read lessons in chemistry online: Chemistry Weike Wang, 2018-04-30
'Outstanding...Unfolding in brief chapters studded with observations about her childhood and scientific facts, *Chemistry* may be the funniest novel ever written about living with depression.' People Our unnamed narrator is three years into her post-grad studies in chemistry and nearly as long into her relationship with her devoted boyfriend, who has just proposed. But while his path forward seems straight, hers is 'like a gas particle moving around in space': her research is stagnating, and she's questioning whether she's lost her passion for her work altogether. The demands of her Chinese parents—who have always expected nothing short of excellence—don't help. Eventually, the pressure mounts so high that she must leave everything she thought she knew about her future, and herself, behind. And for the first time she's confronted with a question she won't find the answer to in a textbook: What do I really want? Over the next two years, this winningly flawed,

disarmingly insightful heroine learns the formulas and equations for a different kind of chemistry—one in which the reactions can't be quantified, measured and analysed; one that can be studied only in the mysterious language of the heart. Weike Wang earned her undergraduate degree in chemistry and her doctorate in public health at Harvard University. She received her MFA from Boston University. She is a 2017 '5 Under 35' honouree of the National Book Foundation and is a recipient of the 2018 Whiting Award. She lives in New York. 'A spiky, sparkling slip of a novel...with a singular take of love, lab science, and existential crises.' Entertainment Weekly 'A beautiful, funny, eye-opening book.' Elle UK 'A genuine piece of literature: wise, humorous, and moving.' Ha Jin 'Science is an excellent lens for Weike Wang's look at a young woman's wonderfully skewed experience of love, ambition, loyalty, and, of course, chemistry.' Amy Hempel 'A clipped, funny, painfully honest narrative voice lights up Wang's debut about a Chinese-American graduate student who finds the scientific method inadequate for understanding her parents, her boyfriend, or herself...Wang [has a] gift for perspective.' Publishers Weekly 'Starts as a charming confection and then proceeds to add on layers of emotional depth and complexity with every page. It is to Wang's great credit that she manages to infuse such seriousness with so much light. I loved this novel.' Ann Patchett 'The most assured novel about indecisiveness you'll ever read...Despite its humour, Chemistry is an emotionally devastating novel about being young today and working to the point of incapacity without what you should really be doing and when you can stop.' Washington Post 'A novel about an intelligent woman trying to find her place in the world. It has only the smallest pinches of action but generous measures of humour and emotion...Chemistry will appeal to anyone asking themselves, how do I create the sort of family I want without rejecting the family I have.' New York Times Book Review 'Equal parts intense and funny...The narrator's voice—distinctive and appealing—makes this novel at once moving and amusing, never predictable. A wry, unique, touching tale of the limits of parental and partnership pressure.' Kirkus 'It's easy to get sucked into Weike Wang's writing: it's spartan and succinct, and so undeniably full of sucked-dry, smart humor, that you don't realize just how clear, just how painful, everything she's telling you is--and then it's like she's pushing on a cavity until you cry out.' Asian American Writers Workshop 'Reading Chemistry makes you realise that you don't need a lot of words to tell a story—you just need the right ones.' Sam Still Reading 'A brilliant coming-of-age story.' Culture Trip

From the USA TODAY bestselling author of Sweet Thing and Nowhere But Here comes a love story about a Craigslist "missed connection" post that gives two people a second chance at love fifteen years after they were separated in New York City. To the Green-eyed Lovebird: We met fifteen years ago, almost to the day, when I moved my stuff into the NYU dorm room next to yours at Senior House. You called us fast friends. I like to think it was more. We lived on nothing but the excitement of finding ourselves through music (you were obsessed with Jeff Buckley), photography (I couldn't stop taking pictures of you), hanging out in Washington Square Park, and all the weird things we did to make money. I learned more about myself that year than any other. Yet, somehow, it all fell apart. We lost touch the summer after graduation when I went to South America to work for National Geographic. When I came back, you were gone. A part of me still wonders if I pushed you too hard after the wedding... I didn't see you again until a month ago. It was a Wednesday. You were rocking back on your heels, balancing on that thick yellow line that runs along the subway platform, waiting for the F train. I didn't know it was you until it was too late, and then you were gone. Again. You said my name; I saw it on your lips. I tried to will the train to stop, just so I could say hello. After seeing you, all of the youthful feelings and memories came flooding back to me, and now I've spent the better part of a month wondering what your life is like. I might be totally out of my mind, but would you like to get a drink with me and catch up on the last decade and a half? M

A new favorite! - Devney Perry, USA Today Bestselling Author If you're a guy like me, and you find yourself having banged your sexy new boss—the school principal—in the back of your Jeep one drunken night, here's a few takeaways based on my experience... Lesson One: Always get her FULL name. Lesson Two: Consider asking what she does for a living. Lesson Three: Find out why she's moved to town. Get details. Details are crucial. Lesson Four: Don't alter her bio in front of an auditorium of high school students unless you know she has a sense of humor for that sort of thing. Lesson Five: If you ignore Lesson Four, apologize instead of flirt when you're sent to the principal's office. Lesson Six: NEVER sleep with her again. Lesson Seven: Pay attention to this one—it's the most important of them all. Don't fall for your one-night stand. Class dismissed. NEW YORK TIMES BEST SELLER • "A gripping and poignant ode to a messy, loving family in all its glory." —Madeline Miller, bestselling author of *Circe* In this "rich, complex family saga" (USA Today) full of long-buried family secrets, Marilyn Connolly and David Sorenson fall in love in the 1970s, blithely ignorant of all that awaits them. By 2016, they have four radically different daughters, each in a state of unrest. Wendy, widowed young, soothes herself with booze and younger men; Violet, a litigator turned stay-at-home-mom, battles anxiety and self-doubt; Liza, a neurotic and newly tenured professor, finds herself pregnant with a baby she's not sure she wants by a man she's not sure she loves; and Grace, the dawdling youngest daughter, begins living a lie that no one in her family even suspects. With the unexpected arrival of young Jonah Bendt—a child placed for adoption by one of the daughters fifteen years before—the Sorensens will be forced to reckon with the rich and varied tapestry of their past. As they grapple with years marred by adolescent angst, infidelity, and resentment, they also find the transcendent moments of joy that make everything else worthwhile.
