The novel is a compelling work of historical fiction that provides a vivid portrayal of the social and economic conditions of the time. staar us history 2022 answer key: Unpacking Fake News Wayne Journell, 2019 Since the 2016 presidential election, the term fake news has become part of the national discourse. Although some have appropriated the term for political purposes, actual fake news represents an inherent threat to American democracy given the ease through which it is consumed and shared via social media. This book is one of the first of its kind to address the implications of fake news for the K-12 classroom. It explores what fake news is, why students are susceptible to believing it, and how they can learn to identify it. Leading civic education scholars use a psychoanalytic lens to unpack why fake news is effective and to show educators how they can teach their students to be critical consumers of the political media they encounter. The authors also link these ideas to the broader task of civic education and critical engagement in the democratic process. "Inside this book you will find descriptions of simple lessons practiced by experts that can help make students more critical news consumers." —From the Foreword by Rebecca Klein, HuffPost "One of the notable strengths of this book is its emphasis on concrete approaches to help students protect themselves and the larger democracy from the insidious influence of fake news." —Diana Hess, University of Wisconsin-Madison "This book is both an important contribution to social studies education and a timely response to the demands of our current political moment." —John Rogers, Institute for Democracy, Education, and Access, UCLA

staar us history 2022 answer key: Bilingualism and Bilingual Deaf Education Marc Marschark, Gladys Tang, Harry Knoors, 2014-06-02 In *Bilingualism and Bilingual Deaf Education*, volume editors Marc Marschark, Gladys Tang, and Harry Knoors bring together diverse issues and evidence in two related domains: bilingualism among deaf learners - in sign language and the written/spoken vernacular - and bilingual deaf education. The volume examines each issue with regard to language acquisition, language functioning, social-emotional functioning, and academic outcomes. It considers bilingualism and bilingual deaf education within the contexts of mainstream education of deaf and hard-of-hearing students in regular schools, placement in special schools and programs for the deaf, and co-enrollment programs, which are designed to give deaf students the best of both educational worlds. The volume offers both literature reviews and new findings across disciplines from neuropsychology to child development and from linguistics to cognitive psychology. With a focus on evidence-based practice, contributors consider recent investigations into bilingualism and bilingual programming in different educational contexts and in different countries that may have different models of using spoken and signed languages as well as different cultural expectations. The 18 chapters establish shared understandings of what are meant by bilingualism, bilingual education, and co-enrollment programming, examine their foundations and outcomes, and chart directions for future research in this multidisciplinary area. Chapters are divided into three sections: Linguistic, Cognitive, and Social Foundations; Education and Bilingual Education; and Co-Enrollment Settings. Chapters in each section pay particular attention to causal and outcome factors related to the acquisition and use of these two languages by deaf learners of different ages. The impact of bilingualism and bilingual deaf education in these domains is considered through quantitative and qualitative investigations, bringing into focus not only common educational, psychological, and linguistic variables, but also expectations and reactions of the stakeholders in bilingual programming: parents, teachers, schools, and the deaf and hearing students themselves.

staar us history 2022 answer key: The State of the Global Education Crisis UNESCO, United Nations Children's Fund, World Bank (the), 2021-12-09 The global disruption to education caused by the COVID-19 pandemic is without parallel and the effects on learning are severe. The crisis brought education systems across the world to a halt, with school closures affecting more than 1.6 billion learners. While nearly every country in the world offered remote learning opportunities for students, the quality and reach of such initiatives varied greatly and were at best partial substitutes for in-person learning. Now, 21 months later, schools remain closed for millions of children and youth, and millions more are at risk of never returning to education. Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality: learning losses are substantial, with the most marginalized children and youth often disproportionately affected. Countries have an opportunity to accelerate learning recovery and make schools more efficient, equitable, and resilient by building on investments made and lessons learned during the crisis. staar us history 2022 answer key: That's Not What Happened Kody Keplinger, 2018-08-28 Six survived to tell the story, but who knows the truth? An addictive page-turner from bestselling US sensation Kody Keplinger, author of THE DUFF. It's been three years since the Virgil County High School Massacre. Three years since my best friend, Sarah, was killed in a bathroom stall during the mass shooting. Everyone knows Sarah's story - that she died proclaiming her faith. But it's not true. Now Sarah's parents are publishing a book about her, so this might be my last chance to set the record straight . . . but I'm not the only survivor with a story to tell about what did - and didn't - happen that day. Except Sarah's martyrdom is important to a lot of people, people who don't take kindly to what I'm trying to do. And the more I learn, the less certain I am about what's right. I don't know what will be worse: the guilt of staying silent or the consequences of speaking up . . .
