He writes emotively, in great detail, about his personal experience of growing up on a remote island during the colonial era, when races were segregated, and white people lived an elite existence. Following independence, he has been personally involved with many of the key economic, political and social activities that have evolved and enabled the nation to progress during the 20th century. These include the sugar industry, tourism, commerce and industry, religion, the media, women and of course, the coups. Much of the story is told through the eyes of the many people of all races with whom he has interacted. Fiji is made up of over 300 unique islands. Tarte has been to many of them, and in a final chapter he gives an insightful commentary of how different they all are.
