tropicana speech topics: *The Leader in Me* Stephen R. Covey, 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

tropicana speech topics: Queer Theory Annamarie Jagose, 2013-05-31 Ten years ago 'queer' was a term of abuse; now it is routinely, although controversially, used as self-description. Queer Theory traces the intriguing history of same-sex sex over the last century through the mid-century homophile movements, gay liberation, the women's movement and lesbian feminism to the new concept of queer. Annamarie Jagose investigates the arguments of the supporters and opponents of queer theory, finding that its strength lies in its potential to question the very idea of sexual identities. By blending insights from contemporary intellectual theories like post-structuralism and from the work of theorists like Judith Butler, Jagose argues that queer theory's challenge is to create new ways of thinking about not just heterosexuality and homosexuality but also such seemingly given fixed notions as 'sexuality' and 'gender', even 'man' and 'woman'. Queer Theory demonstrates a radical, exciting new way of analysing human identity itself.

tropicana speech topics: *Language Contact and Bilingualism* René Appel, Pieter Muysken, 2005 What happens – sociologically, linguistically, educationally, politically – when more than one language is in regular use in a community? How do speakers handle these languages simultaneously, and what influence does this language contact have on the languages involved? Although most people in the world use more than one language in everyday life, the approach to the study of language has usually been that monolingualism is the norm. The recent interest in bilingualism and language contact has led to a number of new approaches, based on research in communities in many different parts of the world. This book draws together this diverse research, looking at examples from many different situations, to present the topic in any easily accessible form. Language contact is looked at from four distinct perspectives. The authors consider bilingual societies; bilingual speakers; language use in the bilingual community; finally language itself (do languages change when in contact with each other? Can they borrow rules of grammar, or just words? How can new languages emerge from language contact?). The result is a clear, concise synthesis offering a much-needed overview of this lively area of language study.

tropicana speech topics: *The Faith of a (Woman) Writer* Hofstra University, 1988-02-04

Reflecting the salient undercurrents of contemporary research on women writers, this volume is an appraisal of the work of the writer as woman and presents critics' perceptions about how women writers have dealt with the complexity of changing female visions in the twentieth century. Each of the thirty-four essays, contributed by some of today's most distinguished writers, speaks to the work of a particular twentieth-century woman writer, and each constitutes a contribution to the scholarly debate. Questions are raised as to the appropriate posture a critic should adopt, and whether a critic of women's writing should deal with the work as the product of a woman's hand, dwelling on the sensibilities of the female consciousness, or assume that the proper point of departure remains the artistic and aesthetic norms that have emerged from generations of male-defined practice.

tropicana speech topics: *Niche Envy* Joseph Turow, 2008-02-15 The price we pay for the new strategies in database marketing that closely track desirable customers, offering them benefits in return for personal information. We have all been to Web sites that welcome us by name, offering us discounts, deals, or special access to content. For the most part, it feels good to be wanted—to be valued as a customer. But if we thought about it, we might realize that we've paid for this special status by turning over personal information to a company's database. And we might wonder whether other customers get the same deals we get, or something even better. We might even feel stirrings of resentment toward customers more valued than we are. In *Niche Envy*, Joseph Turow examines the emergence of databases as marketing tools and the implications this may have for media, advertising, and society. If the new goal of marketing is to customize commercial announcements according to a buyer's preferences and spending history—or even by race, gender, and political opinions—what does this mean for the twentieth-century tradition of equal access to product information, and how does it affect civic life? Turow shows that these marketing techniques are not wholly new; they have roots in direct marketing and product placement, widely used decades ago and recently revived and reimagined by advertisers as part of customer relationship management (known popularly as CRM). He traces the transformation of marketing techniques online, on television, and in retail stores. And he describes public reaction against database marketing—pop-up blockers, spam filters, commercial-skipping video recorders, and other ad-evasion methods. Polls show that the public is nervous about giving up personal data. Meanwhile, companies try to persuade the most desirable customers to trust them with their information in return for benefits. *Niche Envy* tracks the marketing logic that got us to this uneasy impasse.

tropicana speech topics: *Mirrors* Eduardo Galeano, 2011-08-04 In *Mirrors*, Galeano smashes aside the narrative of conventional history and arranges the shards into a new pattern, to reveal the past in radically altered form. From the Garden of Eden to twenty-first-century cityscapes, we glimpse fragments in the lives of those who have been overlooked by traditional histories: the artists, the servants, the gods and the visionaries, the black slaves who built the White House, and the women who were bartered for dynastic ends

tropicana speech topics: *Salt, Sugar, Fat* Michael Moss, 2013-02-28 The No.1 New York Times Bestseller In China, for the first time, the people who weigh too much now outnumber those who

weigh too little. In Mexico, the obesity rate has tripled in the past three decades. In the UK over 60 per cent of adults and 30 per cent of children are overweight, while the United States remains the most obese country in the world. We are hooked on salt, sugar and fat. These three simple ingredients are used by the major food companies to achieve the greatest allure for the lowest possible cost. Here, Pulitzer Prize-winning investigative reporter Michael Moss exposes the practices of some of the most recognisable (and profitable) companies and brands of the last half century. He takes us inside the labs where food scientists use cutting-edge technology to calculate the 'bliss point' of sugary drinks. He unearths marketing campaigns designed – in a technique adapted from the tobacco industry – to redirect concerns about the health risks of their products, and reveals how the makers of processed foods have chosen, time and again, to increase consumption and profits, while gambling with our health. Are you ready for the truth about what's in your shopping basket?

tropicana speech topics: *The Perfect Weapon* David E. Sanger, 2018-06-21 From Russia's tampering with the US election to the WannaCry hack that temporarily crippled Britain's NHS, cyber has become the weapon of choice for democracies, dictators, and terrorists. Cheap to acquire, easily deniable, and used for a variety of malicious purposes — from crippling infrastructure to sowing discord and doubt — cyberweapons are re-writing the rules of warfare. In less than a decade, they have displaced terrorism and nuclear missiles as the biggest immediate threat to international security and to democracy. Here, New York Times correspondent David E. Sanger takes us from the White House Situation Room to the dens of Chinese government hackers and the boardrooms of Silicon Valley, piecing together a remarkable picture of a world now coming face-to-face with the most sophisticated — and arguably most dangerous — weapon ever invented. *The Perfect Weapon* is the dramatic story of a new era of constant sabotage, misinformation, and fear, in which everyone is a target.

tropicana speech topics: *Blacktino Queer Performance* E. Patrick Johnson, Ramón H. Rivera-Servera, 2016-05-19 Staging an important new conversation between performers and critics, *Blacktino Queer Performance* approaches the interrelations of blackness and Latinidad through a stimulating mix of theory and art. The collection contains nine performance scripts by established and emerging black and Latina/o queer playwrights and performance artists, each accompanied by an interview and critical essay conducted or written by leading scholars of black, Latina/o, and queer expressive practices. As the volume's framing device, blacktino grounds the specificities of black and brown social and political relations while allowing the contributors to maintain the goals of queer-of-color critique. Whether interrogating constructions of Latino masculinity, theorizing the black queer male experience, or examining black lesbian relationships, the contributors present blacktino queer performance as an artistic, critical, political, and collaborative practice. These scripts, interviews, and essays not only accentuate the value of blacktino as a reading device; they radiate the possibilities for thinking through the concepts of blacktino, queer, and performance across several disciplines. *Blacktino Queer Performance* reveals the inevitable flirtations, frictions, and seductions that mark the contours of any ethnoracial love affair. tropicana speech topics: Superman's Not Coming Erin Brockovich, 2020-08-25 From the environmental activist, consumer advocate, and renowned crusader—a stirring call to action that gives us the tools we need to take action ourselves, to make our voices heard, to ensure our water is safe, and to finally bring about change. Clean water is as basic to life on planet Earth as hydrogen or oxygen. In her long-awaited book—her first to reckon with the condition of water on our planet—Erin Brockovich shows us what's at stake. She writes powerfully of the fraudulent science disguising our national water crisis: Cancer clusters are not being reported. People in Detroit and the state of New Jersey don't have clean water. The drinking water for more than six million Americans contains unsafe levels of industrial chemicals linked to cancer and other health issues. The saga of PG&E continues to this day. Yet communities and people around the country are fighting to make an impact, and Brockovich tells us their stories. In Poughkeepsie, New York, a water operator responded to his customers' concerns and changed his system to create some of the safest water in the country. Local moms in Hannibal, Missouri, became the first citizens in the nation to file an ordinance prohibiting the use of ammonia in their public drinking water. Like them, we can each protect our right to clean water by fighting for better enforcement of laws, new legislation, and stronger regulations.

In chapters covering such topics as Cuban rum and cigars, the world-famous Tropicana Club, and Havana's association with the mob, author Peter Moruzzi provides essential historical context for the many fascinating and evocative images.

As Dasani comes of age, New York City's homeless crisis has exploded, deepening the chasm between rich and poor. She must guide her siblings through a world riddled by hunger, violence, racism, drug addiction, and the threat of foster care. Out on the

A work of luminous and riveting prose, Elliott’s *Invisible Child* reads like a page-turning novel. It is an astonishing story about the power of resilience, the importance of family and the cost of inequality—told through the crucible of one remarkable girl. Winner of the J. Anthony Lukas Book Prize • Finalist for the Bernstein Award and the PEN/John Kenneth Galbraith Award

tropicana speech topics: Presentation Patterns Neal Ford, Matthew McCullough, Nathaniel Schutta, 2012-08-15 Presentation Patterns is the first book on presentations that categorizes and organizes the building blocks (or patterns) that you'll need to communicate effectively using presentation tools like Keynote and PowerPoint. Patterns are like the lower-level steps found inside recipes; they are the techniques you must master to be considered a master chef or master presenter. You can use the patterns in this book to construct your own recipes for different contexts, such as business meetings, technical demonstrations, scientific expositions, and keynotes, just to name a few. Although there are no such things as antirecipes, this book shows you lots of antipatterns—things you should avoid doing in presentations. Modern presentation tools often encourage ineffective presentation techniques, but this book shows you how to avoid them. Each pattern is introduced with a memorable name, a definition, and a brief explanation of motivation. Readers learn where the pattern applies, the consequences of applying it, and how to apply it. The authors also identify critical antipatterns: clichés, fallacies, and design mistakes that cause presentations to disappoint. These problems are easy to avoid—once you know how. Presentation Patterns will help you Plan what you'll say, who you'll say it to, how long you'll talk, and where you'll present Perfectly calibrate your presentation to your audience Use the storyteller's "narrative arc"

to full advantage Strengthen your credibility—and avoid mistakes that hurt it Hone your message before you ever touch presentation software Incorporate visuals that support your message instead of hindering it Create highly effective “infodecks” that work when you’re not able to deliver a talk in person Construct slides that really communicate and avoid “Ant Fonts,” “Floodmarks,” “Alienating Artifacts,” and other errors Master 13 powerful techniques for delivering your presentation with power, authority, and clarity Whether you use this book as a handy reference or read it from start to finish, it will be a revelation: an entirely new language for systematically planning, creating, and delivering more powerful presentations. You’ll quickly find it indispensable—no matter what you’re presenting, who your audiences are, or what message you’re driving home.
