the kristen archive: With Teeth Kristen Arnett, 2021-06-01 'With Teeth is a wonderfully sticky novel about motherhood, partnership, sex and love. Kristen Arnett lets her characters have the run of the place, and it's delicious fun to watch them do, say, and think things they'll regret' Emma Straub, author of All Adults Here 'Sublimely weird, fluently paced, brazenly funny and gayer still' Naoise Dolan, New York Times 'A darkly funny, brutally honest story about a woman undone by motherhood . . . With Teeth digs in deep and doesn't let go. I truly loved it' Jennifer Weiner, bestselling author of Mrs Everything and That Summer If she's being honest, Sammie Lucas is scared of her son. Working from home in the close quarters of their Florida house, she lives with one wary eye peeled on Samson, a sullen, unknowable boy who resists her every attempt to bond with him. Uncertain in her own feelings about motherhood, she tries her best - driving, cleaning, cooking, prodding him to finish projects for school - while growing increasingly resentful of Monika, her confident but absent wife. As Samson grows from feral toddler to surly teenager, Sammie's life begins to deteriorate into a mess of unruly behaviour, and her struggle to create a picture-perfect queer family unravels. When her son's hostility finally spills over into physical aggression, Sammie must confront her role in the mess - and the possibility that it will never be clean again. Blending the warmth and wit of Arnett's breakout hit, Mostly Dead Things, with a candid take on queer family dynamics, With Teeth is a thought-provoking portrait of the delicate fabric of family - and the many ways it can be torn apart.

the kristen archive: *Bad Behaviour* Mary Gaitskill, 2019-05-02 Mary Gaitskill's tales of desire and dislocation in 1980s New York caused a sensation with their frank, caustic portrayals of men and women's inner lives. As her characters have sex, try and fail to connect, play power games and inflict myriad cruelties on each other, she skewers urban life with precision and candour. 'Stubbornly original, with a sort of rhythm and fine moments that flatten you out when you don't expect it, these stories are a pleasure to read' Alice Munro 'An air of Pinteresque menace hangs over these people's social exchanges like black funereal bunting ... Gaitskill writes with such authority, such radar-perfect detail' Michiko Kakutani, *The New York Times*

the kristen archive: *The Fight Against Doubt* Inmaculada de Melo-Martín, Kristen Intemann, 2018-07-02 The lack of public support for climate change policies and refusals to vaccinate children are just two alarming illustrations of the impacts of dissent about scientific claims. Dissent can lead to confusion, false beliefs, and widespread public doubt about highly justified scientific evidence. Even more dangerously, it has begun to corrode the very authority of scientific consensus and knowledge. Deployed aggressively and to political ends, some dissent can intimidate scientists, stymie research, and lead both the public and policymakers to oppose important public policies firmly rooted in science. To criticize dissent is, however, a fraught exercise. Skepticism and fearless debate are key to the scientific process, making it both vital and incredibly difficult to characterize and identify dissent that is problematic in its approach and consequences. Indeed, as de Melo-Martín and Intemann show, the criteria commonly proposed as means of identifying inappropriate dissent are flawed and the strategies generally recommended to tackle such dissent are not only ineffective but could even make the situation worse. *The Fight Against Doubt* proposes that progress on this front can best be achieved by enhancing the trustworthiness of the scientific community and by being more realistic about the limits of science when it comes to policymaking. It shows that a richer understanding of the context in which science operates is needed to disarm problematic dissent and those who deploy it. This, the authors argue, is the best way forward, rather than diagnosing the many instances of wrong-headed dissent.

the kristen archive: *The Toxic Museum* Helene Tello, 2023-12-29 The Toxic Museum examines the use of pesticides in German museum collections at the end of the 19th and early 20th centuries.

It reconstructs the research of substances against harmful insects in museum collections within the historical context of the formation of nation-states, colonialism, a strengthening chemical industry, the First World War, and the resulting broad-based hygiene movement through the lens of the Ethnologisches Museum (Ethnological Museum) in Berlin. Because of their persistence, the consequences of the use of pesticides in museum collections are now unmistakable and well documented in many places. Numerous objects are highly contaminated and are only accessible under difficult conditions regarding occupational health and safety. This creates obstacles for conservation and scientific processing, as well as for mediation in the context of exhibitions and external loans. The most precarious and difficult situations arise when contaminated museum objects are repatriated to their countries of origin. This monograph examines contemporary challenges in the 21st century museum landscape and contextualises the history of pesticide use at the turn of the 20th century. The Toxic Museum will be of great interest to students and scholars working in conservation, museology, monument preservation, art and cultural studies, ethnology, history, and economics.

the kristen archive: Arctic Archives Susi K. Frank, Kjetil A. Jakobsen, 2019-10-31 This pioneering volume explores the Arctic as an important and highly endangered archive of knowledge about natural as well as human history of the anthropocene. Focusing on the Arctic as an archive means to investigate it not only as a place of human history and memory - of Arctic exploring, ›conquering‹ and colonizing -, but to take into account also the specific environmental conditions of the circumpolar region: ice and permafrost. These have allowed a huge natural archive to emerge, offering rich sources for natural scientists and historians alike. Examining the debate on the notion of (›natural‹) archive, the cultural semantics and historicity of the meaning of concepts like ›warm‹, ›cold‹, ›freezing‹ and ›melting‹ as well as various works of literature, art and science on Arctic topics, this volume brings together literary scholars, historians of knowledge and philosophy, art historians, media theorists and archivologists.

the kristen archive: Full Body Burden Kristen Iversen, 2013-06-04 “An intimate and deeply human memoir that shows why we should all be concerned about nuclear safety, and the dangers of ignoring science in the name of national security.”—Rebecca Skloot, #1 New York Times bestselling author of *The Immortal Life of Henrietta Lacks* A shocking account of the government’s attempt to conceal the effects of the toxic waste released by a secret nuclear weapons plant in Colorado and a community’s vain search for justice—soon to be a feature documentary Kristen Iversen grew up in a small Colorado town close to Rocky Flats, a secret nuclear weapons plant once designated the most contaminated site in America. *Full Body Burden* is the story of a childhood and adolescence in the shadow of the Cold War, in a landscape at once startlingly beautiful and--unknown to those who lived there--tainted with invisible yet deadly particles of plutonium. It's also a book about the destructive power of secrets--both family and government. Her father's hidden liquor bottles, the strange cancers in children in the neighborhood, the truth about what was made at Rocky Flats--best not to inquire too deeply into any of it. But as Iversen grew older, she began to ask questions and discovered some disturbing realities. Based on extensive interviews, FBI and EPA documents, and class-action testimony, this taut, beautifully written book is both captivating and unnerving.

the kristen archive: The Court as Archive Ann Genovese, Trish Luker, Kim Rubenstein, 2019-02-19 Until the late 20th century, 'an archive' generally meant a repository for documents, as well as the generic name for the wide range of documents the repository might hold. An archive could be visited, and then also searched, to discover past actions or lives that had meaning for the present. While historians and historiographers have long understood the contests that archives contain and represent, the very idea of 'the archive' has, over the last 40 years, become the subject and object of widening and intensified consideration. This consideration has been intellectual (from scholars in a wide range of disciplines) and public (from communities and individuals whose stories are held captive, or sometimes hidden or excluded from official archives), as well as institutional. It has involved scrutiny and critique of official archives' limitations and practices, as well as symbolic, affective and theoretical expansion and heightened expectation of what 'the archive' is or should be. The very language of 'the archive' now carries freight as administrative practice, normative value, metaphor, description and aspiration in different ways than it did in the 20th century. This collection offers a unique contribution to these reinvigorated and sometimes new conversations about what an archive might be, what it can do as a consequence, and to whom it bears custodial responsibilities. In particular, this collection addresses what it means for contemporary Australian superior courts of record to not only have constitutional and procedural duties to documents as a matter of law, but also to acknowledge obligations to care for those materials in a way that understands their public meaning and public value for the Australian people, in the past, in the present and for the future.

the kristen archive: The Specter of the Archive Nicholas Popper, 2024-01-04 An exploration of the proliferation of paper in early modern Britain and its far-reaching effects on politics and society. We are used to thinking of ourselves as living in a time when more information is more available than ever before. In *The Specter of the Archive*, Nicholas Popper shows that earlier eras had to grapple with the same problem—how to deal with too much information at their fingertips. He reveals that early modern Britain was a society newly drowning in paper, a light and durable technology whose spread allowed statesmen to record drafts, memoranda, and other ephemera that might otherwise have been lost, and also made it possible for ordinary people to collect political texts. As original paperwork and copies alike flooded the government, information management became the core of politics. Focusing on two of the primary political archives of early modern England, the Tower of London Record Office and the State Paper Office, Popper traces the

circulation of their materials through the government and the broader public sphere. In this early media-saturated society, we find the origins of many issues we face today: Who shapes the archive? Can we trust the pictures of the past and the present that it shows us? And, in a more politically urgent vein: Does a huge volume of widely available information (not all of it accurate) risk contributing to polarization and extremism?

the kristen archive: *Undoing Jane Doe* Kristen Lewis Cunnane, 2019 Church of the Brethren missionaries trapped in a Japanese concentration camp... The Publisher For three years, a Japanese concentration camp in the Philippines was home for Church of the Brethren missionaries Edward and Helen Angeny during WW II. Their tale of replacing murdered missionaries in China in 1940 and their subsequent imprisonment was aptly written into this memoir by Helen Angeny when she was 80 years old. Their internment included hunger as well as humor, frustration as well as joy, and threats as well as miracles. It also included the birth of their first child soon after imprisonment. The story ended well for the 500 civilian internees but only after MacArthur's troops accidentally came upon this POW group which had been previously unknown to the US government. Helen Angeny's reflections as well as her soul are revealed in this thought-provoking historical narrative.

the kristen archive: *Community Archives, Community Spaces* Jeannette Bastian, Andrew Flinn, 2019-12-19 This book traces the trajectory of the community archives movement, expanding the definition of community archives to include sites such as historical societies, social movement organisations and community centres. It also explores new definitions of what community archives might encompass, particularly in relation to disciplines outside the archives. Over ten years have passed since the first volume of *Community Archives*, and inspired by continued research as well as by the formal recognition of community archives in the UK, the community archives movement has become an important area of research, recognition and appreciation by archivists, archival scholars and others worldwide. Increasingly the subject of papers and conferences, community archives are now seen as being in the vanguard of social concerns, markers of community-based activism, a participatory approach exemplifying the on-going evolution of 'professional' archival (and heritage) practice and integral to the ability of people to articulate and assert their identity. Community

Archives, Community Spaces reflects the latest research and includes practical case studies on the challenges of building and sustaining community archives. This new book will appeal to practitioners, researchers, and academics in the archives and records community as well as to historians and other scholars concerned with community building and social issues.

the kristen archive: *Media Matter* Francisca Comas Rubí, Karin Priem, Sara González Gómez, 2021-11-22 This volume discusses a broad range of themes and methodological issues around images, photography and film. It is about sharing a fascination about the visual history of education and how images became the most influential (circulating) media within the field of education on local, regional, national and international levels. Within this volume images are primarily analyzed as presenters, mediators, and means of observation. Images are seen as mobile reproducible media which play an active role within the public and educational sphere. They are means of observation and storytelling, they shape identities by presenting models of how we should act in and perceive the world, they circulate through different contexts and media, all of which impacts their meanings.

the kristen archive: *Producing the Archival Body* Jamie A. Lee, 2020-12-21 Producing the Archival Body draws on theoretical and practical research conducted within US and Canadian archives, along with critical and cultural theory, to examine the everyday lived experiences of archivists and records creators that are often overlooked during archival and media production. Expanding on the author's previous work, which engaged archival and queer theories to develop the Queer/ed Archival Methodology that intervenes in traditional archival practices, the book invites readers interested in humanistic inquiry to re-consider how archives are defined, understood, deployed, and accessed to produce subjects. Arguing that archives and bodies are mutually constitutive and developing a keen focus on the body and embodiment alongside archival theory, the author introduces new understandings of archival bodies. Contributing to recent disciplinary moves that offer a more transdisciplinary emphasis, Lee interrogates how power circulates and is deployed in archival contexts in order to build critical understandings of how deeply archives influence and shape the production of knowledges and human subjectivities. Producing the Archival Body will be essential reading for academics and students engaged in the study of archival studies, library and information science, gender and women's studies, anthropology, history, digital humanities, and media studies. It should also be of great interest to practitioners working in and with archives

the kristen archive: *Mooring the Global Archive* Martin Dusinberre, 2023-09-30 Martin Dusinberre follows the Yamashiro-maru steamship across Asian and Pacific waters in an innovative history of Japan's engagement with the outside world in the late-nineteenth century. This compelling in-depth analysis reconstructs the lives of some of the thousands of male and female migrants who

left Japan for work in Hawai'i, Southeast Asia and Australia. These stories bring together transpacific historiographies of settler colonialism, labour history and resource extraction in new ways. Drawing on an unconventional and deeply material archive, from gravestones to government files, paintings to song, and from digitized records to the very earth itself, Dusinberre addresses key questions of method and authorial positionality in the writing of global history. This engaging investigation into archival practice asks, what is the global archive, where is it cited, and who are 'we' as we cite it? This title is also available as Open Access.

the kristen archive: *Lycanthropy and Other Chronic Illnesses* Kristen O'Neal, 2022-05-10 "Emotional, thoughtful, and a true testament to the power of friendship"—Locus Magazine Teen Wolf meets Emergency Contact in this sharply observed, hilarious, and heartwarming debut young adult novel about friendship, chronic illness, and . . . werewolves. Priya worked hard to pursue her premed dreams at Stanford, but the fallout from undiagnosed Lyme disease sends her back to her childhood home in New Jersey during her sophomore year—and leaves her wondering if she'll ever be able to return to the way things were. Thankfully she has her online pen pal, Brigid, and the rest of the members of "oof ouch my bones," a virtual support group that meets on Discord to crack jokes and vent about their own chronic illnesses. When Brigid suddenly goes offline, Priya does something out of character: she steals the family car and drives to Pennsylvania to check on Brigid. Priya isn't sure what to expect, but it isn't the horrifying creature that's shut in the basement. With Brigid nowhere to be found, Priya begins to puzzle together an impossible but obvious truth: the creature might be a werewolf—and the werewolf might be Brigid. As Brigid's unique condition worsens, their friendship will be deepened and challenged in unexpected ways, forcing them to reckon with their own ideas of what it means to be normal.

the kristen archive: *The Archived* V.E. Schwab, 2018-11-13 Each body has a story to tell, a life seen in pictures only Librarians can read. The dead are called Histories, and the vast realm in which they rest is the Archive. Da first brought Mackenzie Bishop four years ago, when she was twelve years old, frightened but determined to prove herself. Now Da is dead, and Mac has grown into what he once was: a ruthless Keeper, tasked with stopping often-violent Histories from waking up and getting out. Because of her job, she lies to the people she loves, and she knows fear for what it is: a useful tool for staying alive. Being a Keeper isn't just dangerous – it's a constant reminder of those Mac has lost. Da's death was hard enough, but now that her little brother is gone too, Mac starts to wonder about the boundary between living and dying, sleeping and waking. In *The Archive*, the dead must never be disturbed. And yet, someone is deliberately altering Histories, erasing essential chapters. Unless Mac can piece together what remains, the Archive itself may crumble and fall.

the kristen archive: *Out of the Closet, Into the Archives* Amy L. Stone, Jaime Cantrell, 2015-11-20 Finalist for the 2016 Lambda Literary Award in LGBT Anthology presented by the Lambda Literary Foundation *Out of the Closet, Into the Archives* takes readers inside the experience of how it feels to do queer archival research and queer research in the archive. The archive, much like the closet, exposes various levels of public and privateness—recognition, awareness, refusal, impulse, disclosure, framing, silence, cultural intelligibility—each mediated and determined through subjective insider/outsider ways of knowing. The contributors draw on their experiences conducting research in disciplines such as sociology, African American studies, English, communications, performance studies, anthropology, and women's and gender studies. These essays challenge scholars to engage with their affective experience of being in the archive, illuminating how the space of the archive requires a different kind of deeply personal, embodied research. *Out of the Closet, Into the Archives* represents the exciting directions for scholarship enabled by this rapid growth of new LGBTQ archives. Although mindful of critiques of the archive as an institution of power and attentive to experiences and ephemerality that can escape it, the essays published here practice forms of the archival turn that put relentless curiosity and unapologetic passion to use as methods for intellectual invention. — from the Foreword by Ann Cvetkovich

the kristen archive: Two Trees Make a Forest Jessica J. Lee, 2020-08-04 This stunning journey through a country that is home to exhilarating natural wonders, and a scarring colonial past . . . makes breathtakingly clear the connection between nature and humanity, and offers a singular portrait of the complexities inherent to our ideas of identity, family, and love (Refinery29). A chance discovery of letters written by her immigrant grandfather leads Jessica J. Lee to her ancestral homeland, Taiwan. There, she seeks his story while growing closer to the land he knew. Lee hikes mountains home to Formosan flamecrests, birds found nowhere else on earth, and swims in a lake of drowned cedars. She bikes flatlands where spoonbills alight by fish farms, and learns about a tree whose fruit can float in the ocean for years, awaiting landfall. Throughout, Lee unearths surprising parallels between the natural and human stories that have shaped her family and their beloved island. Joyously attentive to the natural world, Lee also turns a critical gaze upon colonialist explorers who mapped the land and named plants, relying on and often effacing the labor and knowledge of local communities. Two Trees Make a Forest is a genre-shattering book encompassing history, travel, nature, and memoir, an extraordinary narrative showing how geographical forces are interlaced with our family stories.
