realidades 2 capitulo 1a answers: Expulsions Saskia Sassen, 2014-05-05 Soaring income inequality and unemployment, expanding populations of the displaced and imprisoned, accelerating destruction of land and water bodies: today's socioeconomic and environmental dislocations cannot be fully understood in the usual terms of poverty and injustice, according to Saskia Sassen. They are more accurately understood as a type of expulsion—from professional livelihood, from living space, even from the very biosphere that makes life possible. This hard-headed critique updates our understanding of economics for the twenty-first century, exposing a system with devastating consequences even for those who think they are not vulnerable. From finance to mining, the complex types of knowledge and technology we have come to admire are used too often in ways that produce elementary brutalities. These have evolved into predatory formations—assemblages of knowledge, interests, and outcomes that go beyond a firm's or an individual's or a government's project. Sassen draws surprising connections to illuminate the systemic logic of these expulsions. The sophisticated knowledge that created today's financial "instruments" is paralleled by the engineering expertise that enables exploitation of the environment, and by the legal expertise that allows the world's have-nations to acquire vast stretches of territory from the have-nots. Expulsions lays bare the extent to which the sheer complexity of the global economy makes it hard to trace lines of responsibility for the displacements, evictions, and eradications it produces—and equally hard for those who benefit from the system to feel responsible for its depredations.

Scholars have pondered the nature of race and ethnicity with regard to both Afro- American and Indo-American societies, though research on Brazil has been particularly prominent. Special attention has been given to the relationship between social class and race and ethnicity.

Social Inclusion and Economic Development in Latin America reviews the common features of these excluded populations, including their invisibility in official statistics and the stigma, discrimination, and disadvantages they have long endured. But it also examines the region's inclusionary policies and programs that can improve access by these groups to the quality social services and economic and political resources these groups need to level the playing field. Case studies examine ethnic and racial political organization, gender quotas, and labor markets across the region, and social exclusion in Brazil, Honduras, Guatemala, Mexico, and Peru. Comparative studies summarize social inclusion policies of both the European Union and selected countries on the Continent.

realidades 2 capitulo 1a answers: The Return of the Real Hal Foster, 1996-09-25 In The Return of the Real Hal Foster discusses the development of art and theory since 1960, and reorders the relation between prewar and postwar avant-gardes. Opposed to the assumption that contemporary art is somehow belated, he argues that the avant-garde returns to us from the future, repositioned by innovative practice in the present. And he poses this retroactive model of art and theory against the reactionary undoing of progressive culture that is pervasive today. After the models of art-as-text in the 1970s and art-as-simulacrum in the 1980s, Foster suggests that we are now witness to a return to the real—to art and theory grounded in the materiality of actual bodies and social sites. If The Return of the Real begins with a new narrative of the historical avant-gard, it concludes with an original reading of this contemporary situation—and what it portends for future practices of art and theory, culture and politics.
