sociology in our times 12th edition: What Is an Event? Robin Wagner-Pacifici, 2017-03-24 We live in a world of breaking news, where at almost any moment our everyday routine can be interrupted by a faraway event. Events are central to the way that individuals and societies experience life. Even life's inevitable moments—birth, death, love, and war—are almost always a surprise. Inspired by the cataclysmic events of September 11, Robin Wagner-Pacifici presents here a tour de force, an analysis of how events erupt and take off from the ground of ongoing, everyday life, and how they then move across time and landscape. *What Is an Event?* ranges across several disciplines, systematically analyzing the ways that events emerge, take shape, gain momentum, flow, and even get bogged down. As an exploration of how events are constructed out of ruptures, it provides a mechanism for understanding eventful forms and flows, from the micro-level of individual life events to the macro-level of historical revolutions, contemporary terrorist attacks, and financial crises. Wagner-Pacifici takes a close look at a number of cases, both real and imagined, through the reports, personal narratives, paintings, iconic images, political posters, sculptures, and novels they generate and through which they live on. What is ultimately at stake for individuals and societies in events, Wagner-Pacifici argues, are identities, loyalties, social relationships, and our very experiences of time and space. *What Is an Event?* provides a way for us all—as social and political beings living through events, and as analysts reflecting upon them—to better understand what is at stake in the formations and flows of the events that mark and shape our lives.

Wright Mills, Deborah Tannen, Barrie Thorne, Sidney Katz, Philip Zimbardo, and many others provide firsthand reporting that gives students a sense of being there. sociology in our times 12th edition: The Sociology of Space Martina Löw, 2016-09-09 In this book, the author develops a relational concept of space that encompasses social structure, the material world of objects and bodies, and the symbolic dimension of the social world. Löw's guiding

principle is the assumption that space emerges in the interplay between objects, structures and actions. Based on a critical discussion of classic theories of space, Löw develops a new dynamic theory of space that accounts for the relational context in which space is constituted. This innovative view on the interdependency of material, social, and symbolic dimensions of space also permits a new perspective on architecture and urban development.

sociology in our times 12th edition: The Selfish Gene Richard Dawkins, 1989 Science need not be dull and bogged down by jargon, as Richard Dawkins proves in this entertaining look at evolution. The themes he takes up are the concepts of altruistic and selfish behaviour; the genetical definition of selfish interest; the evolution of aggressive behaviour; kinship theory; sex ratio theory; reciprocal altruism; deceit; and the natural selection of sex differences. 'Should be read, can be read by almost anyone. It describes with great skill a new face of the theory of evolution.' W.D. Hamilton, Science

sociology in our times 12th edition: The Division of Labor in Society Émile Durkheim, 2013 Émile Durkheim is often referred to as the father of sociology. Along with Karl Marx and Max Weber he was a principal architect of modern social science and whose contribution helped established it as an academic discipline. The Division of Labor in Society, published in 1893, was his first major contribution to the field and arguably one his most important. In this work Durkheim discusses the construction of social order in modern societies, which he argues arises out of two essential forms of solidarity, mechanical and organic. Durkheim further examines how this social order has changed over time from more primitive societies to advanced industrial ones. Unlike Marx, Durkheim does not argue that class conflict is inherent to the modern Capitalistic society. The division of labor is an essential component to the practice of the modern capitalistic system due to the increased economic efficiency that can arise out of specialization; however Durkheim acknowledges that increased specialization does not serve all interests equally well. This important and foundational work is a must read for all students of sociology and economic philosophy.

sociology in our times 12th edition: Intersections of Space and Ethos Kyriaki Tsoukala, Nikolaos-Ion Terzoglou, Charikleia Pantelidou, 2014-12-05 The pressing economic, environmental

and social crises emanate the need for a redefinition of the dominant views, perspectives and values in the field of architecture. The intellectual production of the last two decades has witnessed an impressive number of new design techniques and conceptual displacements reflecting the dynamic and fluid relation between man and his dwelling space. However, the contemporary market forces are favouring the growth of a star-system in architectural production based on technological innovation, spectacular imagery and formal acrobatics, and are neglecting the social, environmental and moral implications of spatial design. Perhaps the time has come to think anew the possible critical intersections between space and ethos, not only as an answer to the negative consequences of Modernity, but also as a remedy to the negative aspects of globalisation. The aim of the present collective volume is to enliven the ethical dimensions and dilemmas of architecture as they are shaped within the complexity of our times on two levels: the level of critical and reflective discourse and the level of social and cultural reality occasioned by post-industrial modes of production and new technologies. Thirteen distinguished academics and researchers investigate the complex relations between architecture, space and ethics from divergent and inter-disciplinary perspectives: philosophy, sociology, the humanities, the arts, landscape design, environmental design, urban design and architectural history and theory.

Gurminder K. Bhambra takes up the classical concerns of sociology and social theory and shows how they can be rethought through an engagement with postcolonial studies and decoloniality, two of the most distinctive critical approaches of the past decades.

sociology in our times 12th edition: Uneasy Street Rachel Sherman, 2019-05-14 A surprising and revealing look at how today's elite view their wealth and place in society From TV's "real housewives" to The Wolf of Wall Street, our popular culture portrays the wealthy as materialistic and entitled. But what do we really know about those who live on "easy street"? In this penetrating book, Rachel Sherman draws on rare in-depth interviews that she conducted with fifty affluent New Yorkers—from hedge fund financiers and artists to stay-at-home mothers—to examine their lifestyle choices and understanding of privilege. Sherman upends images of wealthy people as invested only in accruing social advantages for themselves and their children. Instead, these liberal elites, who believe in diversity and meritocracy, feel conflicted about their position in a highly unequal society. As the distance between rich and poor widens, *Uneasy Street* not only explores the lives of those at the top but also sheds light on how extreme inequality comes to seem ordinary and acceptable to the rest of us.

sociology in our times 12th edition: Folk Devils and Moral Panics Stanley Cohen, 2011 'Richly documented and convincingly presented' -- New Society Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, *Folk Devils and Moral Panics* is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the British Academy.

sociology in our times 12th edition: The 48 Laws of Power Robert Greene, 2023-10-31 Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
