He reunido también algunas ideas de lo que se denomina organizaciones inteligentes que enfatizan los estilos cognoscitivos, los procesos sobre las estructuras, el factor humano, la retroalimentación total y el concepto de visión, entre otras cosas. Por otra parte, no se ha descuidado el tratamiento de problemas estructurados de orden lógico. Este tipo de problemas, por su naturaleza formal, no se asemejan a los de la vida real; sin embargo, el entrenamiento en la resolución de los mismos es de suma importancia para dar objetividad al pensamiento y controlar la impulsividad y el egocentrismo, que son enemigos del pensamiento racional. La experiencia ha demostrado que quienes toman buenas decisiones y resuelven problemas prácticos de todo tipo

poseen también la habilidad para resolver problemas estructurados.
