words on the principle being discussed. Deep and prayerful study of these teachings will inspire members to greater personal commitment and will help them resolve to follow the teachings of the Savior, Jesus Christ. If individuals and families prayerfully follow the principles in this book, they will be blessed and inspired to greater dedication and spirituality, as were the early Saints who heard these words directly from the lips of the "Lion of the Lord" (HC, 7:434)—the prophet, seer, and revelator, President Brigham Young.

nation of gods and earths 120 lessons: The Pursuit of God with Study Guide A. W. Tozer, 2006-01-01 Sometimes the voices that speak most clearly in the present are those that echo from the past. So it is in this Christian classic by the late pastor and evangelist A. W. Tozer. In *The Pursuit of God*, Tozer brings the mystics to bear on modern spirituality, grieving the hustle and bustle and calling for a slow, steady gaze upon God. With prophetic vigor and flowing prose, he urges us to replace low thoughts of God with lofty ones, to quiet our lives so we can know God's presence. He reminds us that life apart from God is really no life at all. Tozer's bestseller, this book has been called one of the all-time most inspirational books by a panel of Christian magazine writers. And with this study guide, ideal for group or individual use, reflection and discussion questions will help you internalize the content and apply it to your life.

nation of gods and earths 120 lessons: Black Arabia and the African Origin of Islam Dr Wesley Muhammad, 2009-10 Is Islam a Religion of the Black Man as suggested by Elijah Muhammad? Or is it a slave religion originated by white Arabs and imposed on Black People? Finally, this question is addressed with scholarship rather than with rhetoric. Internationally known scholar of Islam Dr. Wesley Muhammad brings together in this his latest work a tremendous amount of scholarship and demonstrates that: Ancient Black Arabia, which is the matrix of Islam, is a root of civilization and an integral component of the Global African Civilization paradigm. Islam the veneration of Allah as the supreme God predated the Arabian prophet Muhammad by millennia The oldest records of this ancient veneration of Allah indicates that Blacks or Africans in Arabia were the originators of this veneration And much more Remarks about Black Arabia from Africentric Scholar Wayne B. Chandler, author of *Ancient Future: The Teachings and Prophetic Wisdom of the Seven Hermitic Laws of Ancient Egypt* (1999) about new book: I began going through it and I must say I was really impressed with your work and historical insights. More times than not, much of what has come on the heels of the work we did with [Ivan] Van Sertima has been no more than a regurgitation of our ideas, directions, and story lines. I applaud you in creating a written work which is fresh and inspiring. I am enjoying the read! Peace & Blessings.
