moorish science adept lessons: *Sacred Drift* Peter Lamborn Wilson, 2021-10-15 Peter Lamborn Wilson proposes a set of heresies, a culture of resistance, that dispels the false image of Islam as monolithic, puritan, and two-dimensional. Here is the story of the African-American noble Drew Ali, the founder of "Black Islam" in this country, and of the violent end of his struggle for "love, truth, peace, freedom, and justice." Another essay deals with Satan and "Satanism" in Esoteric Islam; and another offers a scathing critique of "Authority" and sexual misery in modern Puritanist Islam. "The Anti-caliph" evokes a hot mix of Ibn Arabi's tantric mysticism and the revolutionary teachings of the "Assassins." The title essay, "Sacred Drift," roves through the history and poetics of Sufi travel, from Ibn Khaldun to Rimbaud in Abyssinia to the Situationists. A "Romantic" view of Islam is taken to radical extremes; the exotic may not be "True," but it's certainly a relief from academic propaganda and the obscene banality of simulation. This is my brand of Islam: insurrectionary, elegant, dangerous, suffused with light – a search for poetic facts, a donation from and to the tradition of spiritual anarchy. —Hakim Bey Peter Lamborn Wilson, in his book *Sacred Drift: Essays on the Margins of Islam*, offers an interesting window into the early evolution of Islamic ideas among African Americans. —Abbas Milani, *New Republic* Peter Lamborn Wilson lives in New York and works for *Semiotext(e)* magazine, *Pacifica Radio*, and the Jack Kerouac School of Disembodied Poetics. moorish science adept lessons: *A Patriot's History of the United States* Larry Schweikart, Michael Patrick Allen, 2004-12-29 For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. *A Patriot's History of the United States* corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Author Edward Bruce Bynum offers a captivating and controversial viewpoint on the roots of our human existence, positing that all humans at their deepest core are variations on the African template, creating a shared identity and collective unconscious in all. He looks at both phenotypical types and psychic structures that form and identify us as human beings. Ideal for humanistic and transpersonal

psychologists and those interested in African American art and culture, *The African Unconsciousness* is a blend of modern and ancient psychology that provides a relevant backdrop to humanity and our daily life--Cover.

moorish science adept lessons: *Islam in Malaysia* Syed Muhd. Khairudin Aljunied, 2019 This book surveys the growth and development of Islam in Malaysia from the eleventh to the twenty-first century, investigating how Islam has shaped the social lives, languages, cultures and politics of both Muslims and non-Muslims in one of the most populous Muslim regions in the world. Khairudin Aljunied shows how Muslims in Malaysia built upon the legacy of their pre-Islamic past while benefiting from Islamic ideas, values, and networks to found flourishing states and societies that have played an influential role in a globalizing world. He examines the movement of ideas, peoples, goods, technologies, arts, and cultures across into and out of Malaysia over the centuries. Interactions between Muslims and the local Malay population began as early as the eighth century, sustained by trade and the agency of Sufi as well as Arab, Indian, Persian, and Chinese scholars and missionaries. Aljunied looks at how Malay states and societies survived under colonial regimes that heightened racial and religious divisions, and how Muslims responded through violence as well as reformist movements. Although there have been tensions and skirmishes between Muslims and non-Muslims in Malaysia, they have learned in the main to co-exist harmoniously, creating a society comprising of a variety of distinct populations. This is the first book to provide a seamless account of the millennium-old venture of Islam in Malaysia.

moorish science adept lessons: Pirate Utopias Peter Lamborn Wilson, 2003 'Peter Lamborn Wilson shows why we cherish pirates - and why, for the sake of the future, we must continue to do so. Interesting and compelling...a rollicking, adventurous book.' Marcus Rediker, author, *Between the Devil and the Deep Blue Sea* 'A chronicler, a historiographer, and a piratologist in the tradition of Defoe...with immense learning and interesting sympathies. His scholarship cuts through the seas of ignorance and prejudice with grace and power.' Peter Linebaugh, author, *The London Hanged* 'One of those rare books which give historians new ideas to think about. It deals with 17th century European converts to Islam - usually but not always as pirates - whose numbers Wilson puts at thousands. His careful analysis of (the) renegadoes, their ideas, and political practice leads to a very tentative suggestion that some of them may have links with Rosicrucianism and the 18th-century Enlightenment...Historians will have to think about this book's novel theme and pursue its implications. Wilson really does turn the world upside down!' Christopher Hill, author, *The World Turned Upside Down* From the 16th to the 19th centuries, Muslim corsairs from the Barbary Coast ravaged European shipping and enslaved thousands of unlucky captives. During this same period, thousands more Europeans converted to Islam and joined the pirate holy war. Were these men (and women) the scum of the seas, apostates, traitors -- Renegadoes? Or did they abandon and betray Christendom as a praxis of social resistance? Peter Lamborn Wilson focuses on the corsairs' most impressive accomplishment, the independent Pirate Republic of Salé, in Morocco, in the 17th century. Corsairs, Sufis, pederasts, irresistible Moorish women, slaves, adventures, Irish rebels, heretical Jews, British spies, a Moorish pirate in old New York, and radical working-class heroes all populate a book which intends to entertain and to make a point about insurrectionary communities.

moorish science adept lessons: Animal Symbolism in Ecclesiastical Architecture Edward Payson Evans, 1896

moorish science adept lessons: Small Wars Charles Edward Callwell, 2012-08-12 This is the original manual for "small wars," now known variously as guerrilla warfare, asymmetric combat, and

low-intensity conflict. It was first published in 1896 as an analysis and how-to guide for the British Army as it fought to expand the boundaries of the British Empire. Its author, Major General Sir Charles Edward Callwell, collects and distills combat experience from a vast range of British, French, and Russian imperial campaigns and rebellions. Callwell then draws several universal small-war combat lessons that are still true today, including the need for “boldness and vigor” to keep irregular forces off-balance, the vital role of intelligence, the importance of seizing and holding important terrain (most often the high ground), and the final war-winning requirement to “seize what the enemy prizes most.” He also shows that technological superiority alone is not enough, and that logistics and supply can lock an army in place instead of freeing it. Some of the Afghanistan battlefields described in the book are still being fought over today, with much the same disparity in forces, over a century later – it is impossible to miss the lessons of history in this classic work.

moorish science adept lessons: *Searching for John Ford* Joseph McBride, 2011-02-11 John Ford's classic films—such as Stagecoach, The Grapes of Wrath, How Green Was My Valley, The Quiet Man, and The Searchers—have earned him worldwide admiration as America's foremost filmmaker, a director whose rich visual imagination conjures up indelible, deeply moving images of our collective past. Joseph McBride's *Searching for John Ford*, described as definitive by both the New York Times and the Irish Times, surpasses all other biographies of the filmmaker in its depth, originality, and insight. Encompassing and illuminating Ford's myriad complexities and contradictions, McBride traces the trajectory of Ford's life from his beginnings as “Bull” Feeney, the nearsighted, football-playing son of Irish immigrants in Portland, Maine, to his recognition, after a long, controversial, and much-honored career, as America's national mythmaker. Blending lively and penetrating analyses of Ford's films with an impeccably documented narrative of the historical and psychological contexts in which those films were created, McBride has at long last given John Ford the biography his stature demands.

moorish science adept lessons: *The House of Wisdom* Jim Al-Khalili, 2012-03-27 A myth-shattering view of the Islamic world's myriad scientific innovations and the role they played in sparking the European Renaissance. Many of the innovations that we think of as hallmarks of Western science had their roots in the Arab world of the middle ages, a period when much of Western Christendom lay in intellectual darkness. Jim al- Khalili, a leading British-Iraqi physicist, resurrects this lost chapter of history, and given current East-West tensions, his book could not be timelier. With transporting detail, al-Khalili places readers in the hothouses of the Arabic Enlightenment, shows how they led to Europe's cultural awakening, and poses the question: Why did the Islamic world enter its own dark age after such a dazzling flowering?

moorish science adept lessons: *Converso Non-Conformism in Early Modern Spain* Kevin Ingram, 2018-12-06 This book examines the effects of Jewish conversions to Christianity in late medieval Spanish society. Ingram focuses on these converts and their descendants (known as conversos) not as Judaizers, but as Christian humanists, mystics and evangelists, who attempt to create a new society based on quietist religious practice, merit, and toleration. His narrative takes the reader on a journey from the late fourteenth-century conversions and the first blood purity laws (designed to marginalize conversos), through the early sixteenth-century Erasmian and radical mystical movements, to a Counter-Reformation environment in which conversos become the advocates for pacifism and concordance. His account ends at the court of Philip IV, where growing intolerance towards Madrid's converso courtiers is subtly attacked by Spain's greatest painter, Diego Velázquez, in his work, *Los Borrachos*. Finally, Ingram examines the historiography of early

modern Spain, in which he argues the converso reform phenomenon continues to be underexplored.

moorish science adept lessons: *The Musical Heritage of Al-Andalus* Dwight Reynolds, 2020-12-31 The Musical Heritage of Al-Andalus is a critical account of the history of Andalusian music in Iberia from the Islamic conquest of 711 to the final expulsion of the Moriscos (Spanish Muslims converted to Christianity) in the early 17th century. This volume presents the documentation that has come down to us, accompanied by critical and detailed analyses of the sources written in Arabic, Old Catalan, Castilian, Hebrew, and Latin. It is also informed by research the author has conducted on modern Andalusian musical traditions in Morocco, Algeria, Tunisia, Egypt, Lebanon and Syria. While the cultural achievements of medieval Muslim Spain have been the topic of a large number of scholarly and popular publications in recent decades, what may arguably be its most enduring contribution - music - has been almost entirely neglected. The overarching purpose of this work is to elucidate as clearly as possible the many different types of musical interactions that took place in medieval Iberia and the complexity of the various borrowings, adaptations, hybridizations, and appropriations involved.

moorish science adept lessons: *Space Is the Place* John Szwed, 2020-04-30 Considered by many to be a founder of Afrofuturism, Sun Ra—aka Herman Blount—was a composer, keyboardist, bandleader, philosopher, entrepreneur, poet, and self-proclaimed extraterrestrial from Saturn. He recorded over 200 albums with his Arkestra, which, dressed in Egypto-space costumes, played everything from boogie-woogie and swing to fusion and free jazz. John Szwed's *Space is the Place* is the definitive biography of this musical polymath, who was one of the twentieth century's greatest avant-garde artists and intellectuals. Charting the whole of Sun Ra's life and career, Szwed outlines how after years in Chicago as a blues and swing band pianist, Sun Ra set out in the 1950s to impart his views about the galaxy, black people, and spiritual matters by performing music with the Arkestra that was as vital and innovative as it was mercurial and confounding. Szwed's readers—whether they are just discovering Sun Ra or are among the legion of poets, artists, intellectuals, and musicians who consider him a spiritual godfather—will find that, indeed, space is the place.

Scurrilous, absurd, confessional and scathing by turns, *Confessions of an IT Manager* targets the idiocy, incompetence and overreach of the IT management industry from vantage point all the way up and down the greasy pole. Phil Factor (real name withheld to protest the guilty) has over 20 years experience in the IT industry, specializing in database-intensive applications. For withering insight into the human weaknesses and farcical levels of ineptitude that bring IT projects to their knees, plus occasional escapes into burnished pastiche and cock-a-leg doggerel there is no funnier, more illuminating commentary on the IT crowd.

moorish science adept lessons: *African Conflicts and Informal Power* Mats Utas, 2012-09-13 In the aftermath of an armed conflict in Africa, the international community both produces and demands from local partners a variety of blueprints for reconstructing state and society. The aim is to re-formalize the state after what is viewed as a period of fragmentation. In reality, African economies and polities are very much informal in character, with informal actors, including so-called Big Men, often using their positions in the formal structure as a means to reach

their own goals. Through a variety of in-depth case studies, including the DRC, Sierra Leone and Liberia, this comprehensive volume shows how important informal political and economic networks are in many of the continent's conflict areas. Moreover, it demonstrates that without a proper understanding of the impact of these networks, attempts to formalize African states, particularly those emerging from wars, will be in vain.

moorish science adept lessons: *The 48 Laws of Power* Robert Greene, 2023-10-31 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
